This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The class will use the experience of the so-called Islamic State in Iraq and Syria (ISIS) to develop a plan for countering the ways in which extremist groups use social media to instigate acts of violence. The class structure will be collaborative and multidisciplinary. Class time will focus on providing background information on, and discussion about, the problem. Students will spend additional time outside of class meeting in groups, thinking through the problem, and doing research in the service of the final class project, which they will present at the end of the semester to an expert review panel.									
This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.									
Students may apply for the course by submitting the required application materials to the PSI registration site (https://problemsolving.law.umich.edu/) between February 23, 2018, and March 16, 2018.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This course will challenge students to develop creative approaches to reducing the risk of brain injury in youth and high school football. Students will work in multi-disciplinary teams, under the guidance of the instructors, to conceive and propose novel solutions that draw on insights from law, engineering, medicine, business, ethics, and other relevant fields. Each student team will address a specific sub-topic relative to the course theme. Sub-topics may include: What changes in the rules governing practices, participation, and play should be instituted? What kinds of protective and monitoring equipment should be used, and under what protocols? How should such equipment be financed and distributed?									
Class time will focus on providing background information and discussion with topical experts. Students are expected to spend additional time outside of class contacting experts and researching scientific and lay materials. At the end of the term, students will present a proposal to an expert review panel.									
This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.									
Students may apply for the course by submitting the required application materials to the PSI registration site (https://problemsolving.law.umich.edu/) between February 23, 2018, and March 16, 2018.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). We are facing what might be described as a failure or crisis of public trust in sources of truth about matters of fact. Public actors lie and accuse each other of lying. Media outlets present competing narratives. People do not know whom to trust or believe. Misinformation and conspiracy theories spread through social media. Our aim in this course will be to identify concrete potential interventions, solutions, or avenues for future exploration that might help people identify and trust sources of truth and/or that might mitigate the spread of misinformation. We will draw in insights from a range of inter-connected fields, including (but not limited to): psychology, communications, journalism, social media, information, computer science, law, and history. At the end of the term, students will present a proposal to an expert panel.									
This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Chemical Engineering (CHE) Open Sections

--MANY COLLEGE OF ENGINEERING COURSES REQUIRE STUDENTS NOT ENROLLED IN BUSINESS ADMINISTRATION OR ENGINEERING (INCLUDING CCS MAJORS) TO PAY A \$115-207 COMPUTER USER FEE. THIS IS A SPECIAL FEE, TO BE PAID ONLY ONCE EACH TERM, AND IS IN ADDITION TO THE INFORMATION TECHNOLOGY ACCESS FEE PAID BY FULL TIME STUDENTS AS PART OF THEIR REGULAR FEE ASSESSMENT. YOU WILL BE INFORMED ON THE FIRST DAY OF CLASS WHETHER OR NOT YOUR CLASS IS SUBJECT TO THIS FEE.

The goals of this course are to help students hone and enhance their problem solving, critical thinking, creative thinking, and troubleshooting skills and to ease the transition from college to the workplace. Topics include structured critical reasoning, Kepner-Tregoe analysis, Duncker Diagrams, vertical and lateral thinking and Futuring. The students will work in teams to apply the principles they learn in the course to work with a local business to find and solve problems in their operations. The graduate course (ChE 598) will also require of prospectus of a potential client for the next course offering. The course syllabus can be obtained by sending an email message to lauradb@umich.edu

Business Water Risk

Business Water Risk: Ripple Effects from Watersheds to the Capital Markets

This 7-week course presents an overview of how water has impacted risks to businesses and their supply chains, and how corporate financial managers and institutional investors are starting to incorporate risks in their accounting and asset allocations. Corporate water risk exposure is a function of three variables: 1) company/sector-specific characteristics (e.g. water intensity of production), 2) the water conditions in particular geographies (e.g. drought-prone or strictly regulated), and 3) the strength of corporate management (e.g. proactive vs. reactive) in mitigating risks. The challenge is how the information from the physical world is translated in the financial world, and vice versa. It is often perceived that the proper risk management strategy for water in a corporate context is technology-based (new supply, recycling, monitoring, etc.). The course will describe how capital commitments for technology and infrastructure are often a last resort, because they are expensive, long-term, and often their cost cannot be passed on to the consumer. Short-term, financial risk management is preferred, such as hedging and insurance strategies. This course will explore corporate water risk and financial response strategies, and discuss commercial tools available to sustainability, corporate and financial managers. This include corporate water footprinting, regional asset risk mapping (Aquaduct), corporate operational risk assessment (Water Risk Monetizer), and financial asset risk signaling (WaterBeta).

CII Best Practices

Introduction to the Construction Industry Institute (CII) Best Practices defined and developed by CII over the last 25 years. Current professional and practice issues in the construction industry. The course covers the majority of CII Best Practices, such as Front End Planning, Zero Accident Techniques, Constructability and Materials Management. Lectures focus on Best Practices or practice, and critical issues facing the construction industry.

Environmental Finance								
Environmental Finance: Financial Innovations for Green Growth								
Environmental Markets, Sustainable Investment, and Financial Technology.								
This course will review innovations in processes, investment mandates and financial basics of the key pillars of Environmental Finance across all asset classes and investment vehicles. It will examine how established practices, procedures and tools from within the mainstream financial market are being adapted to integrate ESG criteria, in the pursuit of financial performance goals from both an investor and corporate perspective. The course will further explore how new entrepreneurial ventures are starting to disrupt the environmental finance environment.

Electrical Engr & Computer Sci

Electrical Engineering And Computer Science (EECS) Open Sections

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE ELECTRICAL ENGINEERING AND COMPUTER SCIENCE DEPARTMENT MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND THE FIRST WEEK OF LECTURES AND LABS/DISCUSSIONS (AS APPROPRIATE) FOR ANY EECS COURSES.

