31493	P W LEC 066	TTH	10-1130AM	1025 GGBL	Bills			
	Travel Behavior Analysis Frcast							
	This course provides an introduction to analysis and forecasting of passenger travel behavior. Topics range from the fundamentals of utility theory and discrete choice modeling to basic forecasting and scenario analysis. The course includes lectures and group projects using real world datasets.							
31478	P W LEC 068	TTH	1-230PM	1045 GGBL	Masoud			
	Transportation Data Analytics							
	The course covers topics in predictive data analytics where computers are enabled to learn hidden structures from data without being explicitly programmed. Topics include supervised (classification and regression), unsupervised, reinforcement, and probabilistic learning. Examples are drawn from the field of transportation systems.							
30924	P W LEC 120	T	5-8PM	1012 FXB	Kamat			
	Building Information Modeling							
	Fundamentals of Building Information Modeling (BIM) methods and their significance in project management and collaboration; Application of BIM in primary construction management functions such as coordination, design clash detection, sequencing, safety, logistics, and communication; BIM-based Integrated Project Delivery (IPD) approach and the project lifecycle; Reality capture methods for as-built documentation in BIM; BIM in facility and asset

Electrical Engr & Computer Sci

Electrical Engineering And Computer Science (EECS)

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE ELECTRICAL ENGINEERING AND COMPUTER SCIENCE DEPARTMENT MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND THE FIRST WEEK OF LECTURES AND LABS/DISCUSSIONS (AS APPROPRIATE) FOR ANY EECS COURSES.

AT THE SAME TIME, THE EECS DEPARTMENT IS NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

30955	S W LEC 005	W	1230-130PM	AUD CHRYS	Shtein		

Intro to Entrepreneurial Des

Entrepreneurial Design is a cross-disciplinary course and lab for current and potential entrepreneurs, designers, hackers, makers, founders, and doers. The focus is on learning to hack things together and experience the fun of building, with minimal technical mumbo-jumbo.

This class covers topics in 3D modeling and 3D printing, machining and metal working, embedded systems and microelectronics, apps and web development as it relates to design and entrepreneurship.

28723	P W LAB 007	W	130-430PM	ARR	Vitale, Shtein		
-------	-------------	---	-----------	-----	----------------	--	--

Machining/Metal Working

Entrepreneurial Design is a cross-disciplinary course and lab for current and potential entrepreneurs, designers, hackers, makers, founders, and doers. The focus is on learning to hack things together and experience the fun of building, with minimal technical mumbo-jumbo.

This class covers topics in machining and metal working as they relate to design and entrepreneurship. This class meets in the conference room of the Wilson (Student and Team Project) Center, 2603 Draper, N. Campus

28724	P W LAB 008	F	1-4PM	1321 DC	Alexander-Adams, Shtein		
-------	-------------	---	-------	---------	-------------------------	--	--

Hardware/Coding, IoT

Entrepreneurial Design is a cross-disciplinary course and lab for current and potential entrepreneurs, designers, hackers, makers, founders, and doers. The focus is on learning to hack things together and experience the fun of building, with minimal technical mumbo-jumbo.

This class covers topics in embedded systems and microelectronics they relate to design and entrepreneurship. (Hardware/Coding, Internet of Things)

28725	P W LAB 009	T	1-4PM	1401 DC	O'Grady, Shtein		
-------	-------------	---	-------	---------	-----------------	--	--

3D Printing/Prototyping

Entrepreneurial Design is a cross-disciplinary course and lab for current and potential entrepreneurs, designers, hackers, makers, founders, and doers. The focus is on learning to hack things together and experience the fun of building, with minimal technical mumbo-jumbo.

This class covers topics in 3D modeling and 3D printing as they relate to design and entrepreneurship.

28726	P W LAB 010	M	12-3PM	1401 DC	O'Malley, Shtein		
-------	-------------	---	--------	---------	------------------	--	--

Virtual Reality

Students would develop virtual reality content (for the Oculus Rift or MIDEEN) using the Unreal Engine and 3D Studio Max. The skill building phase of the class would involve an introduction to asset creation (3d modeling with 3D Studio Max) and scene assembly/functionality (Bringing developed assets into the Unreal Engine & creating interactive experiences through Unreal's Blueprint system). Using these skills students would be capable of developing virtual reality experiences, simulations, or tools to address real-world problems.

-------	-------------	---	-------	----------	---------	--	--

E-Commerce Entrepreneurship

The E-Commerce Entrepreneurship course is designed to introduce students to the online world of business, retail, and commerce. With the increasing popularity of shows like Shark Tank and the ease of setting up an online business, people are more than ever interested in setting up their own online business. The class will address the expected challenges and help students gain the knowledge they would need to start their own online business upon completion of the course.

-------	-------------	---	-------	---------	-------	--	--

Digital Product Design

This is a studio course that teaches students how to design products for digital platforms. The course is intended to prepare students who want to work as a professional product designer. After course completion, students will have the skills and portfolio to pursue internships or full-time work as designers at a technology company.

The course will be hands-on in a small classroom setting. Because this is a studio course, most of the class time will be spent on discussion, critique, and time for independent work on students' own projects with guidance from instructors. . No prior product design experience is necessary.

You will learn to :

Design your own products by creating wireframes, interactions, and visual designs

Validate you solutions with prototypes and user testing

Use typography, color, shape, space -- and industry-standard tools -- to build designs that are functional, usable, and delightful

Solicit constructive feedback, critique design work, and substantiate criticisms

The course will in many ways emulate the environment of a product design team at a tech company.

Students will use collaborative tools like Slack, Wake etc to share and discuss their work

Students will be expected to work independently, taking responsibility for all aspects of their design work

Students will be expected to critique each other's work and collaborate on projects. Much of the grade will be based on in-class participation.

407	Entrepreneurship Hr				1.00
20774	P W SEM 001	F	1230-130PM	STAMPS	Gibson, Gordon

Entrepreneurship Hour
This seminar series is designed to expose students to entrepreneurship through interaction with experienced entrepreneurs, business leaders, and venture capitalists as well as individuals involved in emerging business models, new venture creation, and technology commercialization. While covering a broad set of engineering disciplines, guest speakers will share their knowledge on the latest, most diverse practices on legal, financial, and other innovation issues. The lectures include leading entrepreneurs and executives, technology innovators, experts from the financial markets, and others who support the entrepreneurial infrastructure. Following these seminars, students will be able to meet the guest speakers along with other members of the entrepreneurial community.

