Business Water Risk

Business Water Risk: Ripple Effects from Watersheds to the Capital Markets

This 7-week course presents an overview of how water has impacted risks to businesses and their supply chains, and how corporate financial managers and institutional investors are starting to incorporate risks in their accounting and asset allocations. Corporate water risk exposure is a function of three variables: 1) company/sector-specific characteristics (e.g. water intensity of production), 2) the water conditions in particular geographies (e.g. drought-prone or strictly regulated), and 3) the strength of corporate management (e.g. proactive vs. reactive) in mitigating risks. The challenge is how the information from the physical world is translated in the financial world, and vice versa. It is often perceived that the proper risk management strategy for water in a corporate context is technology-based (new supply, recycling, monitoring, etc.). The course will describe how capital commitments for technology and infrastructure are often a last resort, because they are expensive, long-term, and often their cost cannot be passed on to the consumer. Short-term, financial risk management is preferred, such as hedging and insurance strategies. This course will explore corporate water risk and financial response strategies, and discuss commercial tools available to sustainability, corporate and financial managers. This include corporate water footprinting, regional asset risk mapping (Aqueduct), corporate operational risk assessment (Water Risk Monetizer), and financial asset risk signaling (WaterBeta).

	Decentralized Water Supply Decentralized Water Supply, Hygiene, and Sanitation This course provides an introduction to decentralized approaches to water access and treatment that results in providing access to drinking water and sanitation. The class will cover the risks associated with poor water quality (waterborne pathogens and chemicals); appropriate physical, chemical, and biological process technologies for decentralized deployment; social factors; and consideration for resource recovery, sustainability, public policies and environmental justice, and economic models including privatization.

	Structural Fire Engineering Structural Fire Engineering This course provides an overview of methods for the design and analysis of structures under fire hazards. Topics include: fire models for structural applications, conduction heat transfer analysis, response of materials at elevated temperatures, local and global structural responses, prescriptive and performance-based design approaches. The course will rely on finite element analysis; it must therefore be accompanied or preceded by CEE 510 (or equivalent).

	Infrastructure Systems Optimiz Infrastructure Systems Optimization This class is to prepare students with the systems-level approach to the analysis and design of civil infrastructure systems. The fundamental concepts associated with the course are taught through a series of examples drawn from the various aspects of civil infrastructure systems applications. The examples build upon each other to provide a comprehensive overview of practical approaches to goal-oriented problem formulation and solution while giving the student a fundamental understanding of principles that can be used to facilitate decision making. Optimization techniques that will be discussed in this class include linear programming formulations and solution algorithms, multi-objective optimization, integer optimization, network models, and nonlinear programming.

Main components include traffic flow theory, traffic simulation, and traffic signal control. An introduction on connected and automated vehicle technology and its applications in traffic flow and signal control will also be introduced in the class.

Environmental Finance: Financial Innovations for Green Growth								
Environmental Markets, Sustainable Investment, and Financial Technology.								
This course will review innovations in processes, investment mandates and financial basics of the key pillars of Environmental Finance across all asset classes and investment vehicles. It will examine how established practices, procedures and tools from within the mainstream financial market are being adapted to integrate ESG criteria, in the pursuit of financial performance goals from both an investor and corporate perspective. The course will further explore how new entrepreneurial ventures are starting to disrupt the environmental finance environment.

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE ELECTRICAL ENGINEERING AND COMPUTER SCIENCE DEPARTMENT MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND THE FIRST WEEK OF LECTURES AND LABS/DISCUSSIONS (AS APPROPRIATE) FOR ANY EECS COURSES.

AT THE SAME TIME, THE EECS DEPARTMENT IS NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

Business Thought and Action --- This course introduces students to business. In this course we foster development of the key skill of learning via reflection on one's own experience. The course will rely heavily on examination of individual organizations or industries from which generalizations can be made. Specific situations will be selected to convey the excitement of business situations, the role of business in society and the global scope of business. The primary purpose of this class is to educate students about the broad range of problems and opportunities that businesses face and the tools and skills that are necessary to face them. A secondary purpose is to show the students the richness of business activity by 'peeling back the onion' via case discussions of situations and companies they have experienced in their lives. Students will gain familiarity with different kinds of information resources: from trade magazines to mass market books to research journals.