AT THE SAME TIME, THE EECS DEPARTMENT IS NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

Hardware/Coding, IoT

* Students from ALL schools and colleges may take this course.

* Syllabi and workload information and other ENTR courses can be found at cfe.umich.edu/courses

* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

* STUDENTS ARE AUTO-ENROLLED IN LECTURE WHEN THEY ELECT THIS LAB.

=====

In this lab, you'll design, prototype, and make Internet of Things (IoT) devices to learn the basics of micro controllers in a hands-on way. You'll also collaborate with others across disciplines to develop your own hardware- and IoT-based entrepreneurial ideas.

Learning Objectives: Students will: develop a basic understanding of coding and electronics; utilize sketching to express, develop, and communicate design ideas; create functional prototypes through engagement in the design process; employ an iterative design approach, integrating concepts from the lecture to develop their final projects; apply a variety of methods for documenting and communicating the progress of their designs.

3D Printing/Prototyping

* Students from ALL schools and colleges may take this course.

* Syllabi and workload information and other ENTR courses can be found at cfe.umich.edu/courses

* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

* STUDENTS ARE AUTO-ENROLLED IN LECTURE WHEN THEY ELECT THIS LAB.

=====

In this lab, you'll learn how to operate and design for 3D printing machines such as the PrintrBot Play and Form 2. You'll learn CAD using Autodesk Fusion 360 and how to integrate 3D scan data into your designs. You'll also learn how to use various Rapid Prototyping and Manufacturing (RP&M) applications such as slicers and inspection tools.

Learning Objectives: Students will develop the fundamental skills to operate and design for the additive manufacturing process (3d printing); learn how to operate various types of 3d printers to include the PrintrBot Play, and Form 2; learn AutoDesk Fusion 360, how to operate the Nextengine 3D Laser Scanner, and how to incorporate 3d scan data into one's design; utilize various Rapid Prototyping and Manufacturing (RP&M) applications to include slicers, and inspection tools.

directed to InnovateBlue or your home department.

* STUDENTS ARE AUTO-ENROLLED IN LECTURE WHEN THEY ELECT THIS LAB.

====

In this lab, you'll learn how to develop virtual reality content for the Oculus Rift and MIDEEN using Unreal Engine and 3D Studio Max. You'll also be introduced to asset creation (3D modeling with 3D Studio Max) and scene assembly / functionality by bringing assets into the Unreal Engine & creating interactive experiences through Unreal's Blueprint system. At the end of the class you'll be capable of developing virtual reality experiences, simulations, and tools to address real-world problems.

Learning Objectives: Students will have an understanding of how to generate digital content for Virtual Reality platforms; be knowledgeable on versatile file formats, content pipelines, hardware platforms and industry standards; understand methods of iterative design and the creation of functional prototypes using this medium; employ what is learned in the lecture section of this course to determine what is possible, what is marketable, and what are the various distribution methods available within this platform; become familiar with documenting their design process and also pitching their ideas to others, receiving and providing quality feedback.

Intro to Entrepreneurial Des

* Students from ALL schools and colleges may take this course.

* Syllabi and workload information and other ENTR courses can be found at cfe.umich.edu/courses

* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

* YOU CANNOT DIRECTLY ENROLL IN THIS LECTURE. You must pick a lab first (ENTR 390.008 - 010).

====

Are you:

- * Designing doorknobs for a Mars colony?
- * Tired of browsing crappy university web pages?
- * Inventing the best app ever for the Nest or the Apple Watch?
- * Have ideas and want to prototype them before the next pitch to investors?
- * Wondering why you aren't going to an online college instead?

Entrepreneurial Design is a cross-disciplinary course for current and aspiring designers, hackers, and makers. This gateway entrepreneurship course allows students to build foundational knowledge of entrepreneurial design with the opportunity to apply these skills in a hands-on lab (ENTR 390.008 - 010).

Learning Objectives: Students will train in patterns of thought that help them anticipate and drive innovations in technology, business, policy; train in advanced and powerful inventing / problem identification and solving methods; learn to identify and meet customer/user needs and wants (i.e.: building stuff you and others actually want to use and buy); obtain practical "building" skills in a specific digital, physical, or combination platform (i.e.: showing how something works is more effective than just telling stories about it).

E-Commerce Entrepreneurship

* Students from ALL schools and colleges may take this course.

* Syllabi and workload information and other ENTR courses can be found at cfe.umich.edu/courses

* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

====

In this course, you'll learn how to start your own profitable business selling consumer products online. We'll also cover the potential pitfalls to stay away from and analyze other e-commerce businesses.

Learning Objectives: Students will be able to present a turnkey business with a functioning website, product photos/videos, sourcing plan, shipping/fulfillment plan, and advertising plan.

TechLab MCity

* Students from ALL schools and colleges may take this course.

* Syllabi and workload information and other ENTR courses can be found at cfe.umich.edu/courses

* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

====

In this course, you'll be responsible for completing an open-ended autonomous vehicle or mobility project (assigned by a company in the autonomous vehicle/mobility space), and as such gain experience in developing cutting edge technology for an early stage startup.

This course is only available to students enrolled in the TechLab at Mcity Program. Only students who are selected

CAT#	Course Title					CR	PREREQ	LAB FEE		
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			OPEN SEATS	WL	

for the TechLab at Mcity Program will be granted permission to enroll. To apply go to <http://cfe.umich.edu/techlab-mcity/>

Learning Objectives: Students will know how to recognize ambiguity, become comfortable with it, and use project management techniques to plan for the unexpected; utilize project management tools, techniques, and skills; understand assigned company's technology and how it creates value for a customer segment; gain exposure to entrepreneurship and its role in solving big problems; align resources for effective project implementation; appreciate organizational dynamics, communication strategies and stakeholder motivations; Identify and utilize key performance metrics for project success; learn to assume responsibility for matters of great importance to assigned company; begin to make transition from student to professional engineer; engage in collaborative learning; immerse themselves in a startup that is developing cutting edge technology for the transportation industry; lead technical and strategic discussion on steps required to achieve technical milestones; discuss a Tech Lab company's work during class discussion and how it relates in the context of class.