408	Patent Law				1.00
24352	P W LEC 001	T	6-8PM	1024 FXB	Fidler

Patent Law
Prereq: Sophomore standing or above

The FIRST meeting date is 1/31/17.

Inventors and entrepreneurs have four concerns related to patent law:

1. protecting inventions during product development
2. determining invention patentability
3. avoiding infringement
4. leveraging a patent as a business asset

This course addresses these concerns through the application of case law and business cases to an invention of a student's choice.

Entrepreneurship Practicum

Pre-requisite: Sophomore standing or above.

24367	P RW LEC 002	T	6-8PM	1005 EECS	White
-------	--------------	---	-------	-----------	-------

Entrepreneurship Practicum

This section of 411 is focused on Engineering Technology. Pre-requisite: Sophomore standing or above.

Engineers are accustomed to applying technology to the design of a new product. This course will give engineers and others the skills needed to develop a technology company. Specifically, students will apply the scientific method and lean startup principles to design a business (i.e., create a business model) that is sustainable, scalable, and repeatable. The following is a sampling of the topics the course will address:

- *Opportunity scoping and validation
- *Tech startup business models
- *Tech business life cycles
- *Techniques for gathering marketplace intelligence
- *Competitive positioning and strategy
- *Rapid, effective prototyping
- *Pitching business opportunities to potential investors, colleagues, and employees

Organizational Mgmt in Startup

Organizational Mgmt Startups - Winter 17 will meet Fridays from 9:00am-11:00am, in R2310 BUS on Central Campus.

This course is designed to teach the fundamentals of identifying and prioritizing the "who" (human resource capital) and the "what" (skill sets) needed for your venture to grow and thrive. Building and managing a world-class team is one of the most critical factors determining the success of a company. You will learn the fundamentals of establishing and protecting a corporate culture, and best practices in recruiting, interviewing, and managing your organization. You will learn how to keep employees motivated, accountable, and happy. Students will also study what to do in failure mode to resolve internal conflicts and terminate team relationships when necessary. Course work includes selected readings in organizational structure and development, case study review, and in-class discussion and active role play exercises designed to demonstrate skill proficiencies. The Instructor has been the CEO and President of both public and private companies, including on-going corporations and start-ups that were both successes and failures.

Creativity & Design Innov

Students from ALL schools and colleges may take this course.

If you place yourself on the waitlist, it is highly likely you will be allowed in the course.

=====

Creativity & Design - Strategies for Innovation

The course is a hands-on, interactive, immersion into personal creativity and the design thinking process. Using tools for self-awareness, discovery and curiosity, the course will explore how people, places and practices foster human creativity. Students will discuss: What is creativity? How can a person become more creative? In order to become more creative, students must be willing to look within themselves and share what they find. The design thinking portion of the course will include a team assignment exploring problem framing and solution analysis, as well as storytelling practices via presentations at the end of the semester.

The course's objectives for its students will be:

- A paradigm shift- to learn about other ways of thinking and principles that can pivot their approach to viewing and reacting to the world.
- Defining creativity- to create a working definition so that the students can achieve a clearly identified goal.
- ID your personal creative style via discovering what you are most enthusiastic about and what types of endeavors make you excited to create.
- Discuss methods and approaches that contribute to individual, team and organizational creativity- how you can bring down barriers to creative thinking and the importance of attitude and positive affirmations.
- Develop a skill set and program of continuing study and practice that develops creative mentors, practices and environments..
- Gain confidence in your creative talent.
- Learn the importance of consumer / audience qualitative research and understanding in the design process.
- Develop a working knowledge of the ?design thinking? process.
- Practice problem framing and solution analysis to help with with organizational design.
- Learn how to apply the design thinking process to build solutions and innovations.
- Expand creative ability and increase productivity and happiness by learning about obstacle removal in creative practice.
- Explore team building exercises and processes with the hope that there will be a resulting change in attitude--that our thoughts and actions are not in isolation. Partnership and community are critical to both creative living and design success.

Autonomous Vehicle Data

Enrollment is by instructor consent. Students must send a resume and one-page statement of interest to cfidh@umich.edu. If admitted, the instructor/Law School will then notify CFE so an electronic permission can be entered to allow the enrollment.

Autonomous Vehicle Data: Privacy, Regulatory, and Business Issues

This course is one of two new interdisciplinary problem solving pilot courses offered at the Law School in winter 2017. Graduate and professional students in business, engineering, law, and public policy are eligible to take this course.

Working as a group, students will create an operational plan and supporting documents for a hypothetical client that obtains data on autonomous vehicle activities in the course of administering an autonomous vehicle network. The client might be a municipality that operates a connected vehicle infrastructure or a commercial firm that provides technological or network services and obtains activity data as a byproduct. The project deliverable will include an analysis of opportunities and risks associated with usage of the data and various documents necessary to implement an operational plan in this space (e.g., a data privacy policy, user licenses or releases, insurance riders, or indemnification agreements). Class sessions will focus heavily on presentations or interviews with industry or academic experts. Students will also be expected to spend significant time outside of class working in teams to reach out to industry players, conduct research, draft documents, and otherwise work toward course deliverables. Although students will be broken into teams and assigned different projects, the class as a whole will work as a team to create a single deliverable.

Creative Process & Engineering

In this course sponsored by ArtsEngine, students explore the creative process through a structured sequence of exercises in four studio modules: sound, motion, visual images/objects, and verbal/symbolic language. Faculty from Art & Design (Andrew Thompson); Music, Theatre & Dance (Amy Chavasse); Architecture (Gregory Saldana); and Engineering (Jeremy Bond) introduce a variety of creative strategies for generating problem solving ideas through hands-on projects. Weekly colloquia (Stephen Rush), discussions, and readings supplement projects. Grading is based upon attendance, class participation, a journal, four mini-projects, evidence of intellectual and creative process development, and a final culminating project. This course is appropriate for UM undergraduate students at all levels and in all disciplines. It is a fast paced, information-rich educational experience, offering insights that will make creativity and innovation an integral part of life and work.

STUDENTS ELECTING LAB (102-105) WILL BE AUTO-ENROLLED IN LEC 100 & DIS 101 (meditation session, which is optional).

Materials Science & Engineering

Materials Science Engineering (MATSCIE)

220 Intro Mat & Man **4.00 ENFORCED**

10815 AR LEC 100 MWF 1130-1230PM AUD CHRYS Wynarsky

Structure, properties, and processing relationships in engineering materials. This section is particularly well-suited for Aerospace and NERS students (minor added emphasis on composites and radiation effects on materials).

