Engineering Astrophysics Engineering Solutions to Astrophysical Problems								
<p>The space age has transformed our understanding of the Universe. Just within the last few decades we have measured the age of the Universe and shown that the rate of expansion is accelerating, seen ten million degree solar flares rip through our Sun's atmosphere, discovered liquid water oceans on icy moons of Jupiter and Saturn, and detected thousands of planets orbiting other stars. These advances are all made possible through ever more capable spacecraft, either orbiting Earth as remote observatories, or directly exploring objects in our solar system and beyond. This class is for anyone interested in the intersection between the scientific problems we address with large space missions and the engineering solutions that are needed make these technical marvels possible. The course is geared to advanced undergraduates with exposure to thermodynamics, statistics, and simple differential equations. Material covered will include the Voyager interstellar mission, Hubble and the expansion of the Universe, planet hunting with Kepler, the Solar Probe Plus mission to the atmosphere of our Sun, and the exploration of the water oceans of the Jovian moon Europa. Coursework consists of homework assignments, short reading assignments before lectures, and a semester long project to design a new mission.</p>

### Chemical Engineering (CHE) Open Sections

--MANY COLLEGE OF ENGINEERING COURSES REQUIRE STUDENTS NOT ENROLLED IN BUSINESS ADMINISTRATION OR ENGINEERING (INCLUDING CCS MAJORS) TO PAY A \$115-207 COMPUTER USER FEE. THIS IS A SPECIAL FEE, TO BE PAID ONLY ONCE EACH TERM, AND IS IN ADDITION TO THE INFORMATION TECHNOLOGY ACCESS FEE PAID BY FULL TIME STUDENTS AS PART OF THEIR REGULAR FEE ASSESSMENT. YOU WILL BE INFORMED ON THE FIRST DAY OF CLASS WHETHER OR NOT YOUR CLASS IS SUBJECT TO THIS FEE.

The goals of this course are to help students hone and enhance their problem solving, critical thinking, creative thinking, and troubleshooting skills and to ease the transition from college to the workplace. Topics include structured critical reasoning, Kepner-Tregoe analysis, Duncker Diagrams, vertical and lateral thinking and Futuring. The students will work in teams to apply the principles they learn in the course to work with a local business to find and solve problems in their operations. The graduate course (ChE 598) will also require of prospectus of a potential client for the next course offering. The course syllabus can be obtained by sending an email message to lauradb@umich.edu

Business Water Risk				
Business Water Risk: Ripple Effects from Watersheds to the Capital Markets				
This 7-week course presents an overview of how water has impacted risks to businesses and their supply chains, and how corporate financial managers and institutional investors are starting to incorporate risks in their accounting and asset allocations. Corporate water risk exposure is a function of three variables: 1) company/sector-specific characteristics (e.g. water intensity of production), 2) the water conditions in particular geographies (e.g. drought-prone or strictly regulated), and 3) the strength of corporate management (e.g. proactive vs. reactive) in mitigating risks. The challenge is how the information from the physical world is translated in the financial world, and vice versa. It is often perceived that the proper risk management strategy for water in a corporate context is technology-based (new supply, recycling, monitoring, etc.). The course will describe how capital commitments for technology and infrastructure are often a last resort, because they are expensive, long-term, and often their cost cannot be passed on to the consumer. Short-term, financial risk management is preferred, such as hedging and insurance strategies. This course will explore corporate water risk and financial response strategies, and discuss commercial tools available to sustainability, corporate and financial managers. This include corporate water footprinting, regional asset risk mapping (Aquaduct), corporate operational risk assessment (Water Risk Monetizer), and financial asset risk signaling (WaterBeta).

	Greenhouse Gas Control This course presents a review of strategies for the reduction of greenhouse gas (GHG) emissions in power generation, transportation, and the built environment. Sources, discharges, and physical properties of GHGs are surveyed, and technologies for GHG elimination or sequestration are discussed. Policy options for GHG control are considered.