E-Commerce Entrepreneurship

The E-Commerce Entrepreneurship course is designed to introduce students to the online world of business, retail, and commerce. With the increasing popularity of shows like Shark Tank and the ease of setting up an online business, people are more than ever interested in setting up their own online business. The class will address the expected challenges and help students gain the knowledge they would need to start their own online business upon completion of the course.

Digital Product Design

Digital Product Design is an introduction to the fundamentals of designing products for digital platforms. This course was created by UM students and will be taught by practicing designers working at FarmLogs.

In this course, students will learn how to:

- Use design thinking to discover problems worth solving, generate and prototype solutions, and test them with real users
- Design your own products by creating wireframes, interactions, and visual designs
- Use typography, color, shape--and industry-standard tools like Sketch, Invision, etc--to build designs that are attractive, simple, and functional
- Solicit constructive feedback, critique design work, and substantiate your criticism
- Discuss topics in the design world, including usability, user experience design, user interface design, and design research

Intended Audience:

This is an introductory course for students studying engineering, art and design, and liberal arts--or anyone interested in making effective digital products.

Format:

- Weekly lectures with optional work sessions where students can hang out and work with instructors, classmates, and others in the Ann Arbor design community.
- Weekly small design assignments with a final product project at the end of the semester.

TechLab MCity

TechLab at MCity Independent Study

The TechLab Independent Study class will be participating in sponsor company projects that advance their technology development. Each student team, divided by sponsoring company, will be responsible for accomplishing an open-ended project (assigned by the company), and gain experience in developing cutting edge technology at an early stage startup.

The core rationale for the TechLab initiative is to provide students with a hands-on learning experience working with applied science in the process of progressing from the lab to full commercialization. This independent study provides a unique opportunity to not only explore coursework outside of a dedicated CoE program but also have direct contact and to work alongside peers, colleagues, and faculty across multiple disciplines.

Organizational Mgmt Startups - Fall 17 will meet Fridays from 9:00am-11:00am, in TBD.

This course is designed to teach the fundamentals of identifying and prioritizing the "who" (human resource capital) and the "what" (skill sets) needed for your venture to grow and thrive. Building and managing a world-class team is one of the most critical factors determining the success of a company. You will learn the fundamentals of establishing and protecting a corporate culture, and best practices in recruiting, interviewing, and managing your organization. You will learn how to keep employees motivated, accountable, and happy. Students will also study what to do in failure mode to resolve internal conflicts and terminate team relationships when necessary. Course work includes selected readings in organizational structure and development, case study review, and in-class discussion and active role play exercises designed to demonstrate skill proficiencies. The Instructor has been the CEO and President of both public and private companies, including on-going corporations and start-ups that were both successes and failures.

Creativity & Design - Strategies for Innovation

The course is a hands-on, interactive, immersion into personal creativity and the design thinking process. Using tools for self-awareness, discovery and curiosity, the course will explore how people, places and practices foster human creativity. Students will discuss: What is creativity? How can a person become more creative? In order to become more creative, students must be willing to look within themselves and share what they find. The design thinking portion of the course will include a team assignment exploring problem framing and solution analysis, as well as storytelling practices via presentations at the end of the semester.

The course's objectives for its students will be:

- A paradigm shift- to learn about other ways of thinking and principles that can pivot their approach to viewing

and reacting to the world.

- Defining creativity- to create a working definition so that the students can achieve a clearly identified goal.
- ID your personal creative style via discovering what you are most enthusiastic about and what types of endeavors make you excited to create.
- Discuss methods and approaches that contribute to individual, team and organizational creativity- how you can bring down barriers to creative thinking and the importance of attitude and positive affirmations.
- Develop a skill set and program of continuing study and practice that develops creative mentors, practices and environments.
- Gain confidence in your creative talent.
- Learn the importance of consumer / audience qualitative research and understanding in the design process.
- Develop a working knowledge of the design thinking process.
- Practice problem framing and solution analysis to help with organizational design.
- Learn how to apply the design thinking process to build solutions and innovations.
- Expand creative ability and increase productivity and happiness by learning about obstacle removal in creative practice.
- Explore team building exercises and processes with the hope that there will be a resulting change in attitude--that our thoughts and actions are not in isolation. Partnership and community are critical to both creative living and design success.

Greenhouse Gas Control

Greenhouse Gas Control

This course presents a review of strategies for the reduction of greenhouse gas (GHG) emissions in power generation, transportation, and the built environment. Sources, discharges, and physical properties of GHGs are surveyed, and technologies for GHG elimination or sequestration are discussed. Policy options for GHG control are considered.