10816 P RW DIS 101 TH 1130-1230PM 3427 EECS Shahbazian

10817 P RW DIS 102 TH 1030-1130AM 1006 DOW Odykirk

10818 P RW DIS 103 TH 130-230PM 1014 DOW Eszlinger

31002 P RW DIS 104 TH 1130-1230PM 3150 DOW Coyle

25071 P RW LEC 200 MW 330-530PM 224 GFL Yalisove

This section of MSE 220 is a team based and project based version of the class where the first introduction to the material is NOT lecture, but rather annotated reading. Class time will consist of active learning activities.

There will be three group projects in this class. Students will be required to purchase an electronic textbook via the Canvas site that will be live in December. The book will cost ~\$70 or ~\$55 for a rental and students will also be required to purchase a subscription to Learning Catalytics (\$12). There are no other fees for the course.

Homework is graded for effort and honesty - not accuracy. Quizzes are graded by averaging a closed book, closed notes, individual effort, with an open book, open internet, group effort. You will be rewarded for hard work and honesty on homework and exams without the angst of 100% summative assessment. Do not purchase the book at this time. More information will be available on the following website: <http://java.engin.umich.edu/220w17>

Design for Global Health							
Design for Global Health: Medical device usability testing and iterative design							
Human factors methods and extensive end user engagement during the product development process have been shown to improve product quality, tailor design features to the real needs of end users, improve product uptake, and reduce training prior to use. This project-based course will focus on the front and middle phases of the product design process, specifically the application of human factors and usability engineering to improve product design. Emphasis will be placed on medical devices for low- and middle-income countries, using methods that are generalizable to non-medical devices and high-income countries. Additional topics include user- and context-centered design processes, formative and summative evaluation techniques, medical device use error, and regulatory practices. Students will work in teams to apply these techniques to medical device prototypes in use or development for global health applications, apply for IRB approval to conduct usability testing, and perform iterative design informed by usability testing results. Students will also explore the current state of global health technologies and analyze successfully commercialized technologies, identifying common design attributes across commercialized technologies. Class meetings will consist of lectures that introduce concepts, design methods, and tools; active learning exercises (e.g., group discussions, case studies, critical reviews of literature); and group work / lab time. Senior undergraduate engineering students may take the course with permission from the instructor.

Living with Cerebral Palsy: A Multidisciplinary Approach								
Living with Cerebral Palsy: A Multidisciplinary approach								
W17- no enrollment in this section.								
27514	P RW LEC 003	M	1-3PM	2135 NQ		Bodary		
For W17, AT 413.003 will not accept enrollment. AT 413.003 is crosslisted as MOVESCI 413.003 and KINESLGY 413.003.								
Rationale. Wearable technology to track training intensity, training stress and recovery is expanding exponentially in the consumer marketplace. In this course, students will have the opportunity to explore the utility of some of these technologies and to consider 1) what challenges exist with current technology; 2) what benefit future technologies might bring; and 3) interact with current wearable technology company scientists and leaders to gain perspective directly from industry professionals.								
Aims. The primary goal of the course is to give students hands-on experience working with and evaluating wearable technology. Students will have the opportunity to address their own research questions by designing small-scale projects, collecting and analyzing physiologic data, and preparing storyboard and video presentations to share their results. By participating in the course, students will also develop their inquiry and analysis, quantitative literacy, and communication skills.								
27516	P RW LEC 004	W	3-5PM	1401 DC		Gross		
Advisory Prereq: MOVESCI 330; In this course you will use motion capture to collect and analyze biomechanical data in a group project. The course format is blended - online assignments before class will prepare you for hands-on learning activities during class.

	Research in Sponsorship, Sport Management						
	This course will meet in CCRB 3745D.						
	This course is an elective graduate course in sport management. The main goal of this course is to provide students with both a theoretical and an applied understanding of the values and limits to sponsorship-linked marketing. The course takes an interdisciplinary approach and treats sponsorship as a contributor to an overall communications platform. Most importantly, throughout this course, students will develop and conduct a sponsorship research that can address ongoing issues in the sponsorship industry.

27489	P RW LEC 003 M		1-3PM	2135 NQ		Bodary	
CV Ex Phys							
Advisory Prerequisite: MOVESCI 340							
Rationale. Wearable technology to track training intensity, training stress and recovery is expanding exponentially in the consumer marketplace. In this course, students will have the opportunity to explore the utility of some of these technologies and to consider 1) what challenges exist with current technology; 2) what benefit future technologies might bring; and 3) interact with current wearable technology company scientists and leaders to gain perspective directly from industry professionals.							
Aims. The primary goal of the course is to give students hands-on experience working with and evaluating wearable technology. Students will have the opportunity to address their own research questions by designing small-scale projects, collecting and analyzing physiologic data, and preparing storyboard and video presentations to share their results. By participating in the course, students will also develop their inquiry and analysis, quantitative literacy, and communication skills.							
27490	P RW LEC 004 W		3-5PM	1401 DC		Gross	
Motion Capture							
Advisory Prereq: MOVESCI 330; In this course you will use motion capture to collect and analyze biomechanical data in a group project. The course format is blended - online assignments before class will prepare you for hands-on learning activities during class.

Physical Education (PHYSED)

140	Beginning Swim	1.00		
13730	PD W LAB 001 MW	7-8PM	ARR	Starling
Class will be held at CCRB in the Bell Pool. Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu. Little or no swim experience? This course is for you. You'll start with entering the pool and getting comfortable. You'll progress to front crawl, back crawl, elementary backstroke, breaststroke, sidestroke, and butterfly. And you'll learn jumping in, treading, and water safety. Goal: one length of the pool. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.				
23978	PD W LAB 002 TTH	8-9PM	ARR	Starling
Class will be held at CCRB in the Bell Pool. 141	Begin Swim II	1.00	ADVISORY	
14899	PD W LAB 001 MW	8-9PM	ARR	Starling
Class will be held at CCRB in the Bell Pool. Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu. Beginning Swim II is for students who are already comfortable in the water and who can swim across the pool (the short way). The course works on building endurance and improving technique in freestyle, backstroke, elementary backstroke, breaststroke, sidestroke, butterfly, diving and treading water as well as water safety. Flip turns and other activities will be offered as skills advance. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.				
23979	PD W LAB 002 TTH	7-8PM	ARR	Starling

142	Intermediate Swim	1.00		
13731	PD W LAB 001 MW	7-8PM	ARR	Thelen
Class will be held at CCRB in the Bell Pool. Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu. Pre-req: Must have ability to swim one length (long way) each of crawl, backstroke and breaststroke. Intermediate swim focuses on refining strokes while building endurance. Each of the strokes will be taken apart and put back together better than before! Other topics covered include laps, treading water, diving and water safety. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.