	Decentralized Water Supply Decentralized Water Supply, Hygiene, and Sanitation This course provides an introduction to decentralized approaches to water access and treatment that results in providing access to drinking water and sanitation. The class will cover the risks associated with poor water quality (waterborne pathogens and chemicals); appropriate physical, chemical, and biological process technologies for decentralized deployment; social factors; and consideration for resource recovery, sustainability, public policies and environmental justice, and economic models including privatization.

	Structural Fire Engineering Structural Fire Engineering This course provides an overview of methods for the design and analysis of structures under fire hazards. Topics include: fire models for structural applications, conduction heat transfer analysis, response of materials at elevated temperatures, local and global structural responses, prescriptive and performance-based design approaches. The course will rely on finite element analysis; it must therefore be accompanied or preceded by CEE 510 (or equivalent).

	Infrastructure Systems Optimiz Infrastructure Systems Optimization This class is to prepare students with the systems-level approach to the analysis and design of civil infrastructure systems. The fundamental concepts associated with the course are taught through a series of examples drawn from the various aspects of civil infrastructure systems applications. The examples build upon each other to provide a comprehensive overview of practical approaches to goal-oriented problem formulation and solution while giving the student a fundamental understanding of principles that can be used to facilitate decision making. Optimization techniques that will be discussed in this class include linear programming formulations and solution algorithms, multi-objective optimization, integer optimization, network models, and nonlinear programming.

Environmental Finance Environmental Finance: Financial Innovations for Green Growth Environmental Markets, Sustainable Investment, and Financial Technology. This course will review innovations in processes, investment mandates and financial basics of the key pillars of Environmental Finance across all asset classes and investment vehicles. It will examine how established practices, procedures and tools from within the mainstream financial market are being adapted to integrate ESG criteria, in the pursuit of financial performance goals from both an investor and corporate perspective. The course will further explore how new entrepreneurial ventures are starting to disrupt the environmental finance environment.

## Electrical Engineering And Computer Science (EECS) Open Sections

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE ELECTRICAL ENGINEERING AND COMPUTER SCIENCE DEPARTMENT MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND THE FIRST WEEK OF LECTURES AND LABS/DISCUSSIONS (AS APPROPRIATE) FOR ANY EECS COURSES.

AT THE SAME TIME, THE EECS DEPARTMENT IS NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

Business Thought and Action --- This course introduces students to business. In this course we foster development of the key skill of learning via reflection on one's own experience. The course will rely heavily on examination of individual organizations or industries from which generalizations can be made. Specific situations will be selected to convey the excitement of business situations, the role of business in society and the global scope of business. The primary purpose of this class is to educate students about the broad range of problems and opportunities that businesses face and the tools and skills that are necessary to face them. A secondary purpose is to show the students the richness of business activity by 'peeling back the onion' via case discussions of situations and companies they have experienced in their lives. Students will gain familiarity with different kinds of information resources: from trade magazines to mass market books to research journals.

Hardware/Coding, IoT

Entrepreneurial Design is a cross-disciplinary course and lab for current and potential entrepreneurs, designers, hackers, makers, founders, and doers. The focus is on learning to hack things together and experience the fun of building, with minimal technical mumbo-jumbo.

Intro to Entrepreneurial Design has three lab sections. In these sections, you will dive in and gain hands-on, direct experience in designing and building physical and digital prototypes, expanding on lessons learned in the lecture part of the course. You MUST take one of these sections in addition to the main lecture to get full credit for the course.

Section 8: Hardware/Coding Internet of Things, ENTR 390.008

Digital Product Design

Digital Product Design is an introduction to the fundamentals of designing products for digital platforms. This course was created by UM students and will be taught by practicing designers working at FarmLogs.

In this course, students will learn how to:

- Use design thinking to discover problems worth solving, generate and prototype solutions, and test them with real users
- Design your own products by creating wireframes, interactions, and visual designs
- Use typography, color, shape--and industry-standard tools like Sketch, Invision, etc--to build designs that are attractive, simple, and functional
- Solicit constructive feedback, critique design work, and substantiate your criticism
- Discuss topics in the design world, including usability, user experience design, user interface design, and design research

Intended Audience:

This is an introductory course for students studying engineering, art and design, and liberal arts--or anyone interested in making effective digital products.