It's been shown that diversity drives creativity and innovation, makes teams smarter and more effective, and leads to better outcomes for organizations. Leaders who prioritize inclusivity also know how to leverage talents, skills, and knowledge to make an impact and achieve their goals. Throughout the semester, you will develop the knowledge necessary to create workplaces and communities that value DEI by building on UM's current efforts, and further launch yourself/your entrepreneurial endeavors with a stronger DEI mindset. The skills gained in this course will serve you well as current students and help you be an agent of change in your future careers.

=====

In this course, you'll be exposed to disruptive, influential and respected entrepreneurs, venture capitalists and business leaders and learn about their personal experiences founding, financing and managing a startup venture.

This seminar series is designed to expose students to entrepreneurship through interaction with experienced entrepreneurs, business leaders, and venture capitalists as well as individuals involved in emerging business models, new venture creation, and technology commercialization. While covering a broad set of engineering disciplines, guest speakers will share their knowledge on the latest, most diverse practices on legal, financial, and other innovation issues. The lectures include leading entrepreneurs and executives, technology innovators, experts from the financial markets, and others who support the entrepreneurial infrastructure. Following these seminars, students will be able to meet the guest speakers along with other members of the entrepreneurial community.

=====

In this course, you'll learn how to dramatically simplify the business creation process by radical prioritization, identifying good opportunities and learning when to walk away from a bad one, and learning that it is possible, and actually very common, to be a moderately successful non-famous entrepreneur.

It's hard to start a company, but it doesn't have to be complicated. This course dramatically improves your odds of starting a viable business by providing a framework for identifying large, attractive opportunities. Every student will leave with a viable business opportunity to pursue and a set of valuable and repeatable skills that will be an asset in any entrepreneurial setting.

=====

In this course, you'll receive hands-on training, access to experience entrepreneurs, and a paid summer internship. This course is only available to students enrolled in the Entrepreneurs Leadership Program. For more information, visit <http://cfe.umich.edu/elp>

Learning Objectives: Students will receive practical, hands-on learning assignments to develop their skills in areas of individual leadership, operations, innovation, and execution with an emphasis on these four areas/objectives. 1. Understanding startups: We will learn about startups through case studies and studying other key principles 2. Industry Assessment: We will gain deeper understanding of specific industries through a variety of research and analysis approaches. 3. Opportunity Identification: Building on the foundational knowledge of startups and industries, we will work to identify opportunities for innovation. 4. Validation: After identifying innovation opportunities, we will actively test approaches, ideas, products, and services to develop those opportunities.

=====

In this course, you'll learn how to use a variety of innovation and entrepreneurial tools to identify opportunities, construct a business model, and assess its fundability so you can bring your ideas to life in a sustainable and scalable way.

Learning Objectives: Students taking this class are expected on its completion to be able to: ? Articulate the tangled relationships between four of the nine components of the Business Model Canvas; value proposition, channel, customer segment, and revenue streams. ? Capture a value chain map for a given channel to market. ? Develop an ecosystem map and communicate the fundamental change your innovation will bring to the market. ? Think strategically about the synergy and tensions between innovation capture and creation across several industry verticals. ? Cultivate an ability to tailor technology innovation towards a sustainable business model with modern day revenue stream tactics.

In this course, you will come to recognize the unique contribution designers provide as one of several integral components necessary for a successful venture or team. Because creativity and design intersect the product development process at many junctures, you will gain valuable insights making you an effective contributor to an existing venture, startup idea, and future projects. Whether you have a technical or non-technical background, becoming more knowledgeable about the complexities related to the product design process will help you become a more collaborative teammate, leader, follower and problem solver.

Dev&Verif of Sys Des Req
Data collection and analysis techniques for developing and verifying system design requirements are studied: identifying, quantifying and prioritizing stakeholder objectives, minimizing test procedures cost, validation vs. verification, and limited vs. mass production strategies. Course work includes a term project. Knowledge of introductory statistics is required.

MSE 400 is a team-based and project-based, guided-inquiry course. The first introduction to the material is NOT lecture, but rather annotated reading. Class time will consist of team-based active learning activities. There will be three team projects in this course. Homework will be graded for effort and honesty, not accuracy. Learning will be assessed using Readiness Assurance Activities were we average a closed book quiz with a team based, open book, open internet, group effort on the exact same quiz. You can find more about the costs and details of the course on the following website: http://java.engin.umich.edu/400f18

Naval Architecture And Marine Engineering (NAVARCH) Open Sections

--MANY COLLEGE OF ENGINEERING COURSES REQUIRE STUDENTS NOT ENROLLED IN BUSINESS ADMINISTRATION OR ENGINEERING (INCLUDING CCS MAJORS) TO PAY A \$115-207 COMPUTER USER FEE. THIS IS A SPECIAL FEE, TO BE PAID ONLY ONCE EACH TERM, AND IS IN ADDITION TO THE INFORMATION TECHNOLOGY ACCESS FEE PAID BY FULL TIME STUDENTS AS PART OF THEIR REGULAR FEE ASSESSMENT. YOU WILL BE INFORMED ON THE FIRST DAY OF CLASS WHETHER OR NOT YOUR CLASS IS SUBJECT TO THIS FEE.

