Chemical Engineering Department

Chemical Engineering (CHE)

--MANY COLLEGE OF ENGINEERING COURSES REQUIRE STUDENTS NOT ENROLLED IN BUSINESS ADMINISTRATION OR ENGINEERING (INCLUDING CCS MAJORS) TO PAY A \$115-207 COMPUTER USER FEE. THIS IS A SPECIAL FEE, TO BE PAID ONLY ONCE EACH TERM, AND IS IN ADDITION TO THE INFORMATION TECHNOLOGY ACCESS FEE PAID BY FULL TIME STUDENTS AS PART OF THEIR REGULAR FEE ASSESSMENT. YOU WILL BE INFORMED ON THE FIRST DAY OF CLASS WHETHER OR NOT YOUR CLASS IS SUBJECT TO THIS FEE.

The goals of this course are to help students hone and enhance their problem solving, critical thinking, creative thinking, and troubleshooting skills and to ease the transition from college to the workplace. Topics include structured critical reasoning, Kepner-Tregoe analysis, Duncker Diagrams, vertical and lateral thinking and Futuring. The students will work in teams to apply the principles they learn in the course to work with a local business to find and solve problems in their operations. The graduate course (ChE 598) will also require of prospectus of a potential client for the next course offering. The course syllabus can be obtained by sending an email message to lauradb@umich.edu

Business Water Risk

Business Water Risk: Ripple Effects from Watersheds to the Capital Markets

This 7-week course presents an overview of how water has impacted risks to businesses and their supply chains, and how corporate financial managers and institutional investors are starting to incorporate risks in their accounting and asset allocations. Corporate water risk exposure is a function of three variables: 1) company/sector-specific characteristics (e.g. water intensity of production), 2) the water conditions in particular geographies (e.g. drought-prone or strictly regulated), and 3) the strength of corporate management (e.g. proactive vs. reactive) in mitigating risks. The challenge is how the information from the physical world is translated in the financial world, and vice versa. It is often perceived that the proper risk management strategy for water in a corporate context is technology-based (new supply, recycling, monitoring, etc.). The course will describe how capital commitments for technology and infrastructure are often a last resort, because they are expensive, long-term, and

	TIME	LOCATION		
	often their cost cannot be passed on to the consumer. Short-term, financial risk management is preferred, such as hedging and insurance strategies. This course will explore corporate water risk and financial response strategies, and discuss commercial tools available to sustainability, corporate and financial managers. This include corporate water footprinting, regional asset risk mapping (Aqueduct), corporate operational risk assessment (Water Risk Monetizer), and financial asset risk signaling (WaterBeta).			
32246	P W LEC 014 MW	12-130PM	151 CHRYS	Lastoskie
	Greenhouse Gas Control			
	Greenhouse Gas Control			
	This course presents a review of strategies for the reduction of greenhouse gas (GHG) emissions in power generation, transportation, and the built environment. Sources, discharges, and physical properties of GHGs are surveyed, and technologies for GHG elimination or sequestration are discussed. Policy options for GHG control are considered.			
28072	P W LEC 028 T	230-330PM	1045 GGBL	Ioannou
	Computer-aided Project Mgmt			
	Computer-aided Project Management			
	Introduction to the application of modern project management computer systems, including Primavera P6 Professional and Microsoft Project, for construction project planning, scheduling and control. This course must be accompanied or preceded by CEE 536 (or MFG 536).			
28275	P W LEC 041 TTH	230-4PM	1008 EECS	Love
	Decentralized Water Supply			
	Decentralized Water Supply, Hygiene, and Sanitation			
	This course provides an introduction to decentralized approaches to water access and treatment that results in providing access to drinking water and sanitation. The class will cover the risks associated with poor water quality (waterborne pathogens and chemicals); appropriate physical, chemical, and biological process technologies for decentralized deployment; social factors; and consideration for resource recovery, sustainability, public policies and environmental justice, and economic models including privatization.			
31983	P W LEC 045 TTH	10-1130AM	1025 GGBL	Jeffers
	Structural Fire Engineering			
	Structural Fire Engineering			
	This course provides an overview of methods for the design and analysis of structures under fire hazards. Topics include: fire models for structural applications, conduction heat transfer analysis, response of materials at elevated temperatures, local and global structural responses, prescriptive and performance-based design approaches. The course will rely on finite element analysis; it must therefore be accompanied or preceded by CEE 510 (or equivalent).			
32418	P W LEC 069 TTH	10-1130AM	2238 SRB	Yin
	Infrastructure Systems Optimiz			
	Infrastructure Systems Optimization			
	This class is to prepare students with the systems-level approach to the analysis and design of civil infrastructure systems. The fundamental concepts associated with the course are taught through a series of examples drawn from the various aspects of civil infrastructure systems applications. The examples build upon each other to provide a comprehensive overview of practical approaches to goal-oriented problem formulation and solution while giving the student a fundamental understanding of principles that can be used to facilitate decision making. Optimization techniques that will be discussed in this class include linear programming formulations and solution algorithms, multi-objective optimization, integer optimization, network models, and nonlinear programming.

Environmental Finance Environmental Finance: Financial Innovations for Green Growth Environmental Markets, Sustainable Investment, and Financial Technology. This course will review innovations in processes, investment mandates and financial basics of the key pillars of Environmental Finance across all asset classes and investment vehicles. It will examine how established practices, procedures and tools from within the mainstream financial market are being adapted to integrate ESG criteria, in the pursuit of financial performance goals from both an investor and corporate perspective. The course will further explore how new entrepreneurial ventures are starting to disrupt the environmental finance environment.

Electrical Engr & Computer Sci

Electrical Engineering And Computer Science (EECS)

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE ELECTRICAL ENGINEERING AND COMPUTER SCIENCE DEPARTMENT MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND THE FIRST WEEK OF LECTURES AND LABS/DISCUSSIONS (AS APPROPRIATE) FOR ANY EECS COURSES.

AT THE SAME TIME, THE EECS DEPARTMENT IS NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

Bus Entr in Thought & Action
ENTR 390.003 and BA 201.001 meet together.

Business Thought and Action --- This course introduces students to business. In this course we foster development of the key skill of learning via reflection on one's own experience. The course will rely heavily on examination of individual organizations or industries from which generalizations can be made. Specific situations will be selected to convey the excitement of business situations, the role of business in society and the global scope of business. The primary purpose of this class is to educate students about the broad range of problems and opportunities that businesses face and the tools and skills that are necessary to face them. A secondary purpose is to show the students the richness of business activity by 'peeling back the onion' via case discussions of situations and companies they have experienced in their lives. Students will gain familiarity with different kinds of information resources: from trade magazines to mass market books to research journals.

Intro to Entrepreneurial Des
Entrepreneurial Design is a cross-disciplinary course and lab for current and potential entrepreneurs, designers, hackers, makers, founders, and doers. The focus is on learning to hack things together and experience the fun of building, with minimal technical mumbo-jumbo.

Intro to Entrepreneurial Design has three lab sections. In these sections, you will dive in and gain hands-on, direct experience in designing and building physical and digital prototypes, expanding on lessons learned in the lecture part of the course. You MUST take one of these sections in addition to the main lecture to get full credit

for the course.

Section 8: Hardware/Coding Internet of Things, ENTR 390.008

Section 9: 3D Printing/Prototyping, ENTR 390. 009

Section 10: Virtual Reality, ENTR 390.010

NOTE: Students must enroll in one lab (008-010). When you enroll in the lab, you will be auto-enrolled in the lecture (006).