Format:

- Weekly lectures with optional work sessions where students can hang out and work with instructors, classmates, and others in the Ann Arbor design community.
- Weekly small design assignments with a final product project at the end of the semester.

TechLab MCity

TechLab at MCity Independent Study

The TechLab Independent Study class will be participating in sponsor company projects that advance their technology development. Each student team, divided by sponsoring company, will be responsible for accomplishing an open-ended project (assigned by the company), and gain experience in developing cutting edge technology at an early stage startup.

The core rationale for the TechLab initiative is to provide students with a hands-on learning experience working with applied science in the process of progressing from the lab to full commercialization. This independent study provides a unique opportunity to not only explore coursework outside of a dedicated CoE program but also have direct contact and to work alongside peers, colleagues, and faculty across multiple disciplines.

=====

**Creativity & Design - Strategies for Innovation**

The course is a hands-on, interactive, immersion into personal creativity and the design thinking process. Using tools for self-awareness, discovery and curiosity, the course will explore how people, places and practices foster human creativity. Students will discuss: What is creativity? How can a person become more creative? In order to become more creative, students must be willing to look within themselves and share what they find. The design thinking portion of the course will include a team assignment exploring problem framing and solution analysis, as well as storytelling practices via presentations at the end of the semester.

The course's objectives for its students will be:

- A paradigm shift- to learn about other ways of thinking and principles that can pivot their approach to viewing and reacting to the world.
- Defining creativity- to create a working definition so that the students can achieve a clearly identified goal.
- ID your personal creative style via discovering what you are most enthusiastic about and what types of endeavors make you excited to create.
- Discuss methods and approaches that contribute to individual, team and organizational creativity- how you can bring down barriers to creative thinking and the importance of attitude and positive affirmations.
- Develop a skill set and program of continuing study and practice that develops creative mentors, practices and environments.
- Gain confidence in your creative talent.
- Learn the importance of consumer / audience qualitative research and understanding in the design process.
- Develop a working knowledge of the design thinking process.
- Practice problem framing and solution analysis to help with organizational design.
- Learn how to apply the design thinking process to build solutions and innovations.
- Expand creative ability and increase productivity and happiness by learning about obstacle removal in creative practice.
- Explore team building exercises and processes with the hope that there will be a resulting change in attitude--that our thoughts and actions are not in isolation. Partnership and community are critical to both creative living and design success.

Greenhouse Gas Control  
Greenhouse Gas Control  
This course presents a review of strategies for the reduction of greenhouse gas (GHG) emissions in power generation, transportation, and the built environment. Sources, discharges, and physical properties of GHGs are surveyed, and technologies for GHG elimination or sequestration are discussed. Policy options for GHG control are considered.

Develop & Verify Systems Reqmts  
Data collection and analysis techniques for developing and verifying system design requirements are studied: identifying, quantifying and prioritizing stakeholder objectives, minimizing test procedures cost, validation vs. verification, and limited vs. mass production strategies. Course work includes a term project. Knowledge of introductory statistics is required.

This course will be taught in a team based/project based manner without formal exams or a final. There will be annotated reading assignments due at each class and we will use formative based assessments (like quizzes) at least 6 times during the term. Homework will be not be graded for accuracy but rather for effort and honesty in written reflections. There will be two projects this term that are focussed on characterization techniques. Advanced Ceramics. This course will survey the status of a series of high profile topics including recent progress in the use of ceramics in energy production and storage including lithium batteries, thermoelectric materials, fuel cells, photovoltaic and related electronic devices, ceramic composites for new GE jet engines, prosthetic devices (knee and hip implants). It will also cover bottom up processing or atomic level assembly using gas and liquid phase processing and the use of nanopowders in processing in the above subject areas. ## Physical Education (PHYSED) Open Sections

NOTE - ENROLLMENT NOT GUARANTEED FOR STUDENTS OTHER THAN KINESIOLOGY MAJORS. ATTENDANCE AT FIRST CLASS IS MANDATORY TO RESERVE YOUR PLACE IN CLASS

NOTE - COURSES 140, 141, 142, 145, AND 349: CONTACT THE U-MOVE OFFICE (764-1342 OR U-MOVE@UMICH.EDU) FOR CLASS TIMES AND REGISTRATION INFORMATION.