Low temperature plasmas are used for materials and microelectronics processing, plasma aided combustion, lighting, lasers and medicine. This course will address the plasma initiated chemistry and plasma surface interactions of these systems. Electron impact, ion-molecule and excited state reactions, radiation transport; and the reaction of these species with inorganic, organic and liquid surfaces will be discussed.

<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The class will use the experience of the so-called Islamic State in Iraq and Syria (ISIS) to develop a plan for countering the ways in which extremist groups use social media to instigate acts of violence. The class structure will be collaborative and multidisciplinary. Class time will focus on providing background information on, and discussion about, the problem. Students will spend additional time outside of class meeting in groups, thinking through the problem, and doing research in the service of the final class project, which they will present at the end of the semester to an expert review panel.</p>									
<p>This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p>									
<p>Students may apply for the course by submitting the required application materials to the PSI registration site (https://problemsolving.law.umich.edu/) between February 23, 2018, and March 16, 2018.</p>

<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This course will challenge students to develop creative approaches to reducing the risk of brain injury in youth and high school football. Students will work in multi-disciplinary teams, under the guidance of the instructors, to conceive and propose novel solutions that draw on insights from law, engineering, medicine, business, ethics, and other relevant fields. Each student team will address a specific sub-topic relative to the course theme. Sub-topics may include: What changes in the rules governing practices, participation, and play should be instituted? What kinds of protective and monitoring equipment should be used, and under what protocols? How should such equipment be financed and distributed?</p>									
<p>Class time will focus on providing background information and discussion with topical experts. Students are expected to spend additional time outside of class contacting experts and researching scientific and lay materials. At the end of the term, students will present a proposal to an expert review panel.</p>									
<p>This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p>									
<p>Students may apply for the course by submitting the required application materials to the PSI registration site (https://problemsolving.law.umich.edu/) between February 23, 2018, and March 16, 2018.</p>

<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). We are facing what might be described as a failure or crisis of public trust in sources of truth about matters of fact. Public actors lie and accuse each other of lying. Media outlets present competing narratives. People do not know whom to trust or believe. Misinformation and conspiracy theories spread through social media. Our aim in this course will be to identify concrete potential interventions, solutions, or avenues for future exploration that might help people identify and trust sources of truth and/or that might mitigate the spread of misinformation. We will draw in insights from a range of inter-connected fields, including (but not limited to): psychology, communications, journalism, social media, information, computer science, law, and history. At the end of the term, students will present a proposal to an expert panel.</p>									
<p>This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p>

<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The class will use the experience of the so-called Islamic State in Iraq and Syria (ISIS) to develop a plan for countering the ways in which extremist groups use social media to instigate acts of violence. The class structure will be collaborative and multidisciplinary. Class time will focus on providing background information on, and discussion about, the problem. Students will spend additional time outside of class meeting in groups, thinking through the problem, and doing research in the service of the final class project, which they will present at the end of the semester to an expert review panel.</p>								
<p>This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p>								
<p>Students may apply for the course by submitting the required application materials to the PSI registration site (https://problemsolving.law.umich.edu/) between February 23, 2018, and March 16, 2018.</p>

<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This course will challenge students to develop creative approaches to reducing the risk of brain injury in youth and high school football. Students will work in multi-disciplinary teams, under the guidance of the instructors, to conceive and propose novel solutions that draw on insights from law, engineering, medicine, business, ethics, and other relevant fields. Each student team will address a specific sub-topic relative to the course theme. Sub-topics may include: What changes in the rules governing practices, participation, and play should be instituted? What kinds of protective and monitoring equipment should be used, and under what protocols? How should such equipment be financed and distributed?</p>								
<p>Class time will focus on providing background information and discussion with topical experts. Students are expected to spend additional time outside of class contacting experts and researching scientific and lay materials. At the end of the term, students will present a proposal to an expert review panel.</p>								
<p>This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p>								
<p>Students may apply for the course by submitting the required application materials to the PSI registration site (https://problemsolving.law.umich.edu/) between February 23, 2018, and March 16, 2018.</p>

<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). We are facing what might be described as a failure or crisis of public trust in sources of truth about matters of fact. Public actors lie and accuse each other of lying. Media outlets present competing narratives. People do not know whom to trust or believe. Misinformation and conspiracy theories spread through social media. Our aim in this course will be to identify concrete potential interventions, solutions, or avenues for future exploration that might help people identify and trust sources of truth and/or that might mitigate the spread of misinformation. We will draw in insights from a range of inter-connected fields, including (but not limited to): psychology, communications, journalism, social media, information, computer science, law, and history. At the end of the term, students will present a proposal to an expert panel.</p>								
<p>This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p>								
<p>Students may apply for the course by submitting the required application materials to the PSI registration site (https://problemsolving.law.umich.edu/) between February 23, 2018, and March 16, 2018.</p>

Physical Education (PHYSED) Open Sections

NOTE - ENROLLMENT NOT GUARANTEED FOR STUDENTS OTHER THAN KINESIOLOGY MAJORS. ATTENDANCE AT FIRST CLASS IS MANDATORY TO RESERVE YOUR PLACE IN CLASS

NOTE - COURSES 140, 141, 142, 145, AND 349: CONTACT THE U-MOVE OFFICE (764-1342 OR U-MOVE@UMICH.EDU) FOR CLASS TIMES AND REGISTRATION INFORMATION.

140	Beginning Swim				1.00				
13669	PD LAB 001	MW	7-8PM	ARR	Starling		10	Y	
Class will be held in the CCRB Margaret Bell Pool.									
Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu . Little or no swim experience? This course is for you. You'll start with entering the pool and getting comfortable. You'll progress to front crawl, back crawl, elementary backstroke, breaststroke, sidestroke, and butterfly. And you'll learn jumping in, treading, and water safety. Goal: one length of the pool. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.									
22753	PD LAB 002	MW	7-8PM	ARR	Starling		10	Y	
Class will be held in the CCRB Margaret Bell Pool.