E-Commerce Entrepreneurship
The E-Commerce Entrepreneurship course is designed to introduce students to the online world of business, retail, and commerce. With the increasing popularity of shows like Shark Tank and the ease of setting up an online business, people are more than ever interested in setting up their own online business. The class will address the expected challenges and help students gain the knowledge they would need to start their own online business upon completion of the course.

-------	---	---------	---	-------	---------	---------------

Digital Product Design
Digital Product Design is an introduction to the fundamentals of designing products for digital platforms. This course was created by UM students and will be taught by practicing designers working at FarmLogs.

In this course, students will learn how to:

- Use design thinking to discover problems worth solving, generate and prototype solutions, and test them with real users
- Design your own products by creating wireframes, interactions, and visual designs
- Use typography, color, shape, space--and industry-standard tools like Sketch, Invision, etc--to build designs that are attractive, simple, and functional
- Solicit constructive feedback, critique design work, and substantiate your criticism
- Discuss topics in the design world, including usability, user experience design, user interface design, and design research

Intended Audience:

This is an introductory course for students studying engineering, art and design, and liberal arts--or anyone interested in making effective digital products.

Format:

-Weekly lectures with optional work sessions where students can hang out and work with instructors, classmates, and others in the Ann Arbor design community.

-Weekly small design assignments with a final product project at the end of the semester.

28857 PD LEC 013 T 4-6PM 1690 BEYSTER Sick, McGuire

TechLab MCity

TechLab at MCity Independent Study

The TechLab Independent Study class will be participating in sponsor company projects that advance their technology development. Each student team, divided by sponsoring company, will be responsible for accomplishing an open-ended project (assigned by the company), and gain experience in developing cutting edge technology at an early stage startup.

The core rationale for the TechLab initiative is to provide students with a hands-on learning experience working with applied science in the process of progressing from the lab to full commercialization. This independent study provides a unique opportunity to not only explore coursework outside of a dedicated CoE program but also have direct contact and to work alongside peers, colleagues, and faculty across multiple disciplines.

407 Entrepreneurship Hr 1.00
20385 P W SEM 001 F 1130-1230PM STAMPS Gibson, Gordon

Entrepreneurship Hour

This seminar series is designed to expose students to entrepreneurship through interaction with experienced entrepreneurs, business leaders, and venture capitalists as well as individuals involved in emerging business models, new venture creation, and technology commercialization. While covering a broad set of engineering disciplines, guest speakers will share their knowledge on the latest, most diverse practices on legal, financial, and other innovation issues. The lectures include leading entrepreneurs and executives, technology innovators, experts from the financial markets, and others who support the entrepreneurial infrastructure. Following these seminars, students will be able to meet the guest speakers along with other members of the entrepreneurial community.

408 Patent Law 1.00
20382 P W SEM 001 M 6-8PM 1303 EECS

Patent Law

Prereq: Sophomore standing or above

Inventors and entrepreneurs have four concerns related to patent law:

1. protecting inventions during product development
2. determining invention patentability
3. avoiding infringement
4. leveraging a patent as a business asset

This course addresses these concerns through the application of case law and business cases to an invention of a student's choice.

410 Finding Your Venture 2.00
31970 P LEC 001 TH 3-5PM 1303 EECS Hayden, Brown

Finding Your Venture

Finding your Venture

It's hard to start a company, but it doesn't have to be complicated. This course dramatically improves your odds of starting a viable business by providing a framework for identifying large, attractive opportunities. Every student will leave with a viable business opportunity to pursue and a set of valuable and repeatable skills that will be an asset in any entrepreneurial setting.

Urban Entrepreneurship
The Urban Entrepreneurship course is designed for students who want to learn how to make lasting improvements in urban quality-of-life through the creation of for-profit businesses. Urban communities can be vibrant, exciting, and highly productive places, but residents and visitors are often faced with an array of unique challenges. Governments, foundations, and not-for-profit companies have long been associated with efforts to make improvements, but in spite of those efforts, significant urban needs persist. Students in Urban Entrepreneurship course will explore the creation of sustainable, scalable, for-profit companies that address the needs of urban communities. Entrepreneurs have a long history of service to urban communities, and rapidly accelerating technology and knowledge in a variety of fields give rise to new business models for solving previously intractable problems.

Organizational Mgmt in Startup
Organizational Mgmt Startups - Fall 17 will meet Fridays from 9:00am-11:00am, in TBD.

This course is designed to teach the fundamentals of identifying and prioritizing the "who" (human resource capital) and the "what" (skill sets) needed for your venture to grow and thrive. Building and managing a world-class team is one of the most critical factors determining the success of a company. You will learn the fundamentals of establishing and protecting a corporate culture, and best practices in recruiting, interviewing, and managing your organization. You will learn how to keep employees motivated, accountable, and happy. Students will also study what to do in failure mode to resolve internal conflicts and terminate team relationships when necessary. Course work includes selected readings in organizational structure and development, case study review, and in-class discussion and active role play exercises designed to demonstrate skill proficiencies. The Instructor has been the CEO and President of both public and private companies, including on-going corporations and start-ups that were both successes and failures.

Creativity & Design

Students from ALL schools and colleges may take this course.

If you place yourself on the waitlist, it is highly likely you will be allowed in the course.

=====

Creativity & Design - Strategies for Innovation

The course is a hands-on, interactive, immersion into personal creativity and the design thinking process. Using tools for self-awareness, discovery and curiosity, the course will explore how people, places and practices foster human creativity. Students will discuss: What is creativity? How can a person become more creative? In order to become more creative, students must be willing to look within themselves and share what they find. The design thinking portion of the course will include a team assignment exploring problem framing and solution analysis, as well as storytelling practices via presentations at the end of the semester.

The course's objectives for its students will be:

- A paradigm shift- to learn about other ways of thinking and principles that can pivot their approach to viewing and reacting to the world.
- Defining creativity- to create a working definition so that the students can achieve a clearly identified goal. ID your personal creative style via discovering what you are most enthusiastic about and what types of endeavors make you excited to create.
- Discuss methods and approaches that contribute to individual, team and organizational creativity- how you can bring down barriers to creative thinking and the importance of attitude and positive affirmations.
- Develop a skill set and program of continuing study and practice that develops creative mentors, practices and environments.
- Gain confidence in your creative talent.
- Learn the importance of consumer / audience qualitative research and understanding in the design process.
- Develop a working knowledge of the design thinking process.
- Practice problem framing and solution analysis to help with organizational design.
- Learn how to apply the design thinking process to build solutions and innovations.
- Expand creative ability and increase productivity and happiness by learning about obstacle removal in creative practice.
- Explore team building exercises and processes with the hope that there will be a resulting change in attitude--that our thoughts and actions are not in isolation. Partnership and community are critical to both creative living and design success.

Connect/Autonom Vehicle Tech
Connected and Autonomous Vehicle Technology: Business and Regulatory Issues

Enrollment is by instructor consent. Students must send a resume and a 250 word statement of interest to <https://www.law.umich.edu/problemsolving> by March 25th and 5pm. If admitted, the instructor/Law School will then notify CFE so an electronic permission can be entered to allow the enrollment.

This course is one of four interdisciplinary problem solving courses offered at the Law School in fall 2017. Graduate and professional students in business, economics, engineering, information, law, and public policy are eligible to take this course.