140	Beginning Swim	1.00			
13768	PD LAB 001 MW	7-8PM	ARR	10	Y
Class will be held in the CCRB Margaret Bell Pool.					
Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu. Little or no swim experience? This course is for you. You'll start with entering the pool and getting comfortable. You'll progress to front crawl, back crawl, elementary backstroke, breaststroke, sidestroke, and butterfly. And you'll learn jumping in, treading, and water safety. Goal: one length of the pool. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.

# Literature, Science & the Arts

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND:

- THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES;
- EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES;
- THE FIRST TWO MEETINGS OF HISTORY 396 AND 397;
- EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES;
- THE FIRST TWO MEETINGS OF COURSES IN OTHER SUBJECTS.

AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

## English Language Institute

### English Language Institute (ELI) Open Sections

ELI courses fall into three categories:

1. English for Academic Purposes courses for graduate students;
2. Language and teacher training courses for international GSIs;
3. Teacher training courses for students planning to teach ESL in local communities or abroad.

For assistance in choosing an appropriate course, please go to the ELI Academic Advising website: <http://bit.ly/eliadvising> or e-mail: [eliadvisor@umich.edu](mailto:eliadvisor@umich.edu) to make an appointment to speak with an advisor.

To enroll in this course, students need to:								
1. Submit a portfolio. Portfolios should be submitted directly to the instructor of each section. For priority consideration, portfolios should be submitted no later than 5pm on Friday, March 24, 2017. Students should receive notification of their acceptance (or not) no later than Tuesday, March 28, 2017.								
2. Students are encouraged to consider a second-choice section (where available) as a potential back-up, and make contact with that instructor.								
Note: Students who are currently a declared creative-writing minor or English sub-concentrator will receive alternative enrollment instructions. Creative-writing minors and English sub-concentrators are not required to submit a portfolio for review.

## History Department

### History (HISTORY) Open Sections

--IT IS CRITICAL THAT STUDENTS ATTEND CLASS FROM THE BEGINNING OF THE TERM. ALTHOUGH STUDENTS MAY BE OFFICIALLY REGISTERED FOR A COURSE, THE DEPARTMENT MAY DISENROLL ANY STUDENT NOT ATTENDING THE FIRST TWO COURSE MEETINGS.  
 --DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE.  
 --STUDENTS ARE ENCOURAGED TO USE THE WAITLIST FOR ANY CLOSED COURSE. STUDENTS SHOULD REGISTER ON THE WAITLIST ACCORDING TO PREFERRED SECTION AND ATTEND THE FIRST CLASS. UP TO THE FIRST DAY OF CLASS, OVERRIDES WILL BE GIVEN BY THE DEPARTMENT AS SPACE BECOMES AVAILABLE. STUDENTS ARE NOTIFIED AND GIVEN TWO DAYS TO USE THE OVERRIDE, AFTER WHICH THE SPOT MAY GO TO AN ALTERNATE STUDENT ON THE WAITLIST. ONCE CLASSES HAVE STARTED, STUDENTS (WAITLISTED OR NOT) MUST CONTACT THE INSTRUCTOR FOR AN OVERRIDE.

This lab is a CSP lab. CSP sections are scheduled for more hours per week than a routine section of the same course. Some of that time is devoted to workshop activities, e.g., problem solving, practice tests, review of assignments and instruction in learning skills. There is also provision for more individual instruction in the form of additional office hours, instructor conferences, appointments with a Course Assistant, etc.

Psychology of Music								
Music plays an important role in our lives, but how much do we actually understand about this powerful phenomenon? Psychology of Music is a course about the musical mind and musical behaviors. The purpose of this course is to examine musical phenomena in terms of mental functions and to study how people perceive, remember, create and perform music.