141	Begin Swim II					1.00	ADVISORY			
13671	PD LAB 001	MW	8-9PM	ARR	Starling			10		Y

Class will be held in the CCRB Margaret Bell Pool.
Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu. Beginning Swim II is for students who are already comfortable in the water and who can swim across the pool (the short way). The course works on building endurance and improving technique in freestyle, backstroke, elementary backstroke, breaststroke, sidestroke, butterfly, diving and treading water as well as water safety. Flip turns and other activities will be offered as skills advance. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.

Sport Management (SM) Open Sections

100	SM Freshmen Sem					2.00				
28698	P R SEM 001	F	11-1230PM	3735 CCRB	Donahue			1		Y

This section is held for Kinesiology students. Non-Kinesiology students should wait list under section 011.

Because Kinesiology holds SM 100 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

101	Pub&Small Grp Comm					3.00

Literature, Science & the Arts

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND:

- THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES;
- EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES;
- THE FIRST TWO MEETINGS OF HISTORY 396 AND 397;
- EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES;
- THE FIRST TWO MEETINGS OF COURSES IN OTHER SUBJECTS.

AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

STUDENTS MUST SHOW VERIFICATION OF REGISTRATION FOR CHEM 211 AT LAB CHECK IN AND CLAIM THEIR SPACES AT THE FIRST MTG OF THE LAB.

STUDENTS ARE AUTO-ENROLLED IN LECTURE WHEN THEY ELECT A LAB.

Any questions regarding enrolling for this course should be directed to the Chemistry Student Services Office at chemundergrad@umich.edu.

10966	A LEC 100	F	4-5PM	1800 CHEM	Nolta				
31586	A LEC 400	W	1-2PM	1640 CHEM	Wolfe				

Chem 211-400 is focused on techniques used for the synthesis, isolation, and purification of organic compounds, and the content differs from the 100, 200, and 300 sections. This is an honors section.

English Language Institute

English Language Institute (ELI) Open Sections

ELI courses fall into three categories:

1. English for Academic Purposes courses for graduate students;
2. Language and teacher training courses for international GSIs;
3. Teacher training courses for students planning to teach ESL in local communities or abroad.

For assistance in choosing an appropriate course, please go to the ELI Academic Advising website:
<http://bit.ly/eliadvising> or e-mail: eliadvisor@umich.edu to make an appointment to speak with an advisor.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The class will use the experience of the so-called Islamic State in Iraq and Syria (ISIS) to develop a plan for countering the ways in which extremist groups use social media to instigate acts of violence. The class structure will be collaborative and multidisciplinary. Class time will focus on providing background information on, and discussion about, the problem. Students will spend additional time outside of class meeting in groups, thinking through the problem, and doing research in the service of the final class project, which they will present at the end of the semester to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between February 23, 2018, and March 16, 2018.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This course will challenge students to develop creative approaches to reducing the risk of brain injury in youth and high school football. Students will work in multi-disciplinary teams, under the guidance of the instructors, to conceive and propose novel solutions that draw on insights from law, engineering, medicine, business, ethics, and other relevant fields. Each student team will address a specific sub-topic relative to the course theme. Sub-topics may include: What changes in the rules governing practices, participation, and play should be instituted? What kinds of protective and monitoring equipment should be used, and under what protocols? How should such equipment be financed and distributed?

Class time will focus on providing background information and discussion with topical experts. Students are expected to spend additional time outside of class contacting experts and researching scientific and lay materials. At the end of the term, students will present a proposal to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between February 23, 2018, and March 16, 2018.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). We are facing what might be described as a failure or crisis of public trust in sources of truth about matters of fact. Public actors lie and accuse each other of lying. Media outlets present competing narratives. People do not know whom to trust or believe. Misinformation and conspiracy theories spread through social media. Our aim in this course will be to identify concrete potential interventions, solutions, or avenues for future exploration that might help people identify and trust sources of truth and/or that might mitigate the spread of misinformation. We will draw in insights from a range of inter-connected fields, including (but not limited to): psychology, communications, journalism, social media, information, computer science, law, and history. At the end of the term, students will present a proposal to an expert panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between February 23, 2018, and March 16, 2018.

History Department

History (HISTORY) Open Sections

--IT IS CRITICAL THAT STUDENTS ATTEND CLASS FROM THE BEGINNING OF THE TERM. ALTHOUGH STUDENTS MAY BE OFFICIALLY REGISTERED FOR A COURSE, THE DEPARTMENT MAY DISENROLL ANY STUDENT NOT ATTENDING THE FIRST TWO COURSE MEETINGS.
 --DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE.
 --STUDENTS ARE ENCOURAGED TO USE THE WAITLIST FOR ANY CLOSED COURSE. STUDENTS SHOULD REGISTER ON THE WAITLIST ACCORDING TO PREFERRED SECTION AND ATTEND THE FIRST CLASS. UP TO THE FIRST DAY OF CLASS, OVERRIDES WILL BE GIVEN BY THE DEPARTMENT AS SPACE BECOMES AVAILABLE. STUDENTS ARE NOTIFIED AND GIVEN TWO DAYS TO USE THE OVERRIDE, AFTER WHICH THE SPOT MAY GO TO AN ALTERNATE STUDENT ON THE WAITLIST. ONCE CLASSES HAVE STARTED, STUDENTS (WAITLISTED OR NOT) MUST CONTACT THE INSTRUCTOR FOR AN OVERRIDE.

The Physics Department does not anticipate opening additional sections of PHYSICS 391. If there is only one 391 section that will fit into a schedule of required coursework and there are no open seats, students are invited to email physics.sso@umich.edu to join a department-maintained waitlist for that section. Please include a name, UMID, and the three-digit section number for the class you wish to wait for. If a seat opens in that section, students will receive a permission enroll in PHYSICS 390+391 together.