This problem solving course will challenge an interdisciplinary team of students to address a real-world problem in the rapidly evolving connected and autonomous vehicle landscape. The Detroit Metro area and the University of Michigan are leading the world in researching and deploying technological advances in vehicle connectivity and automation. The potential benefits of "driverless cars" are widely understood, but the path to getting from the current state of human driving to a world of interconnected and self-driven vehicles entails an overwhelming confluence of technological, legal, regulatory, political, and business issues. This course will focus on one particular problem -- the coordination of intellectual property rights, business assets, and technological standardization by industry and governmental stakeholders. Classes will be run as discovery sessions with industry, governmental, and academic experts. Students working in interdisciplinary sub-teams will dive deeply into particular aspects of the problem, and the course culminates in the creation of an integrated class deliverable in the form of a business or operational plan proposing concrete solutions.

32460 P R LEC 050 M 5-7PM 133 CHRYS

DE&I in Entrepreneurship
Diversity, Equity, and Inclusion in Entrepreneurship and Engineering (DEI & E2)

This course will explore what DEI means and why it's academically, economically, and socially important through the specific lens of engineering and entrepreneurship.

Greenhouse Gas Control
 Greenhouse Gas Control

This course presents a review of strategies for the reduction of greenhouse gas (GHG) emissions in power generation, transportation, and the built environment. Sources, discharges, and physical properties of GHGs are surveyed, and technologies for GHG elimination or sequestration are discussed. Policy options for GHG control are considered.

Develp & Verify Systems Reqmts

Data collection and analysis techniques for developing and verifying system design requirements are studied: identifying, quantifying and prioritizing stakeholder objectives, minimizing test procedures cost, validation vs. verification, and limited vs. mass production strategies. Course work includes a term project. Knowledge of introductory statistics is required.

This course will be taught in a team based/project based manner without formal exams or a final. There will be annotated reading assignments due at each class and we will use formative based assessments (like quizzes) at least 6 times during the term. Homework will be not be graded for accuracy but rather for effort and honesty in written reflections. There will be two projects this term that are focussed on characterization techniques. A more detailed description can be found on the following website: http://java.engin.umich.edu/465F17

Naval Arch & Marine Engr Dept

Naval Architecture And Marine Engineering (NAVARCH)

--MANY COLLEGE OF ENGINEERING COURSES REQUIRE STUDENTS NOT ENROLLED IN BUSINESS ADMINISTRATION OR ENGINEERING (INCLUDING CCS MAJORS) TO PAY A \$115-207 COMPUTER USER FEE. THIS IS A SPECIAL FEE, TO BE PAID ONLY ONCE EACH TERM, AND IS IN ADDITION TO THE INFORMATION TECHNOLOGY ACCESS FEE PAID BY FULL TIME STUDENTS AS PART OF THEIR REGULAR FEE ASSESSMENT. YOU WILL BE INFORMED ON THE FIRST DAY OF CLASS WHETHER OR NOT YOUR CLASS IS SUBJECT TO THIS FEE.

Movement Science (MOVESCI)

NOTE - ENROLLMENT NOT GUARANTEED FOR STUDENTS OTHER THAN KINESIOLOGY MAJORS. ATTENDANCE AT FIRST CLASS IS MANDATORY TO RESERVE YOUR PLACE IN CLASS. ACTIVITY CLASSES FOR NON-MAJORS ARE LISTED IN THE UMOVE PROGRAM.

110 Bio&Beh Bases Hu Mvt **3.00**
 13747 P RW LEC 001 MWF 10-11AM 3735 CCRB Kern
 This section is held for Kinesiology students. Non-Kinesiology students should wait list under section 011.

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

13748 P RW LEC 002 MWF 10-11AM 1100 OBL Kern
 This section is held for Kinesiology students. Non-Kinesiology students should wait list under section 012.

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

13749 P RW LEC 003 MWF 10-11AM 2100 OBL Kern
 This section is held for Kinesiology students. Non-Kinesiology students should wait list under section 013.

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

24528 P W LEC 011 MWF 10-11AM 3735 CCRB Kern
 This section is intended as a waitlist for non-Kinesiology students who wish to enroll in section 001.

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

24529 P W LEC 012 MWF 10-11AM 1100 OBL Kern
 This section is intended as a waitlist for non-Kinesiology students who wish to enroll in section 002.

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

24530 P W LEC 013 MWF 10-11AM 2100 OBL Kern
 This section is intended as a waitlist for non-Kinesiology students who wish to enroll in section 003.

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

TIMES AND REGISTRATION INFORMATION.

140	Beginning Swim		1.00		
13768	PD W LAB 001	MW	7-8PM	ARR	Starling
Class will be held in the CCRB Margaret Bell Pool.					
Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu. Little or no swim experience? This course is for you. You'll start with entering the pool and getting comfortable. You'll progress to front crawl, back crawl, elementary backstroke, breaststroke, sidestroke, and butterfly. And you'll learn jumping in, treading, and water safety. Goal: one length of the pool. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.					
23392	PD W LAB 002	MW	7-8PM	ARR	Starling
Class will be held in the CCRB Margaret Bell Pool.					
Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu. Little or no swim experience? This course is for you. You'll start with entering the pool and getting comfortable. 141	Begin Swim II		1.00	ADVISORY	
13770	PD W LAB 001	MW	8-9PM	ARR	Starling
Class will be held in the CCRB Margaret Bell Pool.					
Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu. Beginning Swim II is for students who are already comfortable in the water and who can swim across the pool (the short way). The course works on building endurance and improving technique in freestyle, backstroke, elementary backstroke, breaststroke, sidestroke, butterfly, diving and treading water as well as water safety. Flip turns and other activities will be offered as skills advance. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.					
31909	PD W LAB 002	TTH	7-8PM	ARR	
Class will be held in the CCRB Margaret Bell Pool.

142	Intermediate Swim		1.00		
13769	PD W LAB 001	MW	8-9PM	ARR	Thelen
Class will be held in the CCRB Margaret Bell Pool.					
Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu. Pre-req: Must have ability to swim one length (long way) each of crawl, backstroke and breaststroke. Intermediate swim focuses on refining strokes while building endurance. Each of the strokes will be taken apart and put back together better than before! Other topics covered include laps, treading water, diving and water safety. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.

Introduction to SportAnalytics
 This course will be held in OBL #1170.

Students enrolled in more than five upper division SM courses will be disenrolled from one of the excess courses.

With the increasing availability of information, especially with the emergency of "Big Data," the ability to effectively use data to derive key business decisions has been a critical strategic advantage for sports enterprises. This course will provide you a foundation you may need to understand the importance of analytics and apply analytics methods in the sports industry. In this course, you will learn basic analytic methods applied to sports data. We will cover descriptive statistics and the application of probability in sports. You will learn to use correlation to detect statistical relationships and use regression analyses to identify factors that contribute to sports and business performance. This course will survey a number of business decision making scenarios in the sports industry, such as ticket pricing, advertising and promotions, and operation management. In the first half of the course, we will focus on the understanding sports data and using them to develop insights. In the second half, we will focus on analyzing the data to make strategic implications. We will also explore various challenges that can arise when implementing analytical tools within a sports organization.

Literature, Science & the Arts

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND:

---THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES;

---EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES;

---THE FIRST TWO MEETINGS OF HISTORY 396 AND 397;

---EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES;

---THE FIRST TWO MEETINGS OF COURSES IN OTHER SUBJECTS.

AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

Chemistry Department

Chemistry (CHEM)

--A GRADE OF C- OR BETTER MUST BE OBTAINED IN ALL CHEMISTRY COURSES PREREQUISITE TO SUBSEQUENT CHEMISTRY COURSES.
 --ROOM A706 CHEM IS A WHEELCHAIR EQUIPPED LAB.
 --A STUDENT WHO DOES NOT ATTEND THE FIRST MEETING OF A BIOLOGY, CHEMISTRY, OR PHYSICS LAB MAY BE DROPPED FROM THAT COURSE FOR NON-ATTENDANCE. ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION PROCESS TO MAKE SURE THAT THEIR OFFICIAL COURSE SCHEDULES MATCH THE COURSES THEY ARE ATTENDING.

English Language Institute

English Language Institute (ELI)

ELI courses fall into three categories:

1. English for Academic Purposes courses for graduate students;
2. Language and teacher training courses for international GSIs;
3. Teacher training courses for students planning to teach ESL in local communities or abroad.

For assistance in choosing an appropriate course, please go to the ELI Academic Advising website:
<http://bit.ly/eliadvising> or e-mail: eliadvisor@umich.edu to make an appointment to speak with an advisor.

To enroll in this course, students need to:

1. Submit a portfolio. Portfolios should be submitted directly to the instructor of each section. For priority consideration, portfolios should be submitted no later than 5pm on Friday, March 24, 2017. Students should receive notification of their acceptance (or not) no later than Tuesday, March 28, 2017.

2. Students are encouraged to consider a second-choice section (where available) as a potential back-up, and make contact with that instructor.

Note: Students who are currently a declared creative-writing minor or English sub-concentrator will receive alternative enrollment instructions. Creative-writing minors and English sub-concentrators are not required to submit a portfolio for review.

To enroll in this course, students need to:

1. Submit a portfolio. Portfolios should be submitted directly to the instructor of each section. For priority consideration, portfolios should be submitted no later than 5pm on Friday, March 24, 2017. Students should receive notification of their acceptance (or not) no later than Tuesday, March 28, 2017.

2. Students are encouraged to consider a second-choice section (where available) as a potential back-up, and make contact with that instructor.

Note: Students who are currently a declared creative-writing minor or English sub-concentrator will receive alternative enrollment instructions. Creative-writing minors and English sub-concentrators are not required to submit a portfolio for review.

21967 P W SEM 002 M 530-830PM 2468 MH Watkins

To enroll in this course, students need to:

1. Submit a portfolio. Portfolios should be submitted directly to the instructor of each section. For priority consideration, portfolios should be submitted no later than 5pm on Friday, March 24, 2017. Students should receive notification of their acceptance (or not) no later than Tuesday, March 28, 2017.

Economics Department

Economics (ECON)

101 Principles Econ I

4.00 ADVISORY

Students will be auto-enrolled in LEC 100 when they elect DIS 101-111.

There will be three midterms for this course: Tuesday October 10, 8:00 - 9:40 PM; Tuesday November 7, 8:00 - 9:40 PM; and Wednesday December 6, 8:00 - 9:40 PM. All exams must be taken on the assigned dates and times. If you cannot take these exams as scheduled, please register for an open section in another lecture of Econ 101. No exceptions will be made to these exam dates and times.

No overrides will be issued for this class.

Students will be auto-enrolled in LEC 300 when they elect DIS 301-311;

There will be three midterms for this course: Tuesday October 10, 8:00 - 9:40 PM; Tuesday November 7, 8:00 - 9:40 PM; and Wednesday December 6, 8:00 - 9:40 PM. All exams must be taken on the assigned dates and times. If you cannot take these exams as scheduled, please register for an open section in another lecture of Econ 101. No exceptions will be made to these exam dates and times.

No overrides will be issued for this class.

History Department

History (HISTORY)

--IT IS CRITICAL THAT STUDENTS ATTEND CLASS FROM THE BEGINNING OF THE TERM. ALTHOUGH STUDENTS MAY BE OFFICIALLY REGISTERED FOR A COURSE, THE DEPARTMENT MAY DISENROLL ANY STUDENT NOT ATTENDING THE FIRST TWO COURSE MEETINGS.
 --DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE.
 --STUDENTS ARE ENCOURAGED TO USE THE WAITLIST FOR ANY CLOSED COURSE. STUDENTS SHOULD REGISTER ON THE WAITLIST ACCORDING TO PREFERRED SECTION AND ATTEND THE FIRST CLASS. UP TO THE FIRST DAY OF CLASS, OVERRIDES WILL BE GIVEN BY THE DEPARTMENT AS SPACE BECOMES AVAILABLE. STUDENTS ARE NOTIFIED AND GIVEN TWO DAYS TO USE THE OVERRIDE, AFTER WHICH THE SPOT MAY GO TO AN ALTERNATE STUDENT ON THE WAITLIST. ONCE CLASSES HAVE STARTED, STUDENTS (WAITLISTED OR NOT) MUST CONTACT THE INSTRUCTOR FOR AN OVERRIDE.

Mathematics Department

Mathematics (MATH)

--MATH DEPARTMENT POLICY REQUIRES THAT STUDENTS ATTEND THE FIRST TWO CLASS MEETINGS (OR NOTIFY THE INSTRUCTOR IN ADVANCE OF THEIR ABSENCE) OR THEY MAY BE DROPPED FROM THE CLASS.
 --STUDENTS SHOULD CHECK WOLVERINE ACCESS FOR SECTION AVAILABILITY AND SCHEDULE CHANGES.
 --MATH DEPARTMENT POLICY LIMITS STUDENTS TO A TOTAL OF 4 CREDITS FOR COURSES NUMBERED BELOW 111.

Preference is given to Math PhD students.

This course is reserved for Quantitative Finance & Risk Management Master's students.

Enrollment for this course is by wait list only. Preference will be given to Math PhD students.

Enrollment for this course is by wait list only. Overrides for non-Math PhD students will not be given until the end of August.

Enrollment for this course is by wait list only. Overrides for non-Math PhD students will not be given until the end of August.

Functional Analysis
Enrollment for this course is by waitlist only. Preference will be given to PhD students in Mathematics.

Lie Algebras & Representations

Enrollment for this course is by waitlist only. Preference will be given to students in the Quantitative Finance & Risk Management program and Math PhD students.

Prerequisites: Differential equations (e.g. Math 316); probability theory (e.g. Math 525/526, Stat 515); numerical analysis (Math 471 and Math 472); mathematical finance (Math 423 and Math 542/IOE 552, Math 506 or permission from instructor); programming (e.g. C, Matlab, Mathematica, Java).

Probability with Martingales
Enrollment for this course is by waitlist only.

Symplectic Geometry & Mechanic

Teichmuller thry, higher&lower

Spanish (SPANISH)

--A student who misses either of the first two meetings of any course offered by the Department of Romance Languages may be dropped from the course for non-attendance.
 --Students with any previous study of Spanish must take the Spanish placement test before enrolling. Placement test dates are online at:
www.lsa.umich.edu/rll/undergraduate/languageplacement/languageplacementtests.

--All students must take action through the registration system to make sure that their official schedule of courses matches the courses they are attending.

Gayle Morris Sweetland Center for Writing (WRITING)

100	Transit Coll Writing		3.00	
18824	P W REC 001	MW	10-11AM	1155 NQ Brancho

Writing 100 is designed to help students of all levels improve their writing, but is best suited to those who have yet to fulfill the First-Year Writing Requirement. Upper-level students should have a compelling academic reason for enrolling in Writing 100.

Normal waitlist procedures apply for students who attend the first two classes. Students who wish to join Writing 100 after the first two class sessions must email the instructor to set up a meeting to discuss enrolling. Based on this discussion, the student and instructor will then make a determination on whether or not it is appropriate for the student to enroll.