This course surveys the history of music theory in the eighteenth, nineteenth, and early twentieth centuries. Readings will be drawn from the writings of Rameau, Kirnberger, C.P.E. Bach, Koch, Reicha, A. B. Marx, Fetis, Choron, Forster, Weber, Richter, Sechter, Hauptmann, von Oettingen, Helmholtz, Riemann, Hanslick, Louis and Thuille, Schoenberg, and Schenker. Significant general themes may include: the relationship between speculative and practical traditions, the institutional sites of music theory, interactions between theory, analysis, and composition pedagogy, the role of oral teaching traditions, the position of music theory in the academy, the scientific status of music theory, and the historiography of music theory. Course consists of a heavy reading load, three or four short writing assignments and a final oral exam.

selected times and places c.1500-- c.1750. We will learn something about performance practices while addressing such topics as the sacred and the profane, relationships between text and music, musical eroticism, music in culture, music for the stage, musical virtuosity, the patronage of music, and music as a vehicle for political discourse. We will engage with primary sources as often as possible to learn about the variety of sources and notational issues associated with each repertory we study. Depending on the enrollment, students may be offered projects focused on music or musical genres relevant to their own instruments or vocal types. The work of the course will involve assigned listening and musical study, as well as reading from material provided via library reserve or a course website. Grades will be based on class participation and written work. Open to graduate students, musicians, and others interested in early-modern culture, whether they are based in the SMTD, in LSA, or in other units.

The Art of Electronic Music								
The Art of Electronic Music: Explore the creation of electronic sound in ambient, EDM, experimental music, hip-hop, R&B, rock, and techno. Study the work of classic and contemporary artists and producers, including Bjork, J Dilla, Brian Eno, and Pauline Oliveros, to understand their use of sampling, looping, editing, sound synthesis, and production techniques, and to investigate the dialogue between artistic and technological innovation in electronic music.

The course is about the classical music traditions of North India, also known as Hindustani music. The first half of the course focuses on acquiring mastery over the basic musical materials of this idiom through singing, improvisation, and transcription exercises. The second half of the course builds on these skills to theorize about and analyze aspects of North Indian classical pitch (i.e. raga) and rhythmic (i.e. tala) structure, form, performance practice, and their connection to other musical idioms, including the classical music of South India, and the classical and popular musical traditions of the West.

Writing on Musical Form								
This course will focus on the analysis of form and how we write about it. We will seek to move beyond taxonomic description and toward a consideration of how we can capture in prose what we hear in terms of the work's dynamic. We will be guided by texts including Erwin Stein's "Form and Performance." Repertoire under examination will likely center on Bach's inventions and Beethoven's piano sonatas.

This course surveys the history of music theory in the eighteenth, nineteenth, and early twentieth centuries. Readings will be drawn from the writings of Rameau, Kimberger, C.P.E. Bach, Koch, Reicha, A. B. Marx, Fetis, Choron, Forster, Weber, Richter, Sechter, Hauptmann, von Oettingen, Helmholtz, Riemann, Hanslick, Louis and Thuille, Schoenberg, and Schenker. Significant general themes may include: the relationship between speculative and practical traditions, the institutional sites of music theory, interactions between theory, analysis, and composition pedagogy, the role of oral teaching traditions, the position of music theory in the academy, the scientific status of music theory, and the historiography of music theory. Course consists of a heavy reading load, three or four short writing assignments and a final oral exam.

Latina/o Theatre for Social Ch meet together with RC 334.004										
Artistic practice in prisons has occurred since the inception of prisons themselves, though popular thought tends not to connect the idea of the arts with that of criminal justice systems. This course surveys the history of performance in prisons through the examination of plays written by and about prisoners as well as narratives, which chronicle the process of creating theatre in prisons. More importantly, the course also requires all enrolled students to enter an adult prison once a week throughout the semester to lead a theatre workshop with prisoners. Students will be placed in pairs to facilitate workshops, and each workshop will hold a performance at the end of the semester. Students and prisoners together create social change through their performances, both by bringing two disparate communities (i.e. undergrads and prisoners) into meaningful interaction and also by using theatre to explore significant social issues.