Develp & Verify Systems Reqmts

Data collection and analysis techniques for developing and verifying system design requirements are studied: identifying, quantifying and prioritizing stakeholder objectives, minimizing test procedures cost, validation vs. verification, and limited vs. mass production strategies. Course work includes a term project. Knowledge of introductory statistics is required.

This course will be taught in a team based/project based manner without formal exams or a final. There will be annotated reading assignments due at each class and we will use formative based assessments (like quizzes) at least 6 times during the term. Homework will be not be graded for accuracy but rather for effort and honesty in written reflections. There will be two projects this term that are focussed on characterization techniques. Introduction to SportAnalytics

This course will be held in OBL #1170.

Students enrolled in more than five upper division SM courses will be disenrolled from one of the excess courses.

With the increasing availability of information, especially with the emergency of "Big Data," the ability to effectively use data to derive key business decisions has been a critical strategic advantage for sports enterprises. This course will provide you a foundation you may need to understand the importance of analytics and apply analytics methods in the sports industry. In this course, you will learn basic analytic methods applied to sports data. We will cover descriptive statistics and the application of probability in sports. You will learn to use correlation to detect statistical relationships and use regression analyses to identify factors that contribute to sports and business performance. This course will survey a number of business decision making scenarios in the sports industry, such as ticket pricing, advertising and promotions, and operation management. In the first half of the course, we will focus on the understanding sports data and using them to develop insights. In the second half, we will focus on analyzing the data to make strategic implications. We will also explore various challenges that can arise when implementing analytical tools within a sports organization.

Literature, Science & the Arts

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND:

- THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES;
- EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES;
- THE FIRST TWO MEETINGS OF HISTORY 396 AND 397;
- EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES;
- THE FIRST TWO MEETINGS OF COURSES IN OTHER SUBJECTS.

AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

English Language Institute

English Language Institute (ELI) Open Sections

ELI courses fall into three categories:

1. English for Academic Purposes courses for graduate students;
2. Language and teacher training courses for international GSIs;
3. Teacher training courses for students planning to teach ESL in local communities or abroad.

For assistance in choosing an appropriate course, please go to the ELI Academic Advising website:

To enroll in this course, students need to:								
1. Submit a portfolio. Portfolios should be submitted directly to the instructor of each section. For priority consideration, portfolios should be submitted no later than 5pm on Friday, March 24, 2017. Students should receive notification of their acceptance (or not) no later than Tuesday, March 28, 2017.								
2. Students are encouraged to consider a second-choice section (where available) as a potential back-up, and make contact with that instructor.								
Note: Students who are currently a declared creative-writing minor or English sub-concentrator will receive alternative enrollment instructions. Creative-writing minors and English sub-concentrators are not required to submit a portfolio for review.

History Department

History (HISTORY) Open Sections

--IT IS CRITICAL THAT STUDENTS ATTEND CLASS FROM THE BEGINNING OF THE TERM. ALTHOUGH STUDENTS MAY BE OFFICIALLY REGISTERED FOR A COURSE, THE DEPARTMENT MAY DISENROLL ANY STUDENT NOT ATTENDING THE FIRST TWO COURSE MEETINGS.
 --DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE.
 --STUDENTS ARE ENCOURAGED TO USE THE WAITLIST FOR ANY CLOSED COURSE. STUDENTS SHOULD REGISTER ON THE WAITLIST ACCORDING TO PREFERRED SECTION AND ATTEND THE FIRST CLASS. UP TO THE FIRST DAY OF CLASS, OVERRIDES WILL BE GIVEN BY THE DEPARTMENT AS SPACE BECOMES AVAILABLE. STUDENTS ARE NOTIFIED AND GIVEN TWO DAYS TO USE THE OVERRIDE, AFTER WHICH THE SPOT MAY GO TO AN ALTERNATE STUDENT ON THE WAITLIST. ONCE CLASSES HAVE STARTED, STUDENTS (WAITLISTED OR NOT) MUST CONTACT THE INSTRUCTOR FOR AN OVERRIDE.

Writing 100 is designed to help students of all levels improve their writing, but is best suited to those who have yet to fulfill the First-Year Writing Requirement. Upper-level students should have a compelling academic reason for enrolling in Writing 100.									
Normal waitlist procedures apply for students who attend the first two classes. Students who wish to join Writing 100 after the first two class sessions must email the instructor to set up a meeting to discuss enrolling. Based on this discussion, the student and instructor will then make a determination on whether or not it is appropriate for the student to enroll.