11222	P W REC 002	MW	11-12PM	G634 HH Sessolo

Labs taught in 2244 USB are Bring Your Own Laptop labs.

This lab is a CSP lab. CSP sections are scheduled for more hours per week than a routine section of the same course. Some of that time is devoted to workshop activities, e.g., problem solving, practice tests, review of assignments and instruction in learning skills. There is also provision for more individual instruction in the form of additional office hours, instructor conferences, appointments with a Course Assistant, etc.

Cog Neuro of Consciousness

The study of consciousness is considered a fundamental scientific and philosophical pursuit. How does information processing in the brain generate experience? How do we objectively capture what is, by definition, a subjective event? As philosopher Colin McGinn puts it, how do we get from the water of the brain to the wine of consciousness? I have recently started a Center for Consciousness Science at the UM Medical School to help address these very questions.

As an educational activity and the Center (and as a NGP faculty), I am conducting a combined reading/lecture course (NS-704) this upcoming semester on "The Cognitive Neuroscience of Consciousness." The study of consciousness is sometimes decomposed into "levels of consciousness" (awake vs. asleep vs. anesthetized vs. comatose) and "states of consciousness" (assuming I am already conscious, why do I see a blue triangle rather than a red square?). We will explore both of these dimensions and likely have some visiting lecturers/discussants to help us along the way.

The subject of consciousness motivated many of us to choose the field of neuroscience. I hope you will join me next month as we explore a fascinating question that has scientific, philosophical, clinical, and even existential implications. Even if you don't want to formally sign up for the course, you are welcomed to attend and participate.

What: NS704, The Cognitive Neuroscience of Consciousness

Who: Neuroscience and psychology students (and other interested people)

When: Fall semester, Wednesdays at Noon (pizza will be served!)

Where: Medical School, Med-Sci I, 7th floor conference room (#7433D)

Ballet							
20965	P RW LAB 004	MW	10-11AM	DANCE STUDIO A	Wilson		
Modern							
Taught by dance students enrolled in DANCE 481.							
20966	P RW LAB 005	MW	10-11AM	DANCE STUDIO B	Torralba		
Performance & Social Justice							
This course will explore a variety of dance and performance-based practices that can be utilized as a means for peace building and social transformation. Through readings of case studies, group reflection and physical explorations, students will gain an understanding of how live performance can facilitate communication, action, and foster creatively supportive communities. This class will introduce basic skills to craft images and create movement, drawing from both dance and theater methods, including ritual play, improvisation, and cultural-based practices.							
20967	P W LAB 006	MW	10-11AM	DANCE STUDIO D	Beck		
Modern							
Taught by dance students enrolled in DANCE 571.

Modern Dance with Latino Influ							
Bienvenidos! (Welcome)! End your Tuesdays and Thursdays on a high note, at 4:10pm, dancing to the sounds of Latin American music such as Mambo, Merengue, Bolero, and Salsa; mixed with contemporary dance styles. Learn about the origins of these rich musical styles, broaden your knowledge and find new ways to identify with Central and South American music, poetry, literature and the visual arts.							
20971	P RW LAB 010	TTH	4-5PM	DANCE STUDIO B	Schiff

Modern							
21965	P W LAB 012	F	12-2PM	DANCE STUDIO B	Schiff		
Intro to Jazz							
In this class, we will begin with a jazz warm-up that includes principles of alignment, rhythmic and spatial awareness, musicality, flexibility and strengthening. We will continue with a 60-minute class focusing on Brazilian Zouk movement and technique and finish the class with a group practice session in which the instructor will be able to provide students with individualized coaching. By the end of the semester, students will have a solid grasp of Zouk foundations, begin to develop personal style, as well as have the skills to participate in Zouk social dances outside of the classroom. In addition to technique, students will learn about the history of this dance and Brazilian culture.

Euphonium-Baritone (EUPHBARI)

Flute (FLUTE)

Guitar (GUITAR)

111	Performance				2.00	ADVISORY	
32417	P W REC 001	TTH	230-330PM	2038 SM	Sukumaran		
Guitar 111 is for beginners - those who have never played guitar or who have very little experience. If you do not own a guitar one will be provided for you to use during the semester. This is not a class for intermediate or advanced guitarists with years of playing experience.							

The purpose of GUITAR 111 is to help students develop their guitar skills, with a primary focus on using the guitar as an accompaniment instrument. Right Hand skills covered will include finger picking, flat picking, and a variety of strumming patterns. Left Hand skills will include open chords, barre chords, melody chords, and basic scale patterns. Introduction to reading of standard music notation, guitar tablature, and chord symbols will be covered. Other topics that will be presented include improvisation, playing by ear, and using the capo for transposition.

Rhythmic Training

Jazz majors only. Sophomore and above. This course seeks to improve the musician's rhythmic acuity through training in three main areas: Time (ability to keep a steady beat and flow), Phrasing (how things are placed in time), and Feel (rhythmic nuance, swing, groove, pocket). Most coursework will be completed with exercises in singing and clapping, using standard Jazz repertoire.

Psychology of Music							
Music plays an important role in our lives, but how much do we actually understand about this powerful phenomenon? Psychology of Music is a course about the musical mind and musical behaviors. The purpose of this course is to examine musical phenomena in terms of mental functions and to study how people perceive, remember, create and perform music.

Comm Engage Urban Settings							
This course will examine issues related to performing and teaching within urban or underserved settings. Important issues such as race, ethnicity, socioeconomic status, poverty, culturally responsive pedagogy, and reciprocal community engagement will be discussed, with a focus on how performing and teaching can be tailored to better align with the needs of underserved communities.

<p>This course surveys the history of music theory in the eighteenth, nineteenth, and early twentieth centuries. Readings will be drawn from the writings of Rameau, Kimberger, C.P.E. Bach, Koch, Reicha, A. B. Marx, Fetis, Choron, Forster, Weber, Richter, Sechter, Hauptmann, von Oettingen, Helmholtz, Riemann, Hanslick, Louis and Thuille, Schoenberg, and Schenker. Significant general themes may include: the relationship between speculative and practical traditions, the institutional sites of music theory, interactions between theory, analysis, and composition pedagogy, the role of oral teaching traditions, the position of music theory in the academy, the scientific status of music theory, and the historiography of music theory. Course consists of a heavy reading load, three or four short writing assignments and a final oral exam.</p> <p>This experimental course is not a survey course in music history. Rather, it is a graduate seminar designed to enhance understanding and appreciation of early modern European and Latin American music. Through close listening, comparative listening, score study, analysis, and the study of primary sources, students will learn to recognize a selection of early modern genres and the conventions or codes understood by composers, performers, and audiences in selected times and places c.1500-- c.1750. We will learn something about performance practices while addressing such topics as the sacred and the profane, relationships between text and music, musical eroticism, music in culture, music for the stage, musical virtuosity, the patronage of music, and music as a vehicle for political discourse. We will engage with primary sources as often as possible to learn about the variety of sources and notational issues associated with each repertory we study. Depending on the enrollment, students may be offered projects focused on music or musical genres relevant to their own instruments or vocal types. The work of the course will involve assigned listening and musical study, as well as reading from material provided via library reserve or a course website. Grades will be based on class participation and written work. Open to graduate students, musicians, and others interested in early-modern culture, whether they are based in the SMTD, in LSA, or in other units.</p> <p>This experimental course is not a survey course in music history. The Art of Electronic Music							
The Art of Electronic Music: Explore the creation of electronic sound in ambient, EDM, experimental music, hip-hop, R&B, rock, and techno. Study the work of classic and contemporary artists and producers, including Bjork, J Dilla, Brian Eno, and Pauline Oliveros, to understand their use of sampling, looping, editing, sound synthesis, and production techniques, and to investigate the dialogue between artistic and technological innovation in electronic music.