Literature, Science & the Arts

NOTE--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY STUDENT'S PLACES IN A COURSE IF THEY DO NOT ATTEND:
 ---THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES;
 ---THE FIRST MEETINGS OF HISTORY 396 AND 397;
 ---EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES;
 ---EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES;
 ---THE FIRST TWO MEETINGS OF COURSES IN OTHER DEPARTMENTS.

AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

Chemistry Department

Chemistry (CHEM)

--A GRADE OF C- OR BETTER MUST BE OBTAINED IN ALL CHEMISTRY COURSES PREREQUISITE TO SUBSEQUENT CHEMISTRY COURSES.
 --ROOM A706 IS A WHEELCHAIR EQUIPPED LAB.
 --A STUDENT WHO DOES NOT ATTEND THE FIRST MEETING OF A BIOLOGY, CHEMISTRY, OR PHYSICS LABORATORY MAY BE DROPPED FROM THE COURSE FOR NON-ATTENDANCE. ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE MATCHES THE COURSES THEY ARE ATTENDING.

This section (Section 300) will use individualized, small group discussions of the laboratory experiments led by a graduate student instructor and eliminate the large, theater-like classroom lectures. Students will not solely be learning chemistry concepts, but will be performing experiments and interpreting data as its collected, in an effort to teach students how to conduct research in ways that scientists conduct their research in professional laboratories

Please contact Samuel Esarey if you have questions: slesarey@umich.edu

English Language Institute

English Language Institute (ELI)

ELI courses fall into three categories:

1. English for Academic Purposes courses for graduate students;
2. Language and teacher training courses for international GSIs;
3. Teacher training courses for students planning to teach ESL in local communities or abroad.

For assistance in choosing an appropriate course, please go to the ELI Academic Advising website:
<http://bit.ly/eliadvising> or e-mail: eliadvisor@umich.edu to make an appointment to speak with an advisor.

To enroll in this course, students need to:

1. Submit a portfolio. Portfolios should be submitted directly to the instructor of each section. For priority consideration, portfolios should be submitted no later than 5pm on Friday, March 24, 2017. Students should receive notification of their acceptance (or not) no later than Tuesday, March 28, 2017.

2. Students are encouraged to consider a second-choice section (where available) as a potential back-up, and make contact with that instructor.

Note: Students who are currently a declared creative-writing minor or English sub-concentrator will receive alternative enrollment instructions. Creative-writing minors and English sub-concentrators are not required to submit a portfolio for review.

11433	PI W SEM 001	W	4-7PM	4207 AH	O'Dowd		
To enroll in this course, students need to:							
1. Submit a portfolio. Portfolios should be submitted directly to the instructor of each section. For priority consideration, portfolios should be submitted no later than 5pm on Wednesday, November 16, 2016. Students should receive notification of their acceptance (or not) no later than Monday, November 28, 2016.							
2. Students are encouraged to consider a second-choice section (where available) as a potential back-up, and make contact with that instructor.							
Note: Students who are currently a declared creative-writing minor or English sub-concentrator will receive alternative enrollment instructions. Creative-writing minors and English sub-concentrators are not required to submit a portfolio for review.

11255	A	LEC 100	MW	10-1130AM	140 LORCH	Kossoudji		
-------	---	---------	----	-----------	-----------	-----------	--	--

Students will be auto-enrolled in Section 100 when they elect Sections 101-111.
This class has a scheduled evening midterm on Wednesday, February 22nd. If you will be unavailable to take this exam, you should not register for this section of Econ 101.

Rooms are still being assigned to Econ 101 discussion sections. Although some sections are larger than others during registration, no section will have more than 34 students once rooms are assigned. Your section number may change after we receive confirmation about the rooms, but the time and the day of your section and lecture will not change.

History Department

History (HISTORY)

--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS.

--ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION PROCESS TO MAKE SURE THAT THEIR OFFICIAL COURSE SCHEDULES MATCH THE COURSES THEY ARE ATTENDING.

--100 THRU 500 LEVEL 4 CREDIT HOUR COURSES ARE 4 CREDIT HOURS FOR UNDERGRADUATES ONLY.

--SURVEY AND INTRODUCTORY COURSES ARE FOR FRESHMEN AND SOPHOMORES.

--SURVEY COURSES REQUIRE BOTH LECTURE AND DISCUSSION SECTIONS. DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE.

Mathematics Department

Mathematics (MATH)

---MATH DEPARTMENT POLICY REQUIRES THAT STUDENTS ATTEND BOTH OF THE FIRST TWO CLASS MEETINGS (OR NOTIFY THE INSTRUCTOR IN ADVANCE OF THEIR ABSENCE) OR THEY MAY BE DROPPED FROM THE CLASS.
 ---ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE OF COURSES MATCHES THE COURSES THEY ARE ATTENDING.

---MATHEMATICS DEPARTMENT POLICY LIMITS STUDENTS TO A MAXIMUM OF 4 CREDITS FOR COURSES NUMBERED BELOW 112.

DAYS	TIME	LOCATION		
111	Intro to Psych	4.00		
11909	A LEC 030	MW	4-530PM	AUD 3 MLB
Students are auto-enrolled in Lec 030 when they elect a Dis 031-043.				
18682	P RW DIS 032	F	10-11AM	1632 CHEM
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
11911	P RW DIS 033	F	9-10AM	B844 EH
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
16487	P RW DIS 034	TH	7-8PM	271 WEISER
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
11912	P RW DIS 035	F	10-11AM	1628 CHEM
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
11915	P RW DIS 036	F	8-9AM	1060 EH
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
11914	P RW DIS 037	F	11-12PM	1405 EQ
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
11913	P RW DIS 038	TH	12-1PM	3816 SSWB
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
19323	P RW DIS 039	F	1-2PM	2328 SEB
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
19324	P RW DIS 040	F	3-4PM	1068 EH
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
21306	P RW DIS 041	F	1-2PM	B830 EQ
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
21307	P RW DIS 042	TH	5-6PM	B852 EQ
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
21308	P RW DIS 043	F	2-3PM	1068 EH
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
18278	P RW LEC 060	TTH	10-12PM	1800 CHEM
LECTURE 060 - Students interested in this Lecture, register for LEC 111-060 only. There is no associated discussion section.				
30869	A LEC 070	TTH	230-4PM	AUD AAH
Students are auto-enrolled in Lec 070 when they elect a Dis 071-082.				
30870	P RW DIS 071	T	6-7PM	1060 EH
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
30871	P RW DIS 072	T	7-8PM	1060 EH
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
30872	P RW DIS 073	W	8-9AM	1372 EH
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
30873	P RW DIS 074	W	9-10AM	B830 EQ
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
30874	P RW DIS 075	W	12-1PM	B830 EQ
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
30875	P RW DIS 076	W	2-3PM	2114 MLB
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
30876	P RW DIS 077	W	5-6PM	B830 EQ
All sections meet from the 1st day of class, even if they occur before the 1st lecture.				
30877	P RW DIS 078	W	6-7PM	1060 EH
All sections meet from the 1st day of class, even if they occur before the 1st lecture.