Cog Neuro of Consciousness

The study of consciousness is considered a fundamental scientific and philosophical pursuit. How does information processing in the brain generate experience? How do we objectively capture what is, by definition, a subjective event? As philosopher Colin McGinn puts it, how do we get from the water of the brain to the wine of consciousness? I have recently started a Center for Consciousness Science at the UM Medical School to help address these very questions.

As an educational activity and the Center (and as a NGP faculty), I am conducting a combined reading/lecture course (NS-704) this upcoming semester on "The Cognitive Neuroscience of Consciousness." The study of consciousness is sometimes decomposed into "levels of consciousness" (awake vs. asleep vs. anesthetized vs. comatose) and "states of consciousness" (assuming I am already conscious, why do I see a blue triangle rather than a red square?). We will explore both of these dimensions and likely have some visiting lecturers/discussants to help us along the way.

The subject of consciousness motivated many of us to choose the field of neuroscience. I hope you will join me next month as we explore a fascinating question that has scientific, philosophical, clinical, and even existential implications. Even if you don't want to formally sign up for the course, you are welcomed to attend and participate.

What: NS704, The Cognitive Neuroscience of Consciousness

Who: Neuroscience and psychology students (and other interested people)

When: Fall semester, Wednesdays at Noon (pizza will be served!)

Where: Medical School, Med-Sci I, 7th floor conference room (#7433D)

	This course surveys the history of music theory in the eighteenth, nineteenth, and early twentieth centuries. Readings will be drawn from the writings of Rameau, Kimberger, C.P.E. Bach, Koch, Reicha, A. B. Marx, Fetis, Choron, Forster, Weber, Richter, Sechter, Hauptmann, von Oettingen, Helmholtz, Riemann, Hanslick, Louis and Thuille, Schoenberg, and Schenker. Significant general themes may include: the relationship between speculative and practical traditions, the institutional sites of music theory, interactions between theory, analysis, and composition pedagogy, the role of oral teaching traditions, the position of music theory in the academy, the scientific status of music theory, and the historiography of music theory. Course consists of a heavy reading load, three or four short writing assignments and a final oral exam.

The course is about the classical music traditions of North India, also known as Hindustani music. The first half of the course focuses on acquiring mastery over the basic musical materials of this idiom through singing, improvisation, and transcription exercises. The second half of the course builds on these skills to theorize about and analyze aspects of North Indian classical pitch (i.e. raga) and rhythmic (i.e. tala) structure, form, performance practice, and their connection to other musical idioms, including the classical music of South India, and the classical and popular musical traditions of the West.

Writing on Musical Form This course will focus on the analysis of form and how we write about it. We will seek to move beyond taxonomic description and toward a consideration of how we can capture in prose what we hear in terms of the work's dynamic. We will be guided by texts including Erwin Stein's "Form and Performance." Repertoire under examination will likely center on Bach's inventions and Beethoven's piano sonatas.

This course surveys the history of music theory in the eighteenth, nineteenth, and early twentieth centuries. Readings will be drawn from the writings of Rameau, Kimberger, C.P.E. Bach, Koch, Reicha, A. B. Marx, Fetis, Choron, Forster, Weber, Richter, Sechter, Hauptmann, von Oettingen, Helmholtz, Riemann, Hanslick, Louis and Thuille, Schoenberg, and Schenker. Significant general themes may include: the relationship between speculative and practical traditions, the institutional sites of music theory, interactions between theory, analysis, and composition pedagogy, the role of oral teaching traditions, the position of music theory in the academy, the scientific status of music theory, and the historiography of music theory. Course consists of a heavy reading load, three or four short writing assignments and a final oral exam.

Latina/o Theatre for Social Ch
meet together with RC 334.004

Artistic practice in prisons has occurred since the inception of prisons themselves, though popular thought tends not to connect the idea of the arts with that of criminal justice systems. This course surveys the history of performance in prisons through the examination of plays written by and about prisoners as well as narratives, which chronicle the process of creating theatre in prisons. More importantly, the course also requires all enrolled students to enter an adult prison once a week throughout the semester to lead a theatre workshop with prisoners. Students will be placed in pairs to facilitate workshops, and each workshop will hold a performance at the end of the semester. Students and prisoners together create social change through their performances, both by bringing two disparate communities (i.e. undergrads and prisoners) into meaningful interaction and also by using theatre to explore significant social issues.