The course is about the classical music traditions of North India, also known as Hindustani music. The first half of the course focuses on acquiring mastery over the basic musical materials of this idiom through singing, improvisation, and transcription exercises. The second half of the course builds on these skills to theorize about and analyze aspects of North Indian classical pitch (i.e. raga) and rhythmic (i.e. tala) structure, form,

Writing on Musical Form

This course will focus on the analysis of form and how we write about it. We will seek to move beyond taxonomic description and toward a consideration of how we can capture in prose what we hear in terms of the work's dynamic. We will be guided by texts including Erwin Stein's "Form and Performance." Repertoire under examination will likely center on Bach's inventions and Beethoven's piano sonatas.

This course surveys the history of music theory in the eighteenth, nineteenth, and early twentieth centuries. Readings will be drawn from the writings of Rameau, Kirnberger, C.P.E. Bach, Koch, Reicha, A. B. Marx, Fetis, Choron, Forster, Weber, Richter, Sechter, Hauptmann, von Oettingen, Helmholtz, Riemann, Hanslick, Louis and Thuille, Schoenberg, and Schenker. Significant general themes may include: the relationship between speculative and practical traditions, the institutional sites of music theory, interactions between theory, analysis, and composition pedagogy, the role of oral teaching traditions, the position of music theory in the academy, the scientific status of music theory, and the historiography of music theory. Course consists of a heavy reading load, three or four short writing assignments and a final oral exam.

Latina/o Theatre for Social Ch meet together with RC 334.004							
Artistic practice in prisons has occurred since the inception of prisons themselves, though popular thought tends not to connect the idea of the arts with that of criminal justice systems. This course surveys the history of performance in prisons through the examination of plays written by and about prisoners as well as narratives, which chronicle the process of creating theatre in prisons. More importantly, the course also requires all enrolled students to enter an adult prison once a week throughout the semester to lead a theatre workshop with prisoners. Students will be placed in pairs to facilitate workshops, and each workshop will hold a performance at the end of the semester. Students and prisoners together create social change through their performances, both by bringing two disparate communities (i.e. undergrads and prisoners) into meaningful interaction and also by using theatre to explore significant social issues.

Image of the American Family Meets with RCHUMS 282.001							
In this four credit drama course students will explore major American plays of the 20th century through the process of text analysis through performance. We will work on plays by major writers such as Arthur Miller, Tennessee Williams, Lorraine Hansberry, Sam Shepard and Tony Kushner. For each play we will discuss dramaturgical background, script and character analysis and put scenes on their feet for constructive critique. Written assignments will center on a journal which will include a series of actor's explorations of motivations and actions. Students will also be responsible for writing critiques of two productions. The course culminates in a public performance of a cutting of a major play, most likely Tony Kushner's "Angels in America."

The FLINT project							
This course will explore Documentary Theatre as a genre and its connection to Applied Theatre, exploring the creation of art- with and about different communities. Students will be required read documentary plays and scholarship tied into the pedagogy related to the process. Furthermore, students will be required to field work and travel to Flint, MI as part of the course to assist in the creative process of the FLINT,mi play that will be created by the instructor and produced by the Department of Theatre during the 2018/19 academic year.

Community Development Finance								
Taught by Dudley Benoit Towsley Policymaker in Residence, Director of Community Development Investments at								

Santander

Mr. Benoit joined NJCC's Board in 2001 and currently serves as Board Chair and Credit Committee Chair. A nationally recognized expert on community development financial institutions (CDFIs), Mr. Benoit currently serves as Director of Community Development Investments at Santander. Mr. Benoit previously held the position of Senior Vice President and Regional Sales Manager on Chase's Commercial Term Lending team, where he leads the multifamily lending business in the Boston, Philadelphia, and Washington, D.C. markets. Prior to assuming his current position, Mr. Benoit spent five years managing the Intermediaries Lending group in Chase's Community Development Banking unit, where he worked closely with many community development financiers. Mr. Benoit also previously managed JPMorgan Chase's New Markets Tax Credit program. Mr. Benoit holds an MBA from Columbia Business School, a Master of Public Policy from the University of Michigan's Gerald R. Ford School of Public Policy, and a BA from Rutgers University-New Brunswick.

Detroit's Grand Bargain

Taught by editorial page editor of The Detroit News Nolan Finley

A look at the unique deal that settled Detroit's municipal bankruptcy. Foundations, corporations, foundations and governments stepped out of their normal operating boundaries to craft an \$800 million agreement that allowed Detroit to move out of Chapter 9 without a fire sale of its assets or sacrificing its pensioners. The class will examine the part played by each of the principles, and how the experience in Detroit changed the way collaborations between government, foundations and the business community will work in the future. Class will feature guest appearances by and video-taped interviews with many of those involved in the Grand Bargain. It is taught by Nolan Finley, editorial page editor of The Detroit News, who covered bankruptcy.

Class will be held from October 23 - December 11

UM: Past, Present, Future

In 2017-2018, the University of Michigan will celebrate its Bicentennial, two hundred years of leadership in American higher education. The study of Michigan's history its current challenges, opportunities, and responsibilities, and its future possibilities illustrates not only many of the key policy issues that have shaped American higher education but also suggests those that will challenge both the University and the nation in the years ahead. This course will consider the University as an exemplar both of the evolution of higher education and the forces that will shape it in the future. Included will be subjects such as the cost, price, and value of a college education (e.g., who benefits, who pays), the ability to serve an increasingly diverse population, and the critical role of university research in determining the prosperity, security, and public welfare of the nation. Current issues such as student activism, diversity, faculty tenure, the financing of higher education, college sports, and the political environment characterizing higher education will be considered. Of particular importance will be a consideration of the future of the university, considering issues such as changing demographics, globalization, and the rapid evolution of key technologies such as cyber infrastructure, artificial intelligence, and gene editing, again using the University of Michigan as a case study.

Psychology of Climate Change

Climate change often feels like a problem that our brains have been hardwired to ignore. Climate change is abstract and complex, making it hard for non-scientists (including policy-makers) to understand. For most Americans, it is a problem that will harm people who are far away in time and geography. And the significant political polarization surrounding climate change has turned it into a form of identity politics. Yet like so many environmental problems?from habitat destruction to overconsumption of natural resources?climate change is the result of human behavior. If we want to solve or mitigate these problems, we must first understand what is driving these beliefs and behaviors.

Most policy to address environmental issues such as climate change has focused on legal or economic tools such as prohibiting certain forms of pollution or giving subsidies for renewable energy. In this discussion-based policy seminar, we will examine an alternative framework for motivating environmentally-friendly behavior: psychological and social incentives. We will explore factors affecting climate change beliefs and related behaviors, including reactions to and support for policies. The focus will be primarily on the US, and we will discuss policy programs and private interventions that have incorporated social psychological research to promote climate change mitigation as well as potential new applications of this research. Although this class will mainly cover climate change and other environmental issues, the psychological tools we will discuss are used in other domains as well, so will be useful to students interested in a range of policy topics.

26482 P RW SEM 306 TH 6-9PM 1230 WEILL Ruff

This course examines the interaction of politics and policymaking at the state level. It examines issues such as the role of lobbyists, the impact of campaign and election reforms, and the relationship between state governments and other levels of government.