Romance Languages Department

French (FRENCH)

--DROP POLICY: A student who misses either of the first two meetings of any course offered by the Department of Romance Languages may be dropped from the course for non-attendance.
 --PLACEMENT TEST: Students with any previous study of French must take the French placement test before enrolling. Placement test dates are online at:
www.lsa.umich.edu/rll/undergraduate/languageplacement/languageplacementtests.
 This does not apply to students enrolling in French graduate-level courses.

Sociology Department

Sociology (SOC)

--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS.

--TO ASSIST THE STUDENT IN SELECTING COURSES, PAST COURSE SYLLABI ARE AVAILABLE AT: www.lsa.umich.edu/soc/syllabi.

Statistics Department

Statistics (STATS)

---IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS.

---ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE OF COURSES MATCHES THE COURSES THEY ARE ATTENDING.

12052 P W LAB 008 M 830-10AM G444C MH Soncrant

12053 P RW LAB 009 T 1-3PM G444A MH Romero

This lab is a CSP lab. CSP sections are scheduled for more hours per week than a routine section of the same course. Some of that time is devoted to workshop activities, e.g., problem solving, practice tests, review of assignments and instruction in learning skills. There is also provision for more individual instruction in the form of additional office hours, instructor conferences, appointments with a Course Assistant, etc.

Human Neuroanatomy --- This course focuses on key structural aspects of the human brain with an emphasis on function. We will make heavy use of clinical case studies largely in small working groups to uncover how and why symptoms linked to neurological disorders exist. For these case studies, 3-dimensional visualization tools and hands-on examination and limited dissections of human brains will be used to highlight the elegant anatomical relationships of sensory, motor, emotional, and cognitive systems.

Intro to Improv								
This course provides an introduction to the practice of dance improvisation. Students will develop basic skills to create movement themselves and consider how to craft images and dances in the moment both individually and in groups. Through movement exercises, explorations in space, readings, journal writings, and discussions, this class will introduce both trained and new movers that improvisation can be a fun, exciting journey full of play, innovation, and reflection.

Intro to Mod/Cont Floor Work								
In this introductory technique class derived from Bartenieff and release inspired training, we will be looking to imagine the floor as a mobile surface to interact with. Each class will begin with a full-bodied warm-up that utilizes elements of improvisation to engage and awaken the senses. We will progress through explorations of levels and textual dynamics that establish/re-enforce the dancers' relationship to the floor. The class will steadily build in physicality and complexity towards more challenging floor phrases as the semester advances.

Contact Improv								
This course is designed to allow movers from all backgrounds to engage in a physical practice that creates awareness of the self, while embarking on shared partnered experience. This class will start with the fundamental workings of Contact Improvisation (CI). With a background in martial arts, the instructor will draw from these motifs to provide platforms into shared movement works. The culmination of the work will result in a performance to share these physical conversations.

Plan Career in Arts

In order to forge a viable performing arts career, young professionals need a compass ? a flexible frame for goal-setting, actively making decisions about career advancement, and broadcasting these activities in compelling ways. Through this course, students will develop an individualized strategic plan for their arts career. Using the Business Model Canvas, we will examine each of the nine building blocks of creative enterprise as it relates to individual career planning, including: how you help (value proposition), who helps you (key partners), who you are/what you have (key resources), what you do (key activities), how you interact (customer relationships), who you help (customers), how they know you and your work (channels), what you give (costs), what you get (revenue and benefits). Utilizing weekly exercises and in-class discussion, you will be challenged to consider all elements of the cultural ecosystem. Your culminating project will be a personal strategic plan to shape your future success. Students will develop storytelling skills, strategies for developing all 9 building blocks, tactics for adjusting one?s plan based on changes in market conditions, and foundational training in how to translate one?s goals for various audiences.

Note: This course will also utilize the EXCEL Expo Day on Saturday, February 18 as a hands-on networking immersion experience.

Business of Chamb. Mus.

Winter 2017: Meets 1/4, 1/11, 1/18, 1/25, 2/1, 2/15, 2/22 and 1/28 (9 am - 12 pm).

Chamber music provides vibrant and rewarding career paths for individuals and ensembles, but too often goes unexplored because musicians lack the skills and knowledge needed. This course fills this gap by exploring chamber music outside of the rehearsal room, providing students with the insights and tools needed to jumpstart sustainable career in professional chamber music. Students will learn an entrepreneurial approach to small ensemble music making, including such topics as: for-profit and non-profit business models, the importance of branding, DIY marketing, financial planning, legal pitfalls in the field, fundraising, and how to engage with audiences, managers, and granting organizations. The course will be led by clarinetist, U-M alumna, and award winning chamber musician Kari Landry, who is one of the founding members of the nationally acclaimed Akropolis Reed Quintet. She also holds a masters degree in Arts Management and serves as Marketing and Programs Manager for the Ann Arbor Summer Festival, presenting 150+ concerts and events annually in the heart of Ann Arbor. Class meetings will include periodic visits from additional members of the Akropolis Reed Quintet and a weekend intensive on January 28. Coursework will include in-class activities, short presentations, and several written assignments designed to help students create personalized building blocks to construct their own professional goals. At course?s end, participants will walk away with a detailed business plan, outlining their path to success as an entrepreneurial chamber musician.