Image of the American Family Meets with RCHUMS 282.001										
In this four credit drama course students will explore major American plays of the 20th century through the process of text analysis through performance. We will work on plays by major writers such as Arthur Miller, Tennessee Williams, Lorraine Hansberry, Sam Shepard and Tony Kushner. For each play we will discuss dramaturgical background, script and character analysis and put scenes on their feet for constructive critique. Written assignments will center on a journal which will include a series of actor's explorations of motivations and actions. Students will also be responsible for writing critiques of two productions. The course culminates in a public performance of a cutting of a major play, most likely Tony Kushner's "Angels in America."										
In this four-credit drama course students will explore major American plays of the 20th century through the process of text analysis through performance. We will work on plays by major writers such as Arthur Miller, Tennessee Williams, Lorraine Hansberry, Sam Shepard and Tony Kushner. For each play we will discuss dramaturgical background, script and character analysis and put scenes on their feet for constructive critique. Written assignments will center on a journal, which will include a series of actor's explorations of motivations and actions. Students will also be responsible for writing critiques of two productions. The course culminates in a public performance of a cutting of a major play, most likely Tony Kushner's "Angels in America."

UM: Past, Present, Future					
In 2017-2018, the University of Michigan will celebrate its Bicentennial, two hundred years of leadership in American higher education. The study of Michigan's history its current challenges, opportunities, and responsibilities, and its future possibilities illustrates not only many of the key policy issues that have shaped American higher education but also suggests those that will challenge both the University and the nation in the years ahead. This course will consider the University as an exemplar both of the evolution of higher education and the forces that will shape it in the future. Included will be subjects such as the cost, price, and value of a college education (e.g., who benefits, who pays), the ability to serve an increasingly diverse population, and the critical role of university research in determining the prosperity, security, and public welfare of the nation. Current issues such as student activism, diversity, faculty tenure, the financing of higher education, college sports, and the political environment characterizing higher education will be considered. Of particular importance will be a consideration of the future of the university, considering issues such as changing demographics, globalization, and the rapid evolution of key technologies such as cyber infrastructure, artificial intelligence, and gene editing, again using the University of Michigan as a case study.

Psychology of Climate Change					
Climate change often feels like a problem that our brains have been hardwired to ignore. Climate change is abstract and complex, making it hard for non-scientists (including policy-makers) to understand. For most Americans, it is a problem that will harm people who are far away in time and geography. And the significant political polarization surrounding climate change has turned it into a form of identity politics. Yet like so many environmental problems?from habitat destruction to overconsumption of natural resources?climate change is the result of human behavior. If we want to solve or mitigate these problems, we must first understand what is driving these beliefs and behaviors.

Most policy to address environmental issues such as climate change has focused on legal or economic tools such as prohibiting certain forms of pollution or giving subsidies for renewable energy. In this discussion-based policy seminar, we will examine an alternative framework for motivating environmentally-friendly behavior: psychological and social incentives. We will explore factors affecting climate change beliefs and related behaviors, including reactions to and support for policies. The focus will be primarily on the US, and we will discuss policy programs and private interventions that have incorporated social psychological research to promote climate change mitigation as well as potential new applications of this research. Although this class will mainly cover climate change and other environmental issues, the psychological tools we will discuss are used in other domains as well, so will be useful to students interested in a range of policy topics.

Higher Ed Policy

Higher Education and Public Policy --- This course will examine the higher education sector from several different angles, but with an emphasis placed on the economic issues. Topics include the benefits of higher education, government's interest in promoting it, and various policies that impact access, persistence, and affordability, and accountability. Policies examined include financial aid, affirmative action, state and federal funding, regulation of the for-profit sector, and many others.

STATS 250 must be completed prior to enrolling in this course.

Evaluating Public Policies

This course is restricted for Ford School Seniors enrolled in the BA Program and that have completed STATS 250.

This 3-credit course will provide an introduction to the fundamentals of evaluation research design and methods as applied to public policies and programs. The course will cover the role of evaluation in the public policy process, and both process and summative evaluation research, including research designs for establishing causal inference between exposure to public policies/programs and outcomes. Students will gain skills in understanding and crafting research designs common in public policy evaluation, including randomized controlled trials, quasi-experimental designs and time series designs. Students will also gain skills in understanding/critiquing published public policy evaluation literature, measurement/data collection methods, and basic statistical methods for analyzing evaluation data. Class format will include lecture, discussion of case studies, and small group applied exercises.