32041 P RW SEM 307 TTH 230-4PM 1220 WEILL Leiser

Tax Policy

Oliver Wendell Holmes famously said that "Taxes are what we pay for civilized society," but who should pay and how much? In this course, we will develop the tools of policy analysis and economics to engage in several current debates in tax policy at the local, state, federal, and international levels. Examples include:

- Carbon taxes, soda/sugar taxes and other sin taxes--What are the pros and cons?
- "Economic development wars"--Should states and local governments use big tax breaks to lure businesses?
- "Amazon tax"--Should Amazon and other online retailers have to collect state and local sales taxes? States are losing hundreds of millions of dollars and brick and mortar stores argue that online retailers have an unfair

CAT#	Course Title	CR	PREREQ	LAB FEE	
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR

advantage.

- The "Buffet Rule"--How much do the rich pay in taxes and how much should they pay?
- The "Double Irish Dutch Sandwich" and other strategies to use international tax havens--What is being done? What should be done?

Students will prepare short writing assignments and engage in mock debates on policy issues. The major project in the class will be the development of a white paper on a topic of choice.

Higher Ed Policy

Higher Education and Public Policy --- This course will examine the higher education sector from several different angles, but with an emphasis placed on the economic issues. Topics include the benefits of higher education, government's interest in promoting it, and various policies that impact access, persistence, and affordability, and accountability. Policies examined include financial aid, affirmative action, state and federal funding, regulation of the for-profit sector, and many others.

STATS 250 must be completed prior to enrolling in this course.

Facilitating Dialogue

This is a short introductory course module in facilitating complex and difficult dialogic moments of engagement in the social, professional and institutional spheres of the public arena. Its purpose is to provide the possibility for actual engagement with tense social issues and phenomena bedeviling complex societies. It will briefly explore the historical and theoretical contexts, which give rise to sometimes painful and traumatic moments that filter in and color what may otherwise be perceived as simplistic conversations and interactions. It will introduce students?regardless of perceived color, gender, class, or ethnic identity categorization?to the necessity for transcending their subject locations. In order to facilitate, mediate, and engage in trans-formative moments of learning, dialogue, leadership and communal capacity building with due regard of difference and the respect of mutuality.

Evaluating Public Policies

This course is restricted for Ford School Seniors enrolled in the BA Program and that have completed STATS 250.

This 3-credit course will provide an introduction to the fundamentals of evaluation research design and methods as applied to public policies and programs. The course will cover the role of evaluation in the public policy process, and both process and summative evaluation research, including research designs for establishing causal inference between exposure to public policies/programs and outcomes. Students will gain skills in understanding and crafting research designs common in public policy evaluation, including randomized controlled trials, quasi-experimental designs and time series designs. Students will also gain skills in understanding/critiquing published public policy evaluation literature, measurement/data collection methods, and basic statistical methods for analyzing evaluation data. Class format will include lecture, discussion of case studies, and small group applied exercises.

This course will help build your research/analysis skills

Senior Seminar in Applied Pol

This course offers senior public policy students an opportunity to conduct a policy analysis project in an area of their interest. Each student will identify a policy outcome of personal interest, and analyze strategies to

CAT#	Course Title	CR	PREREQ	LAB FEE	
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR

advance that outcome. The student will complete a major project that makes informed recommendations to real world policy organizations and actors about how to make progress toward the desired policy outcome. This course is designed for senior Public Policy majors. Others may enroll only with the permission of the instructor.

Topics to be covered:

Identifying a policy outcome and question of interest; Constructing a range of sensible policy options; Understanding what works under various circumstances; Identifying the key policy actors who can contribute toward better outcomes; Evaluating different kinds of evidence about the effectiveness of policy options; Assessing potential barriers to improving policy outcomes; Ethical issues that arise in policy analysis; Communicating recommendations to a policy audience.

510 Politics of Pub Pol **3.00**
 24360 PDR REC 001 TTH 1-230PM 1120 WEILL Kabo, Mullen

This is a core course restricted to Ford School students only

This section of 510 aims to help you better understand policy analysis and the political environment within a context of American domestic politics at the national level.

Policy analysis is a discipline that brings systematic thinking and social scientific evidence to bear on substantive problems. The premise of this course is that policymakers seldom value that analysis as much as we do. Many are skeptical about what social science can contribute to solving public problems, often rightly so. Others see policy analysis as material to be deployed selectively and strategically in political battles fought on other terms. In today's highly partisan, often hyperbolic politics, bringing reason and evidence to bear on public problems is more challenging than ever.

By the end of the course, you will understand the political environment in which policy specialists operate: the participants who shape policy within particular domains; the ways in which they perceive problems and solutions; the information, interests, and ideologies likely to govern their actions; the strategies they use; and the institutional arrangements and processes that shape their behavior and constrain their decisions. A final but important purpose of the course is to help you work on your writing and, to a lesser extent, your oral communication skills.

21925 PDR REC 002 TTH 830-10AM 1220 WEILL Lin, Kretman

This is a core course restricted to Ford School students only

This section of 510 follows the policymaking process after legislators claim credit and the TV cameras shut down: the work of trying to implement and interpret the law. In the United States, this process is guided by the executive branch, through rulemaking, and the judicial branch, through oversight. But as we will see, neither of these two branches of government operate in isolation from each other, from Congress, or most importantly, from the democratic process. This extent to which bureaucracy and the courts are insulated or open to public influence, and the channels through which that influence occurs, explain a large part of what happens on the ground in the United States. It also serves as a key point of contrast in understanding how policymaking in other countries compares to the United States.

This course examines the nature, extent and causes of poverty and inequality in the US relying on a multidisciplinary literature from sociology, political science, economics, and psychology. The large number of anti-poverty programs that have been tried in the last 30 years underscores the extent of disagreement about the causes of poverty, the situation of the poor, and the role of the government in encouraging income redistribution and social change. This course will explore the problem of poverty, theories of poverty and the implications that these theories have for public policies targeting poverty. We will study issues related to topics such as housing and neighborhoods, structural economic changes like wages and inequality, families and social norms, and mass incarceration to consider how these issues generate and reproduce poverty, lack of opportunity, and inequality.

UM: Past, Present, Future

In 2017-2018, the University of Michigan will celebrate its Bicentennial, two hundred years of leadership in American higher education. The study of Michigan's history its current challenges, opportunities, and responsibilities, and its future possibilities illustrates not only many of the key policy issues that have shaped American higher education but also suggests those that will challenge both the University and the nation in the years ahead. This course will consider the University as an exemplar both of the evolution of higher education and the forces that will shape it in the future. Included will be subjects such as the cost, price, and value of a college education (e.g., who benefits, who pays), the ability to serve an increasingly diverse population, and the critical role of university research in determining the prosperity, security, and public welfare of the nation. Current issues such as student activism, diversity, faculty tenure, the financing of higher education, college sports, and the political environment characterizing higher education will be considered. Of particular importance will be a consideration of the future of the university, considering issues such as changing demographics, globalization, and the rapid evolution of key technologies such as cyber infrastructure, artificial intelligence, and gene editing, again using the University of Michigan as a case study.

Psychology of Climate Change

Climate change often feels like a problem that our brains have been hardwired to ignore. Climate change is abstract and complex, making it hard for non-scientists (including policy-makers) to understand. For most Americans, it is a problem that will harm people who are far away in time and geography. And the significant political polarization surrounding climate change has turned it into a form of identity politics. Yet like so many environmental problems?from habitat destruction to overconsumption of natural resources?climate change is the result of human behavior. If we want to solve or mitigate these problems, we must first understand what is driving these beliefs and behaviors.