Grant Writing for Artists

Grant writing can be an integral tool for performing artists to create and support their art. In this course, you will explore the kinds of grants available to performing artists, and learn how and where to look for potential funders that match your needs. You?ll learn how to create a budget for an artistic project, how to inquire about funding from potential donors, how to organize and write a grant proposal, and how to assemble a proposal package with strong and pertinent supporting documents. We will look at ways to make your grant proposal stand out from the pack, and what to learn when a grant request is declined?or accepted. Finally, we?ll discuss how to write thank-you letters and funding reports, and how to develop long-term relationships with funders in your community, corporations, private foundations, and government agencies. In this mini course, you will develop a suite of small projects and exercises geared toward writing successful grants. Students will complete the course with a full grant proposal ready to send to a potential funder.

Inside Music&VidTech Industry

Inside the Music and Video Technology Industry explores how leading audio, music, and video technology companies, such as Sonos, Adobe, Smule, Dolby, iZotope, Universal Audio, and Avid, bring products from idea to market. We examine best practices, roles, day-to-day responsibilities, desired skill sets, and department/team function. This is an online class taught by Jay LaBoeuf (Stanford University) with support from U-M PAT faculty. Jay will visit U-M to meet with class members and participants will be assigned a U-M alumni mentor. There is a required \$50 registration fee.

After completing Careers in Media Technology, learners should...

- ? Know the leading companies involved in the media technology industry.
 - ? Understand the goals, responsibilities, and daily life of a software engineer, UI/UX designer, product manager, and program manager in industry.
 - ? Understand how teams collaborate to conceive, design, and commercialize new software and hardware products.
- Understand what hiring managers look for in new interns and full-time hires.

Perf. Career as Teach Artist

Winter 2017: Meets 1/14 and 2/18 from 10:00 - 11:00 am in 1350 Moore (Watkins) and on 1/28 and 1/29 9:00 am - 5:00 pm in 1380 Moore (Hankinson). Orchestras, dance companies, theatres, and presenters (such as our own University Musical Society) employ musicians, actors, and dancers?both full-time and part-time?as teaching artists. A teaching artist is a professional performer who works in educational settings to share the power and possibilities within their art form with audiences young and old. Such work may involve partnering with K-12 teachers to inspire creativity in the classroom or working collaboratively with audiences in an immigrant community, hospice, or teen center to help individuals connect their identities to the arts. For performers, a career as a teaching artist can

provide a foundation for a vibrant and artistic professional life. In this new course, student performers will work with teaching artist trainers from the New York Philharmonic to learn about the philosophy and career trajectory of teaching artists, while developing skills to succeed in this field. An activity-based intensive, this course will center on a two-day weekend workshop taking place on Saturday, January 28, and Sunday, January 29 (from 9 am ? 5 pm), preceded by a one-hour intro class and followed by a one-hour reflection class on Saturday, January 14, and Saturday, February 18 (from 10 ? 11 am). Assignments will include light reading on the philosophy and practice of teaching artistry, and students will be encouraged to lay the groundwork for their own teaching artist projects. Students must be able to attend all sessions to receive full credit. Instructors are Hilary Easton (dancer/choreographer) and Richard Mannoia (clarinetist) of the New York Philharmonic Teaching Artist Faculty, with support from the University Musical Society and EXCEL. The course will include a special visit by Inon Barnatan (piano) and Anthony McGill (clarinet).

Starting Music Businesses

The music industry today has undergone enormous changes fueled by both social and technological shifts. In this course, participants will work in teams to learn about the business of music today, identify industry needs within the U-M campus community, and ideate a new product or service idea to meet that need. Teams will then conduct customer discovery, explore legal barriers, formulate and validate a test with a sample customer group, and pitch their results to the class and other campus stakeholders. This course may be taken as a stand-alone, or as a practicum for the Entrepreneurship Minor.

Plan Career in Arts

In order to forge a viable performing arts career, young professionals need a compass ? a flexible frame for goal-setting, actively making decisions about career advancement, and broadcasting these activities in compelling ways. Through this course, students will develop an individualized strategic plan for their arts career. Using the Business Model Canvas, we will examine each of the nine building blocks of creative enterprise as it relates to individual career planning, including: how you help (value proposition), who helps you (key partners), who you are/what you have (key resources), what you do (key activities), how you interact (customer relationships), who you help (customers), how they know you and your work (channels), what you give (costs), what you get (revenue and benefits). Utilizing weekly exercises and in-class discussion, you will be challenged to consider all elements of the cultural ecosystem. Your culminating project will be a personal strategic plan to shape your future success. Students will develop storytelling skills, strategies for developing all 9 building blocks, tactics for adjusting one?s plan based on changes in market conditions, and foundational training in how to translate one?s goals for various audiences.

Note: This course will also utilize the EXCEL Expo Day on Saturday, February 18 as a hands-on networking immersion experience.

Business of Chamb. Mus.

Winter 2017: Meets 1/4, 1/11, 1/18, 1/25, 2/1, 2/15, 2/22 and 1/28 from 9:00 am - 12:00 pm.

Chamber music provides vibrant and rewarding career paths for individuals and ensembles, but too often goes unexplored because musicians lack the skills and knowledge needed. This course fills this gap by exploring chamber music outside of the rehearsal room, providing students with the insights and tools needed to jumpstart sustainable career in professional chamber music. Students will learn an entrepreneurial approach to small ensemble music making, including such topics as: for-profit and non-profit business models, the importance of branding, DIY marketing, financial planning, legal pitfalls in the field, fundraising, and how to engage with audiences, managers, and granting organizations. The course will be led by clarinetist, U-M alumna, and award winning chamber musician Kari Landry, who is one of the founding members of the nationally acclaimed Akropolis Reed Quintet. She also holds a masters degree in Arts Management and serves as Marketing and Programs Manager for the Ann Arbor Summer Festival, presenting 150+ concerts and events annually in the heart of Ann Arbor. Class meetings will include periodic visits from additional members of the Akropolis Reed Quintet and a weekend intensive on January 28. Coursework will include in-class activities, short presentations, and several written assignments designed to help students create personalized building blocks to construct their own professional goals. At course?s end, participants will walk away with a detailed business plan, outlining their path to success as an entrepreneurial chamber musician.

Grant Writing for Artists

Grant writing can be an integral tool for performing artists to create and support their art. In this course, you will explore the kinds of grants available to performing artists, and learn how and where to look for potential funders that match your needs. You?ll learn how to create a budget for an artistic project, how to inquire about funding from potential donors, how to organize and write a grant proposal, and how to assemble a proposal package with strong and pertinent supporting documents. We will look at ways to make your grant proposal stand out from the pack, and what to learn when a grant request is declined?or accepted. Finally, we?ll discuss how to write thank-you letters and funding reports, and how to develop long-term relationships with funders in your community, corporations, private foundations, and government agencies. In this mini course, you will develop a suite of small projects and exercises geared toward writing successful grants. Students will complete the course with a full grant proposal ready to send to a potential funder.

