Intro Improv/Comp/Arranging

In the music-creating fields of improvisation, composition, and arranging the importance of imagination and creativity in contrast to the display and growth of technique and skills or ?arts and crafts? are among the most debated and divisive parities in these fields. This is also true in how these subject areas are taught at all levels of the education process. The basic premise of this course therefore is not to present uniform answers to these questions but rather explore, discuss, and debate the merits of a multitude of methods through practice. Since these are all hot button topics in the field of Music Education the other goal of this course is for participants to find a pedagogical voice and comfort zone for both creation and pedagogy. Please note the instructor is completely committed to helping and engaging students from all levels and backgrounds in these areas, including those with no experience who even fear these topics and have avoided them in school.

The workshop is geared toward middle-school and high-school band and orchestra teachers. Participants will have opportunities to share ideas and resources about a variety of topics relevant to the practice of teaching instrumental music for beginning through advanced level instrumental ensembles. Piano Skills MusEd

This workshop will explore piano skills that many music teachers find practical in their field. These skills include fundamental technical skills (scales, arpeggios, chords, and more), sight-reading, harmonization and transposition, improvisation, chord arrangements and accompanying, overview of music theory and keyboard harmony, and score-reading (both instrumental and choral). Participants will have an opportunity to receive one-on-one instructions on solo repertoires of an appropriate level (both for participants and for their potential students), as well as an opportunity for performing ensemble repertoires. All music teachers with experience in various settings, including choral, orchestral, or instrumental, are welcome. Basic background in piano studies (equivalent to courses such as undergraduate core curriculum class piano) is preferred but not mandatory.

Gender&Sexual Identity Pop Mus

While most music scholars agree that music reflects the particular time and place from which it originates, some would go so far as to argue that, in some circumstances, music can also act as the driving force behind shifts in social mores and attitudes. Scholars of popular music, for example, point to the role played by music in such events as the civil rights and anti-war movements as examples of its power to enact social change. In this course, we will examine how popular music has contributed to changing attitudes about gender and, relatedly, about sexual identity over the past five decades. In the case of gender, we will examine how the second- and third-wave feminist movements of the 1960s and 1990s opened new roles to female musicians in the construction of popular culture, and how some of these musicians, in turn, used their fame to push the boundaries faced by women even further. Notably, this portion of our discussion will look at the impact of such female icons as Siouxsie Sioux, Madonna, Alanis Morissette, and Lady Gaga on existing limitations placed upon women by the music industry and by society more broadly. In tandem with our discussion of music and gender, we will also examine how the notion of sexual identity was challenged and problematized by popular musicians in the wake of the 1969 Stonewall riots, the rise of gay activism in the 1970s, and the AIDS crisis of the 1980s. Here, we will look at the trend in popular culture towards alternative forms of gender performance, embodied by such artists as Boy George, Annie Lennox, k.d. lang, and Genesis P-Orridge. At the heart of the class is the question of how music can effect social change ? a topic that will be of interest to music educators who hope to connect music to the student's broader cultural experience.