100	Practice of Writing		3.00						
18548	P REC 001	MW	10-11AM	2062 PALM	Karczynski		2		N
<p>Writing 100 is designed to help students of all levels improve their writing, but is best suited to those who have yet to fulfill the First-Year Writing Requirement. Upper-level students should have a compelling academic reason for enrolling in Writing 100.</p> <p>Normal waitlist procedures apply for students who attend the first two classes. Students who wish to join Writing 100 after the first two class sessions must email the instructor to set up a meeting to discuss enrolling. Based on this discussion, the student and instructor will then make a determination on whether or not it is appropriate for the student to enroll.</p>

Cog Neuro of Consciousness

The study of consciousness is considered a fundamental scientific and philosophical pursuit. How does information processing in the brain generate experience? How do we objectively capture what is, by definition, a subjective event? As philosopher Colin McGinn puts it, how do we get from the water of the brain to the wine of consciousness? I have recently started a Center for Consciousness Science at the UM Medical School to help address these very questions.

As an educational activity and the Center (and as a NGP faculty), I am conducting a combined reading/lecture course (NS-704) this upcoming semester on "The Cognitive Neuroscience of Consciousness." The study of consciousness is sometimes decomposed into "levels of consciousness" (awake vs. asleep vs. anesthetized vs. comatose) and "states of consciousness" (assuming I am already conscious, why do I see a blue triangle rather than a red square?). We will explore both of these dimensions and likely have some visiting lecturers/discussants to help us along the way.

The subject of consciousness motivated many of us to choose the field of neuroscience. I hope you will join me next month as we explore a fascinating question that has scientific, philosophical, clinical, and even existential implications. Even if you don't want to formally sign up for the course, you are welcomed to attend and participate.

What: NS704, The Cognitive Neuroscience of Consciousness

Who: Neuroscience and psychology students (and other interested people)

When: Fall semester, Wednesdays at Noon (pizza will be served!)

Where: Medical School, Med-Sci I, 7th floor conference room (#7433D)

Intermediate Hip Hop									
This class meets in Studio A. It is combined with a non-major section. 20 spots are available for majors and 15 spots are available for non-majors.									
This is an intermediate level course that builds on the skills in urban/commercial-style Hip Hop moves and rapid level changes for floor work. Choreography is provided and students will be able to develop according to individual style, ability, and personal interpretation. The history of this genre is examined through a commercial dance lens and elements of Hip Hop dance, as well as the role of dance in Hip Hop culture. There is also an opportunity for Freestyle, Old Style, Poppin', Lockin', and popular commercial dance styles such as Street Jazz and Jazz Funk. Students registered for this class should have taken some form of prior Hip Hop training/classes.

Learn to play the dynamic, subtle, transcendent music of the Javanese Gamelan! These classes are for people who want to experience a musical tradition totally different from western folk, rock or classical music. The gamelan is an ensemble of gongs, metallophones, drums, xylophone, a few stringed instruments, and singers. No previous knowledge of Indonesia or of music is expected. These courses are open to all students, undergraduate and graduate in all departments of the university. For information contact Susan Walton swalton@walton

Rhythmic Training								
Jazz majors only. Sophomore and above. This course seeks to improve the musician's rhythmic acuity through training in three main areas: Time (ability to keep a steady beat and flow), Phrasing (how things are placed in time), and Feel (rhythmic nuance, swing, groove, pocket). Most coursework will be completed with exercises in singing and clapping, using standard Jazz repertoire.

The course is about the classical music traditions of North India, also known as Hindustani music. The first half of the course focuses on acquiring mastery over the basic musical materials of this idiom through singing, improvisation, and transcription exercises. The second half of the course builds on these skills to theorize about and analyze aspects of North Indian classical pitch (i.e. raga) and rhythmic (i.e. tala) structure, form, performance practice, and their connection to other musical idioms, including the classical music of South India, and the classical and popular musical traditions of the West.

Intensity, Continuity, Pacing "Intensity, continuity, pacing" capture, for me, some of the ways that music creates drama and action. Pacing is speed or slowness, staying in the current moment, rushing ahead, drawing things out. Intensity can be as simple as loudness or softness or as complex as how strongly some music draws us into it. How a piece or passage "hangs together" is its continuity: a passage can move smoothly or abruptly to a succeeding passage; it can seem to contrast to a greater or lesser degree. If the terms I've chosen seem abstract, as they do to me, it is perhaps because they allude to qualities of sound that happen as time passes - qualities that can't be pinned down.								
The course will center on listening and performance oriented analysis. I hope students will bring a wide spectrum of specializations, interests and backgrounds to work with music that might range from the Renaissance through the twenty-first century.

Latina/o Theatre for Social Ch meet together with RC 334.004									
Artistic practice in prisons has occurred since the inception of prisons themselves, though popular thought tends not to connect the idea of the arts with that of criminal justice systems. This course surveys the history of performance in prisons through the examination of plays written by and about prisoners as well as narratives, which chronicle the process of creating theatre in prisons. More importantly, the course also requires all enrolled students to enter an adult prison once a week throughout the semester to lead a theatre workshop with prisoners. Students will be placed in pairs to facilitate workshops, and each workshop will hold a performance at the end of the semester. Students and prisoners together create social change through their performances, both by bringing two disparate communities (i.e. undergrads and prisoners) into meaningful interaction and also by using theatre to explore significant social issues.