Image of the American Family Meets with RCHUMS 282.001								

In this four credit drama course students will explore major American plays of the 20th century through the process of text analysis through performance. We will work on plays by major writers such as Arthur Miller, Tennessee Williams, Lorraine Hansberry, Sam Shepard and Tony Kushner. For each play we will discuss dramaturgical background, script and character analysis and put scenes on their feet for constructive critique. Written assignments will center on a journal which will include a series of actor's explorations of motivations and actions. Students will also be responsible for writing critiques of two productions. The course culminates in a public performance of a cutting of a major play, most likely Tony Kushner's "Angels in America."

Psychology of Climate Change
Climate change often feels like a problem that our brains have been hardwired to ignore. Climate change is abstract and complex, making it hard for non-scientists (including policy-makers) to understand. For most Americans, it is a problem that will harm people who are far away in time and geography. And the significant political polarization surrounding climate change has turned it into a form of identity politics. Yet like so many environmental problems, from habitat destruction to overconsumption of natural resources, climate change is the result of human behavior. If we want to solve or mitigate these problems, we must first understand what is driving these beliefs and behaviors.

Most policy to address environmental issues such as climate change has focused on legal or economic tools such as prohibiting certain forms of pollution or giving subsidies for renewable energy. In this discussion-based policy seminar, we will examine an alternative framework for motivating environmentally-friendly behavior: psychological and social incentives. We will explore factors affecting climate change beliefs and related behaviors, including reactions to and support for policies. The focus will be primarily on the US, and we will discuss policy programs and private interventions that have incorporated social psychological research to promote climate change mitigation as well as potential new applications of this research. Although this class will mainly cover climate change and other environmental issues, the psychological tools we will discuss are used in other domains as well, so will be useful to students interested in a range of policy topics.

Tax Policy
Oliver Wendell Holmes famously said that "Taxes are what we pay for civilized society," but who should pay and how much? In this course, we will develop the tools of policy analysis and economics to engage in several current debates in tax policy at the local, state, federal, and international levels. Examples include:

- Carbon taxes, soda/sugar taxes and other sin taxes--What are the pros and cons?
- "Economic development wars"--Should states and local governments use big tax breaks to lure businesses?
- "Amazon tax"--Should Amazon and other online retailers have to collect state and local sales taxes? States are losing hundreds of millions of dollars and brick and mortar stores argue that online retailers have an unfair advantage.
- The "Buffet Rule"--How much do the rich pay in taxes and how much should they pay?
- The "Double Irish Dutch Sandwich" and other strategies to use international tax havens--What is being done? What

should be done?										
Students will prepare short writing assignments and engage in mock debates on policy issues. The major project in the class will be the development of a white paper on a topic of choice.

Evaluating Public Policies This course is restricted for Ford School Seniors enrolled in the BA Program and that have completed STATS 250.										
This 3-credit course will provide an introduction to the fundamentals of evaluation research design and methods as applied to public policies and programs. The course will cover the role of evaluation in the public policy process, and both process and summative evaluation research, including research designs for establishing causal inference between exposure to public policies/programs and outcomes. Students will gain skills in understanding and crafting research designs common in public policy evaluation, including randomized controlled trials, quasi-experimental designs and time series designs. Students will also gain skills in understanding/critiquing published public policy evaluation literature, measurement/data collection methods, and basic statistical methods for analyzing evaluation data. Class format will include lecture, discussion of case studies, and small group applied exercises.										
This course will help build your research/analysis skills

Senior Seminar in Applied Pol This course offers senior public policy students an opportunity to conduct a policy analysis project in an area of their interest. Each student will identify a policy outcome of personal interest, and analyze strategies to advance that outcome. The student will complete a major project that makes informed recommendations to real world policy organizations and actors about how to make progress toward the desired policy outcome. This course is designed for senior Public Policy majors. Others may enroll only with the permission of the instructor.										
Topics to be covered: Identifying a policy outcome and question of interest; Constructing a range of sensible policy options; Understanding what works under various circumstances; Identifying the key policy actors who can contribute toward better outcomes; Evaluating different kinds of evidence about the effectiveness of policy options; Assessing potential barriers to improving policy outcomes; Ethical issues that arise in policy analysis; Communicating recommendations to a policy audience.