This course will help build your research/analysis skills

Senior Seminar in Applied Pol

This course offers senior public policy students an opportunity to conduct a policy analysis project in an area of their interest. Each student will identify a policy outcome of personal interest, and analyze strategies to advance that outcome. The student will complete a major project that makes informed recommendations to real world policy organizations and actors about how to make progress toward the desired policy outcome.

This course is designed for senior Public Policy majors. Others may enroll only with the permission of the instructor.

Topics to be covered:

Identifying a policy outcome and question of interest; Constructing a range of sensible policy options; Understanding what works under various circumstances; Identifying the key policy actors who can contribute toward better outcomes; Evaluating different kinds of evidence about the effectiveness of policy options; Assessing potential barriers to improving policy outcomes; Ethical issues that arise in policy analysis; Communicating recommendations to a policy audience.

This is a core course restricted to Ford School students only									
This section of 510 aims to help you better understand policy analysis and the political environment within a context of American domestic politics at the national level.									
Policy analysis is a discipline that brings systematic thinking and social scientific evidence to bear on substantive problems. The premise of this course is that policymakers seldom value that analysis as much as we do. Many are skeptical about what social science can contribute to solving public problems, often rightly so. Others see policy analysis as material to be deployed selectively and strategically in political battles fought on other terms. In today's highly partisan, often hyperbolic politics, bringing reason and evidence to bear on public problems is more challenging than ever.									
By the end of the course, you will understand the political environment in which policy specialists operate: the participants who shape policy within particular domains; the ways in which they perceive problems and solutions; the information, interests, and ideologies likely to govern their actions; the strategies they use; and the institutional arrangements and processes that shape their behavior and constrain their decisions. A final but important purpose of the course is to help you work on your writing and, to a lesser extent, your oral communication skills.

This section of 510 follows the policymaking process after legislators claim credit and the TV cameras shut down: the work of trying to implement and interpret the law. In the United States, this process is guided by the executive branch, through rulemaking, and the judicial branch, through oversight. But as we will see, neither of these two branches of government operate in isolation from each other, from Congress, or most importantly, from the democratic process. This extent to which bureaucracy and the courts are insulated or open to public influence, and the channels through which that influence occurs, explain a large part of what happens on the ground in the United States. It also serves as a key point of contrast in understanding how policymaking in other countries compares to the United States.

Detroit's Grand Bargain  
 Taught by editorial page editor of The Detroit News Nolan Finley

A look at the unique deal that settled Detroit's municipal bankruptcy. Foundations, corporations, foundations and governments stepped out of their normal operating boundaries to craft an \$800 million agreement that allowed Detroit to move out of Chapter 9 without a fire sale of its assets or sacrificing its pensioners. The class will examine the part played by each of the principles, and how the experience in Detroit changed the way collaborations between government, foundations and the business community will work in the future. Class will feature guest appearances by and video-taped interviews with many of those involved in the Grand Bargain. It is taught by Nolan Finley, editorial page editor of The Detroit News, who covered bankruptcy.

Class will be held from October 23 - December 11

Tax Policy

Oliver Wendell Holmes famously said that "Taxes are what we pay for civilized society," but who should pay and how much? In this course, we will develop the tools of policy analysis and economics to engage in several current debates in tax policy at the local, state, federal, and international levels. Examples include:

- Carbon taxes, soda/sugar taxes and other sin taxes--What are the pros and cons?
- "Economic development wars"--Should states and local governments use big tax breaks to lure businesses?
- "Amazon tax"--Should Amazon and other online retailers have to collect state and local sales taxes? States are losing hundreds of millions of dollars and brick and mortar stores argue that online retailers have an unfair advantage.
- The "Buffet Rule"--How much do the rich pay in taxes and how much should they pay?
- The "Double Irish Dutch Sandwich" and other strategies to use international tax havens--What is being done? What should be done?