Inside Music&VidTech Industry

Inside the Music and Video Technology industry explores how leading audio, music, and video technology companies, such as Sonos, Adobe, Smule, Dolby, iZotope, Universal Audio, and Avid, bring products from idea to market. We examine best practices, roles, day-to-day responsibilities, desired skill sets, and department/team function. This is an online class taught by Jay LaBoeuf (Stanford University) with support from U-M PAT faculty. Jay will visit U-M to meet with class members and participants will be assigned a U-M alumni mentor. There is a required \$50 registration fee.

After completing Careers in Media Technology, learners should...
 ? Know the leading companies involved in the media technology industry.
 ? Understand the goals, responsibilities, and daily life of a software engineer, UI/UX designer, product manager, and program manager in industry.
 ? Understand how teams collaborate to conceive, design, and commercialize new software and hardware products.
 Understand what hiring managers look for in new interns and full-time hires.

Perf. Career as Teach Artist

Winter 2017: Meets 1/14 and 2/18 from 10:00 - 11:00 am in 1350 Moore (Watkins) and on 1/28 and 1/29 9:00 am - 5:00 pm in 1380 Moore (Hankinson). Orchestras, dance companies, theatres, and presenters (such as our own University Musical Society) employ musicians, actors, and dancers?both full-time and part-time?as teaching artists. A teaching artist is a professional performer who works in educational settings to share the power and possibilities within their art form with audiences young and old. Such work may involve partnering with K-12 teachers to inspire creativity in the classroom or working collaboratively with audiences in an immigrant community, hospice, or teen center to help individuals connect their identities to the arts. For performers, a career as a teaching artist can provide a foundation for a vibrant and artistic professional life. In this new course, student performers will work with teaching artist trainers from the New York Philharmonic to learn about the philosophy and career trajectory of teaching artists, while developing skills to succeed in this field. An activity-based intensive, this course will center on a two-day weekend workshop taking place on Saturday, January 28, and Sunday, January 29 (from 9 am ? 5 pm), preceded by a one-hour intro class and followed by a one-hour reflection class on Saturday, January 14, and Saturday, February 18 (from 10 ? 11 am). Assignments will include light reading on the philosophy and practice of teaching artistry, and students will be encouraged to lay the groundwork for their own teaching artist projects. Students must be able to attend all sessions to receive full credit. Instructors are Hilary Easton (dancer/choreographer) and Richard Mannoia (clarinetist) of the New York Philharmonic Teaching Artist Faculty, with support from the University Musical Society and EXCEL. The course will include a special visit by Inon Barnatan (piano) and Anthony McGill (clarinet).

Open Mic Seminar

The Open Mic stage is a brave place where amateurs become professionals, and professionals become amateurs. Seasoned and resilient performers like Prince and Louis CK have been known to return again and again to Open Mics in order to restart from zero and develop brand new material in front of new crowds. Lots of folks focus intensely on their A-plans in school, though essential Eureka! moments often happen on the side stages (during fun, or during the sudden need for a Plan B).

This class will help develop your skills as a performer (solo and accompanimental), composer/arranger, and leader/follower. Stage management skills, rehearsal skills, adaptability, interdisciplinarity, ensemble building, and audience building will all be brought into focus. Each class will be a performance/feedback session, and each participant will be expected to experiment with new creative and collaborative avenues throughout the term. Each class will be 5-6 performances (15 min each) & discussion

Each enrollee must:

- bring a guest audience member to class on days when you perform
- perform 4 times/semester (2x solo, 2x leading a group)
- perform 4 times/semester as accompanist for someone else's performance
- do 4 stage management services (to learn to help run the show and support the scene)
- mix up performances - follow new directions each time, try different instruments, styles, etc., and be willing to learn to adapt to unexpected twists of plan

Enrollees are welcome to bring guests performers to join their performance.

Beethoven Quartets							
This seminar combines the reading of scholarly monographs and articles from the last ten years in ethnomusicology with discussions about the field that range from theoretical to pedagogical concerns. The course is directed at doctoral students with a serious interest in ethnomusicology (including specialists and those from other disciplines) and involves copious reading, analytical discussions, class presentations, and a final paper.

The Amplified Guitar							
This graduate seminar will consider the amplified guitar from a variety of perspectives. As a group and at the beginning of the term, members will cover fundamental historical and technical topics, including the instrument's history beginning with the era of acoustic recording, through the invention and commercial production of the electromagnetic pickup and amplifiers, up to today's designs; instrument manufacture, marketing, and sales; analog and digital processing and the myriad ways electric guitar signals are reshaped and augmented (electric guitarists will be encouraged to discuss their gear, solid-state and/or tube amplification provided in the classroom); key recordings, recordists, styles, and approaches; guitarists on television and in film. As the term continues, the seminar will focus on the cultural meaning of the amplified guitar, its music and players. Seminar members will be encouraged to develop innovative topics and approaches, and conduct original research. Subjects of exploration are impossible to anticipate, but might touch on matters of virtuosity, affect, fandom, virtual learning (YouTube and online tutorials), the amplified guitar in global contexts, the material culture or iconography of the electric guitar.							
Students will be expected to make regular and useful contributions to the work of the seminar and undertake original, interdisciplinary research. They may anticipate substantial reading, music-listening, and viewing assignments; two oral presentations and two papers (approx. 20 pp. each) due at midterm and the end of the semester. Should a waiting list form, the instructor reserves the right to determine admissibility.

Mus, Cult&Indigen Philippines							
Music, Culture, and Indigenity of the Philippines: This course provides a general survey on the musics of the Philippines and the diaspora, including the performance traditions of different indigenous peoples, religious and ritual music, popular music, and music in diasporic communities (mainly in the United States). Lectures, classroom, and online work will cover a variety of indigenous genres while also taking into account the intersections between maritime Southeast Asia and the West. Hands-on participation music workshops and guest presentations will engage the students in understanding the theoretical concepts when learning and performing traditional Philippine ensemble music. Prior music experience is not required.

Wellness for Performing Artist							
This class is designed to introduce students in the performing arts to wellness topics and somatic practices with the aims of preventing injury, developing kinesthetic awareness and exploring the role of the expressive body as an integral component of performance. Active participation through movement and in-class performance are required. Topics that will be addressed include performance anxiety, stress management, nutritional health, Yoga, Alexander Technique, Feldenkrais, and Laban Movement Analysis.