Most policy to address environmental issues such as climate change has focused on legal or economic tools such as prohibiting certain forms of pollution or giving subsidies for renewable energy. In this discussion-based policy seminar, we will examine an alternative framework for motivating environmentally-friendly behavior: psychological and social incentives. We will explore factors affecting climate change beliefs and related behaviors, including reactions to and support for policies. The focus will be primarily on the US, and we will discuss policy programs and private interventions that have incorporated social psychological research to promote climate change mitigation as well as potential new applications of this research. Although this class will mainly cover climate change and other environmental issues, the psychological tools we will discuss are used in other domains as well, so will be useful to students interested in a range of policy topics.

Tax Policy

Oliver Wendell Holmes famously said that "Taxes are what we pay for civilized society," but who should pay and how much? In this course, we will develop the tools of policy analysis and economics to engage in several current debates in tax policy at the local, state, federal, and international levels. Examples include:

- Carbon taxes, soda/sugar taxes and other sin taxes--What are the pros and cons?
- "Economic development wars"--Should states and local governments use big tax breaks to lure businesses?
- "Amazon tax"--Should Amazon and other online retailers have to collect state and local sales taxes? States are losing hundreds of millions of dollars and brick and mortar stores argue that online retailers have an unfair advantage.
- The "Buffet Rule"--How much do the rich pay in taxes and how much should they pay?
- The "Double Irish Dutch Sandwich" and other strategies to use international tax havens--What is being done? What should be done?

Students will prepare short writing assignments and engage in mock debates on policy issues. The major project in the class will be the development of a white paper on a topic of choice.

Connected/Autonom Vehicle Tech

Connected and Autonomous Vehicle Technology: Business and Regulatory Issues

This course is one of four interdisciplinary problem solving courses offered at the Law School in fall 2017. Graduate and professional students in business, economics, engineering, information, law, and public policy are eligible to take this course.

This problem solving course will challenge an interdisciplinary team of students to address a real-world problem in the rapidly evolving connected and autonomous vehicle landscape. The Detroit Metro area and the University of Michigan are leading the world in researching and deploying technological advances in vehicle connectivity and automation. The potential benefits of "driverless cars" are widely understood, but the path to getting from the current state of human driving to a world of interconnected and self-driven vehicles entails an overwhelming confluence of technological, legal, regulatory, political, and business issues. This course will focus on one particular problem -- the coordination of intellectual property rights, business assets, and technological standardization by industry and governmental stakeholders. Classes will be run as discovery sessions with industry, governmental, and academic experts. Students working in interdisciplinary sub-teams will dive deeply into particular aspects of the problem, and the course culminates in the creation of an integrated class deliverable in the form of a business or operational plan proposing concrete solutions.

Economic Integration for Individuals in the Refugee Resettlement Program

This course is one of four interdisciplinary problem solving courses offered at the Law School in fall 2017. Graduate and professional students in business, economics, law, public policy, and social work are eligible to take this course.

Both refugees and foreign national victims of human trafficking are eligible for refugee resettlement benefits. How can these benefits be optimized to increase individual economic empowerment and economic development for the communities in which these individuals are resettled? This course will develop innovations to facilitate the economic integration of refugees and victims of human trafficking both during and after the resettlement process. These innovations may include educational programs to help these individuals start businesses or find employment, matching services to help them find entrepreneurship or career development mentors, funding or microfinance options to help them fund new businesses, or legal assistance to secure the documents necessary to obtain employment or start a business.

Housing America's Working Poor
Stable and Integrated Housing for America's Working Poor

This course is one of four interdisciplinary problem solving courses offered at the Law School in fall 2017. Graduate and professional students in architecture and urban planning, business, law, sociology, public health, public policy, and social work are eligible to take this course.

Working as a group with guidance from the instructors, students will design an interdisciplinary, comprehensive plan to address the unavailability of affordable, stable, and integrated housing for working poor people in the United States. We will focus on innovative, community-based solutions to this problem. Students will work collaboratively across disciplines to create a coherent plan to present to a hypothetical client such as a local, state, or federal governmental agency or a foundation. Class sessions will focus heavily on presentations or interviews with experts. Students also will be expected to spend significant time outside of class working in teams to reach out to relevant stakeholders, conduct research, draft documents, and otherwise work toward the creation of the plan. Although students will be broken into teams and assigned different projects, the class as a whole will work as a team to create a single interdisciplinary plan. Through active participation in the course, students will learn how to solve a social problem through analysis of best practices across a variety of disciplines, work effectively with members of a team, and generate policy.

ID'ing Human Traff Victims
Identifying Victims of Human Trafficking within Health Care Settings

This course is one of four interdisciplinary problem solving courses offered at the Law School in fall 2017. Graduate and professional students in dentistry, law, medicine, nursing, public health, public policy, and social work are eligible to take this course.

It is estimated that up to one third of all victims of human trafficking come into contact with a health care provider during their trafficking and are unrecognized. Health care settings offer a unique opportunity to identify victims of human trafficking and connect them with services and support. In a collaborative, multidisciplinary setting, students will develop innovations to increase the identification of victims of human trafficking in health care settings.

Facilitating Dialogue

This is a short introductory course module in facilitating complex and difficult dialogic moments of engagement in the social, professional and institutional spheres of the public arena. Its purpose is to provide the possibility for actual engagement with tense social issues and phenomena bedeviling complex societies. It will briefly explore the historical and theoretical contexts, which give rise to sometimes painful and traumatic moments that filter in and color what may otherwise be perceived as simplistic conversations and interactions. It will introduce students to regardless of perceived color, gender, class, or ethnic identity categorization to the necessity for transcending their subject locations. In order to facilitate, mediate, and engage in trans-formative moments of learning, dialogue, leadership and communal capacity building with due regard of difference and the respect of mutuality.

Leadership

Taught by MPP Alumni, Dan Duckworth.

This course presents students with a set of unconventional assumptions about leadership, change, power, and institutions/organizations and invites them to internalize these assumptions through active experimentation and reflection. In other words, the objective is not to learn about leadership. It is to learn to lead. The course will draw on principles and frameworks emanating from the Ross School's Center for Positive Organizations and Harvard's

Center for Public Leadership. Students will explore purpose, climate, authenticity, appreciative inquiry, positive deviance, and emergence as transformational levers of leadership in public policy, communities and organizations. More importantly, the course will invite students to experiment with these levers as individuals and as a group and to mine the ensuing data for meaningful insights. Students will emerge from the semester having clarified and emboldened their own theories of leadership.

Econ Develop in Persian Gulf

The Persian Gulf is characterized by countries whose economies are built around a valuable natural resource, oil. In political science and international relations theory, countries like this are known as "rentier states": states which derive all or a substantial portion of national revenues from the rent of indigenous resources to external clients. The course uses cases from the Gulf, and particularly Oman, to illustrate both general features of rentier states and the importance of understanding the special dynamics of individual states and regions. The first half of the course will use The Rentier State by Hazem Beblawi (2016) to examine the interrelationships of the economic base with cultural, social and political structures created to manage natural resources. In the second half of the course, cases from Oman will be used to apply the concepts covered in in the first half of the course to labor and employment policy, social policy, foreign direct investment (FDI) , and government structure and spending. Students' assessments are based on one in-class exam and two case analysis reports.