Students will prepare short writing assignments and engage in mock debates on policy issues. The major project in the class will be the development of a white paper on a topic of choice.

Economic Integration for Individuals in the Refugee Resettlement Program

This course is one of four interdisciplinary problem solving courses offered at the Law School in fall 2017. Graduate and professional students in business, economics, law, public policy, and social work are eligible to take this course.

Both refugees and foreign national victims of human trafficking are eligible for refugee resettlement benefits. How can these benefits be optimized to increase individual economic empowerment and economic development for the communities in which these individuals are resettled? This course will develop innovations to facilitate the economic integration of refugees and victims of human trafficking both during and after the resettlement process. These innovations may include educational programs to help these individuals start businesses or find employment, matching services to help them find entrepreneurship or career development mentors, funding or microfinance options to help them fund new businesses, or legal assistance to secure the documents necessary to obtain employment or start a business.

Housing America's Working Poor

Stable and Integrated Housing for America's Working Poor

This course is one of four interdisciplinary problem solving courses offered at the Law School in fall 2017. Graduate and professional students in architecture and urban planning, business, law, sociology, public health, public policy, and social work are eligible to take this course.

Working as a group with guidance from the instructors, students will design an interdisciplinary, comprehensive plan to address the unavailability of affordable, stable, and integrated housing for working poor people in the United States. We will focus on innovative, community-based solutions to this problem. Students will work collaboratively across disciplines to create a coherent plan to present to a hypothetical client such as a local, state, or federal governmental agency or a foundation. Class sessions will focus heavily on presentations or interviews with experts. Students also will be expected to spend significant time outside of class working in teams to reach out to relevant stakeholders, conduct research, draft documents, and otherwise work toward the creation of the plan. Although students will be broken into teams and assigned different projects, the class as a whole will work as a team to create a single interdisciplinary plan. Through active participation in the course, students will learn how to solve a social problem through analysis of best practices across a variety of disciplines, work effectively with members of a team, and generate policy.

ID'ing Human Traff Victims

Identifying Victims of Human Trafficking within Health Care Settings

This course is one of four interdisciplinary problem solving courses offered at the Law School in fall 2017. Graduate and professional students in dentistry, law, medicine, nursing, public health, public policy, and social work are eligible to take this course.

It is estimated that up to one third of all victims of human trafficking come into contact with a health care provider during their trafficking and are unrecognized. Health care settings offer a unique opportunity to identify victims of human trafficking and connect them with services and support. In a collaborative, multidisciplinary setting, students will develop innovations to increase the identification of victims of human trafficking in health care settings.

This is a short introductory course module in facilitating complex and difficult dialogic moments of engagement in the social, professional and institutional spheres of the public arena. Its purpose is to provide the possibility for actual engagement with tense social issues and phenomena bedeviling complex societies. It will briefly explore the historical and theoretical contexts, which give rise to sometimes painful and traumatic moments that filter in and color what may otherwise be perceived as simplistic conversations and interactions. It will introduce students?regardless of perceived color, gender, class, or ethnic identity categorization?to the necessity for transcending their subject locations. In order to facilitate, mediate, and engage in trans-formative moments of learning, dialogue, leadership and communal capacity building with due regard of difference and the respect of mutuality.

**Econ Develop in Persian Gulf**

The Persian Gulf is characterized by countries whose economies are built around a valuable natural resource, oil. In political science and international relations theory, countries like this are known as "rentier states": states which derive all or a substantial portion of national revenues from the rent of indigenous resources to external clients. The course uses cases from the Gulf, and particularly Oman, to illustrate both general features of rentier states and the importance of understanding the special dynamics of individual states and regions. The first half of the course will use The Rentier State by Hazem Beblawi (2016) to examine the interrelationships of the economic base with cultural, social and political structures created to manage natural resources. In the second half of the course, cases from Oman will be used to apply the concepts covered in in the first half of the course to labor and employment policy, social policy, foreign direct investment (FDI) , and government structure and spending. Students? assessments are based on one in-class exam and two case analysis reports.