There is no policy without victory. More precisely, well-planned and well-executed political campaigns win elections and make governing possible. Therefore, an understanding of government must first be grounded in an understanding of campaigns and elections. This course will introduce you to the art and science of political campaigning. Topics to be covered will include crafting a message, scheduling and time management, research, issues, polling, speeches, debates, working with the press, identifying, differentiating and targeting voters, coalitions and interest groups, budgeting and fundraising, field organization, crisis management, the political environment, and Get Out The Vote efforts.

Tax Policy

Oliver Wendell Holmes famously said that "Taxes are what we pay for civilized society," but who should pay and how much? In this course, we will develop the tools of policy analysis and economics to engage in several current debates in tax policy at the local, state, federal, and international levels. Examples include:

- Carbon taxes, soda/sugar taxes and other sin taxes--What are the pros and cons?
- "Economic development wars"--Should states and local governments use big tax breaks to lure businesses?
- "Amazon tax"--Should Amazon and other online retailers have to collect state and local sales taxes? States are losing hundreds of millions of dollars and brick and mortar stores argue that online retailers have an unfair advantage.
- The "Buffet Rule"--How much do the rich pay in taxes and how much should they pay?
- The "Double Irish Dutch Sandwich" and other strategies to use international tax havens--What is being done? What should be done?

Students will prepare short writing assignments and engage in mock debates on policy issues. The major project in the class will be the development of a white paper on a topic of choice.

Economic Integration for Individuals in the Refugee Resettlement Program

This course is one of four interdisciplinary problem solving courses offered at the Law School in fall 2017. Graduate and professional students in business, economics, law, public policy, and social work are eligible to take this course.

Both refugees and foreign national victims of human trafficking are eligible for refugee resettlement benefits. How can these benefits be optimized to increase individual economic empowerment and economic development for the communities in which these individuals are resettled? This course will develop innovations to facilitate the economic integration of refugees and victims of human trafficking both during and after the resettlement process. These innovations may include educational programs to help these individuals start businesses or find employment,

Housing America's Working Poor Stable and Integrated Housing for America's Working Poor										
This course is one of four interdisciplinary problem solving courses offered at the Law School in fall 2017. Graduate and professional students in architecture and urban planning, business, law, sociology, public health, public policy, and social work are eligible to take this course.										
Working as a group with guidance from the instructors, students will design an interdisciplinary, comprehensive plan to address the unavailability of affordable, stable, and integrated housing for working poor people in the United States. We will focus on innovative, community-based solutions to this problem. Students will work collaboratively across disciplines to create a coherent plan to present to a hypothetical client such as a local, state, or federal governmental agency or a foundation. Class sessions will focus heavily on presentations or interviews with experts. Students also will be expected to spend significant time outside of class working in teams to reach out to relevant stakeholders, conduct research, draft documents, and otherwise work toward the creation of the plan. Although students will be broken into teams and assigned different projects, the class as a whole will work as a team to create a single interdisciplinary plan. Through active participation in the course, students will learn how to solve a social problem through analysis of best practices across a variety of disciplines, work effectively with members of a team, and generate policy.

Identifying Victims of Human Trafficking within Health Care Settings										
This course is one of four interdisciplinary problem solving courses offered at the Law School in fall 2017. Graduate and professional students in dentistry, law, medicine, nursing, public health, public policy, and social work are eligible to take this course.										
It is estimated that up to one third of all victims of human trafficking come into contact with a health care provider during their trafficking and are unrecognized. Health care settings offer a unique opportunity to identify victims of human trafficking and connect them with services and support. In a collaborative, multidisciplinary setting, students will develop innovations to increase the identification of victims of human trafficking in health care settings.

Econ Develop in Persian Gulf The Persian Gulf is characterized by countries whose economies are built around a valuable natural resource, oil. In political science and international relations theory, countries like this are known as "rentier states": states which derive all or a substantial portion of national revenues from the rent of indigenous resources to external clients. The course uses cases from the Gulf, and particularly Oman, to illustrate both general features of rentier states and the importance of understanding the special dynamics of individual states and regions. The first half of the course will use The Rentier State by Hazem Beblawi (2016) to examine the interrelationships of the economic base with cultural, social and political structures created to manage natural resources. In the second half of the course, cases from Oman will be used to apply the concepts covered in in the first half of the course to labor and employment policy, social policy, foreign direct investment (FDI) , and government structure and spending. Students' assessments are based on one in-class exam and two case analysis reports.