Image of the American Family Meets with RCHUMS 282.001									
In this four credit drama course students will explore major American plays of the 20th century through the process of text analysis through performance. We will work on plays by major writers such as Arthur Miller, Tennessee Williams, Lorraine Hansberry, Sam Shepard and Tony Kushner. For each play we will discuss dramaturgical background, script and character analysis and put scenes on their feet for constructive critique. Written assignments will center on a journal which will include a series of actor's explorations of motivations and actions. Students will also be responsible for writing critiques of two productions. The course culminates in a public performance of a cutting of a major play, most likely Tony Kushner's "Angels in America."

The FLINT project									
This course will explore Documentary Theatre as a genre and its connection to Applied Theatre, exploring the creation of art- with and about different communities. Students will be required read documentary plays and scholarship tied into the pedagogy related to the process. Furthermore, students will be required to field work and travel to Flint, MI as part of the course to assist in the creative process of the FLINT,mi play that will be created by the instructor and produced by the Department of Theatre during the 2018/19 academic year.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The class will use the experience of the so-called Islamic State in Iraq and Syria (ISIS) to develop a plan for countering the ways in which extremist groups use social media to instigate acts of violence. The class structure will be collaborative and multidisciplinary. Class time will focus on providing background information on, and discussion about, the problem. Students will spend additional time outside of class meeting in

groups, thinking through the problem, and doing research in the service of the final class project, which they will present at the end of the semester to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between February 23, 2018, and March 16, 2018.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This course will challenge students to develop creative approaches to reducing the risk of brain injury in youth and high school football. Students will work in multi-disciplinary teams, under the guidance of the instructors, to conceive and propose novel solutions that draw on insights from law, engineering, medicine, business, ethics, and other relevant fields. Each student team will address a specific sub-topic relative to the course theme. Sub-topics may include: What changes in the rules governing practices, participation, and play should be instituted? What kinds of protective and monitoring equipment should be used, and under what protocols? How should such equipment be financed and distributed?

Class time will focus on providing background information and discussion with topical experts. Students are expected to spend additional time outside of class contacting experts and researching scientific and lay materials. At the end of the term, students will present a proposal to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between February 23, 2018, and March 16, 2018.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). We are facing what might be described as a failure or crisis of public trust in sources of truth about matters of fact. Public actors lie and accuse each other of lying. Media outlets present competing narratives. People do not know whom to trust or believe. Misinformation and conspiracy theories spread through social media. Our aim in this course will be to identify concrete potential interventions, solutions, or avenues for future exploration that might help people identify and trust sources of truth and/or that might mitigate the spread of misinformation. We will draw in insights from a range of inter-connected fields, including (but not limited to): psychology, communications, journalism, social media, information, computer science, law, and history. At the end of the term, students will present a proposal to an expert panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between February 23, 2018, and March 16, 2018.

Evaluating Public Policies									
This course is restricted for Ford School Seniors enrolled in the BA Program and that have completed STATS 250 (see note below).									
This 3-credit course will provide an introduction to the fundamentals of evaluation research design and methods as applied to public policies and programs. The course will cover the role of evaluation in the public policy process, and both process and summative evaluation research, including research designs for establishing causal inference between exposure to public policies/programs and outcomes. Students will gain skills in understanding and crafting research designs common in public policy evaluation, including randomized controlled trials, quasi-experimental designs and time series designs. Students will also gain skills in understanding/critiquing published public policy evaluation literature, measurement/data collection methods, and basic statistical methods for analyzing evaluation data. Class format will include lecture, discussion of case studies, and small group applied exercises.

This section of 510 aims to help you better understand policy analysis and the political environment within a context of American domestic politics at the national level.										
Policy analysis is a discipline that brings systematic thinking and social scientific evidence to bear on substantive problems. The premise of this course is that policymakers seldom value that analysis as much as we do. Many are skeptical about what social science can contribute to solving public problems, often rightly so. Others see policy analysis as material to be deployed selectively and strategically in political battles fought on other terms. In today's highly partisan, often hyperbolic politics, bringing reason and evidence to bear on public problems is more challenging than ever.										
By the end of the course, you will understand the political environment in which policy specialists operate: the participants who shape policy within particular domains; the ways in which they perceive problems and solutions; the information, interests, and ideologies likely to govern their actions; the strategies they use; and the institutional arrangements and processes that shape their behavior and constrain their decisions. A final but important purpose of the course is to help you work on your writing and, to a lesser extent, your oral communication skills.

This is a core course restricted to Ford School students only. Registration is by permission										
This section of 510 follows the policymaking process after legislators claim credit and the TV cameras shut down: the work of trying to implement and interpret the law. In the United States, this process is guided by the executive branch, through rulemaking, and the judicial branch, through oversight. But as we will see, neither of these two branches of government operate in isolation from each other, from Congress, or most importantly, from the democratic process. This extent to which bureaucracy and the courts are insulated or open to public influence, and the channels through which that influence occurs, explain a large part of what happens ?on the ground? in the United States. It also serves as a key point of contrast in understanding how policymaking in other countries compares to the United States.

There is no policy without victory. More precisely, well-planned and well-executed political campaigns win elections and make governing possible. Therefore, an understanding of government must first be grounded in an understanding of campaigns and elections. This course will introduce you to the art and science of political campaigning. Topics to be covered will include crafting a message, scheduling and time management, research, issues, polling, speeches, debates, working with the press, identifying, differentiating and targeting voters, coalitions and interest groups, budgeting and fundraising, field organization, crisis management, the political environment, and Get Out The Vote efforts.

The class structure will be collaborative and multidisciplinary. Class time will focus on providing background information on, and discussion about, the problem. Students will spend additional time outside of class meeting in groups, thinking through the problem, and doing research in the service of the final class project, which they will present at the end of the semester to an expert review panel.										
This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.										
Students may apply for the course by submitting the required application materials to the PSI registration site (https://problemsolving.law.umich.edu/) between February 23, 2018, and March 16, 2018.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This course will challenge students to develop creative approaches to reducing the risk of brain injury in youth and high school football. Students will work in multi-disciplinary teams, under the guidance of the instructors, to conceive and propose novel solutions that draw on insights from law, engineering, medicine, business, ethics, and other relevant fields. Each student team will address a specific sub-topic relative to the course theme. Sub-topics may include: What changes in the rules governing practices, participation, and play should be instituted? What kinds of protective and monitoring equipment should be used, and under what protocols? How should such equipment be financed and distributed?										
Class time will focus on providing background information and discussion with topical experts. Students are expected to spend additional time outside of class contacting experts and researching scientific and lay materials. At the end of the term, students will present a proposal to an expert review panel.										
This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.										
Students may apply for the course by submitting the required application materials to the PSI registration site (https://problemsolving.law.umich.edu/) between February 23, 2018, and March 16, 2018.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). We are facing what might be described as a failure or crisis of public trust in sources of truth about matters of fact. Public actors lie and accuse each other of lying. Media outlets present competing narratives. People do not know whom to trust or believe. Misinformation and conspiracy theories spread through social media. Our aim in this course will be to identify concrete potential interventions, solutions, or avenues for future exploration that might help people identify and trust sources of truth and/or that might mitigate the

spread of misinformation. We will draw in insights from a range of inter-connected fields, including (but not limited to): psychology, communications, journalism, social media, information, computer science, law, and history. At the end of the term, students will present a proposal to an expert panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between February 23, 2018, and March 16, 2018.

Nat'l Security Decision Making

The National Security Council (NSC) remains the pinnacle of national security decision-making more than 70 years after the National Security Act of 1947. The National Security Advisor and related NSC staff are the linchpins for providing the President and other senior officials with policy recommendations, options and courses of action to confront a range of complex national security challenges. At the same time, the NSC is arguably the least understood and most complex organization involved in the national security arena, since a complete understanding of the inner workings are difficult to discern without direct experience within it. This class will examine NSC organizational frameworks, bureaucratic processes and policy priorities adopted by a number of administrations--and will also compare and contrast the approaches that delivered desired results and those that led to unexpected outcomes. The course will involve simulations of national security policy decisions and guest speakers.

Instructor: Javed Ali is a Towsley Policymaker in Residence at the Ford School during fall semester, 2018. Javed has over twenty years of professional experience in national security and intelligence issues in Washington, D.C. He began his federal government career in 2002 and worked in the Defense Intelligence Agency, the Department of Homeland Security, and the Federal Bureau of Investigation. He also held senior roles while on joint duty assignments at the National Intelligence Council, the National Counterterrorism Center, and the National Security Council--where he completed a year of service from March 2017 to March 2018 as the Senior Director for Counterterrorism. Javed holds a BA in Political Science from the University of Michigan, a JD from the University of Detroit School of Law, and a MA in International Relations from American University .

Michigan Politics & Policy

Climate change often feels like a problem that our brains have been hardwired to ignore. Climate change is abstract and complex, making it hard for non-scientists (including policy-makers) to understand. For most Americans, it is a problem that will harm people who are far away in time and geography. And the significant political polarization surrounding climate change has turned it into a form of identity politics. Yet like so many environmental problems?from habitat destruction to overconsumption of natural resources?climate change is the result of human behavior. If we want to solve or mitigate these problems, we must first understand what is driving these beliefs and behaviors.

Most policy to address environmental issues such as climate change has focused on legal or economic tools such as prohibiting certain forms of pollution or giving subsidies for renewable energy. In this discussion-based policy seminar, we will examine an alternative framework for motivating environmentally-friendly behavior: psychological and social incentives. We will explore factors affecting climate change beliefs and related behaviors, including reactions to and support for policies. The focus will be primarily on the US, and we will discuss policy programs and private interventions that have incorporated social psychological research to promote climate change mitigation as well as potential new applications of this research. Although this class will mainly cover climate change and other environmental issues, the psychological tools we will discuss are used in other domains as well, so will be useful to students interested in a range of policy topics.

Initiative (PSI). The class will use the experience of the so-called Islamic State in Iraq and Syria (ISIS) to develop a plan for countering the ways in which extremist groups use social media to instigate acts of violence. The class structure will be collaborative and multidisciplinary. Class time will focus on providing background information on, and discussion about, the problem. Students will spend additional time outside of class meeting in groups, thinking through the problem, and doing research in the service of the final class project, which they will present at the end of the semester to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between February 23, 2018, and March 16, 2018.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This course will challenge students to develop creative approaches to reducing the risk of brain injury in youth and high school football. Students will work in multi-disciplinary teams, under the guidance of the instructors, to conceive and propose novel solutions that draw on insights from law, engineering, medicine, business, ethics, and other relevant fields. Each student team will address a specific sub-topic relative to the course theme. Sub-topics may include: What changes in the rules governing practices, participation, and play should be instituted? What kinds of protective and monitoring equipment should be used, and under what protocols? How should such equipment be financed and distributed?

Class time will focus on providing background information and discussion with topical experts. Students are expected to spend additional time outside of class contacting experts and researching scientific and lay materials. At the end of the term, students will present a proposal to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between February 23, 2018, and March 16, 2018.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). We are facing what might be described as a failure or crisis of public trust in sources of truth about matters of fact. Public actors lie and accuse each other of lying. Media outlets present competing narratives. People do not know whom to trust or believe. Misinformation and conspiracy theories spread through social media. Our aim in this course will be to identify concrete potential interventions, solutions, or avenues for future exploration that might help people identify and trust sources of truth and/or that might mitigate the spread of misinformation. We will draw in insights from a range of inter-connected fields, including (but not limited to): psychology, communications, journalism, social media, information, computer science, law, and history. At the end of the term, students will present a proposal to an expert panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between February 23, 2018, and March 16, 2018.