Inside Music&VidTech Industry

Inside the Music & Video Technology Industry explores how leading audio and music technology companies, such as Pandora, Adobe, Smule, Dolby, iZotope, Line 6, and Avid, bring products from idea to market. We examine best practices, roles, day-to-day responsibilities, desired skillsets, and department/team function. This online seminar is intended for all students considering full-time positions or internships in the music, audio, and video tech industry. No prior engineering background required. Topics include: software development in large organizations, UX/UI design, marketing, hardware development, product management, advanced technology and research, project management, sales, data and analytics, executive teams, and operations (HR, IP/patents). Online lectures available. Class will meet twice during 8 weeks. Online office hours include discussion and meetings with leading industry professionals.

In partnership with dozens of companies and industry mentors, we are breaking down how some of the greatest products were made, how these companies operate, and the roles and skills involved. Join us on this adventure - meet and interact with the leading companies in the music industry.

Dialogue of the Senses

Meets in DL3 in the Duderstadt. In this course, we will take time out to consider our senses, the mechanisms by which we gather information about the world around us. The course's objective is to heighten our awareness of how we interact with our environment and, by so doing, to cause us to re-think how we interact with the computational media we create.

Through a series of lectures and practical exercises, the course will explore the capabilities of each of our senses. However, in reality, our senses do not act in isolation, but support a continual dialogue between our bodies and the world with which we interact. The latter part of the course will therefore focus on a series of labs and projects that explore how such interactions can impact the way in which we design media and physical interfaces for a range of applications including art installations and musical instruments.

CAT#	Course Title	CR	PREREQ	LAB FEE
Class #	CODE CMP SEC DAYS	INSTRUCTOR		
	TIME	LOCATION		

Drawing on research from the fields of psychology, design and human-computer interaction (HCI), the course will pull together what is known about our senses into a design practice that better acknowledges the capabilities of our moving, acting, thinking bodies.

> Labs will include exploring the sound and texture of food, testing our ability to name odors, discovering how scent influences memory, seeing how colour influences taste, and so on. > For your final project, you will be required to design an interactive application, installation or piece that exploits the interaction between two or more of our senses.

Prerequisites:

There are no prerequisites for this class, though some familiarity with software prototyping environments for audio/visual media such as Max MSP or Final Cut Pro. is required. Familiarity with hardware prototyping platforms such as Arduino is also desirable

30436 P W LEC 007 MW 2-330PM 376 SM Granzow

Digital Fab. for Acoustics

This course explores digital fabrication applied to acoustics and instrument design. Students learn 3D printing and laser cutting, conduct sound-based experiments with materials, and design custom musical objects. Acoustic principles are applied in computer-aided design and verified through simulation and making. Readings in musical acoustics, contemporary organology and critical making support class discussion and critique.

Inside Music&VidTech Industry

Inside the Music & Video Technology Industry explores how leading audio and music technology companies, such as Pandora, Adobe, Smule, Dolby, iZotope, Line 6, and Avid, bring products from idea to market. We examine best practices, roles, day-to-day responsibilities, desired skillsets, and department/team function. This online seminar is intended for all students considering full-time positions or internships in the music, audio, and video tech industry. No prior engineering background required. Topics include: software development in large organizations, UX/UI design, marketing, hardware development, product management, advanced technology and research, project management, sales, data and analytics, executive teams, and operations (HR, IP/patents). Online lectures available. Class will meet twice during 8 weeks. Online office hours include discussion and meetings with leading industry professionals.

In partnership with dozens of companies and industry mentors, we are breaking down how some of the greatest products were made, how these companies operate, and the roles and skills involved. Join us on this adventure - meet and interact with the leading companies in the music industry.

Dialogue of the Senses

Meets in DL3 in the Duderstadt. In this course, we will take time out to consider our senses, the mechanisms by which we gather information about the world around us. The course's objective is to heighten our awareness of how we interact with our environment and, by so doing, to cause us to re-think how we interact with the computational media we create.

30439 P W LEC 007 MW 2-330PM 376 SM Granzow

Digital Fab. for Acoustics

This course explores digital fabrication applied to acoustics and instrument design. Students learn 3D printing and laser cutting, conduct sound-based experiments with materials, and design custom musical objects. Acoustic principles are applied in computer-aided design and verified through simulation and making. Readings in musical acoustics, contemporary organology and critical making support class discussion and critique.

Music in Political Film							
How does music affect our perception of political film? How does music manipulate our feelings for or against the subject matter? In this course we will survey some of the major films in this genre, beginning with Battle of the Somme (1916), and ending with Songs of War (2012) as well as more recent political films. In addition to readings on the political/historical topic, we will learn basic terminology and analytical techniques for film music.

Journey Through Archetypes					
The archetypes are the essences of myths and legends from many diverse cultures. They are not fully developed characters but images, forms, voices, physicalizations and a few psychological elements or shards that will help to organize your being around a recognizable phenomena (archetype) and bring you to the starting point of full character development. In this course, we will be exploring breath and voice and its full energy potential.					
31850	P W REC 006	TTH	1130-1PM	B222 WDC	Casas
Hip Hop Theatre					
This course will explore the theatrical genre known as Hip-Hop Theatre through: readings, class discussions, live performances, and devised art-making, culminating in the development and performances of Hip-Hop Theatre productions by the class. Defined as theatre that is developed using elements of Hip-Hop culture: DJ'in, Emceeing' (rapping), Breakdancing', Graffiti Art, Beatboxing' and Knowledge as the primary means of storytelling on stage. Hip-Hop takes these dynamic that have made this culture a worldwide phenomenon and fuses them with traditional theatrical devices in its attempt to reaffirm the power of the stage.

PHYSICAL SOLUTIONS IN THEATER					
This class will explore the act of original creation from multiple vantage points. We will commit to working together as an ensemble in order to devise and perform a physical theater work loosely based on texts, visual images, and conceptual ideas that are explored through abstraction, deconstruction, kinesthetic analyzes, embodied movement, special patterns, work with objects, and shape and design. The class will culminate in a public performance.

Vict World of Gilbert&Sullivan					
MEETS W/ENGLISH 346.001					
TOPSY-TURVY: THE VICTORIAN WORLD OF GILBERT AND SULLIVAN					
Created in London between 1871 and 1896, the comic operas of W. S. Gilbert (librettist) and Arthur Sullivan (composer) have been widely performed for more than a century. This course introduces students to the late nineteenth-century context of Gilbert and Sullivan's theatrical collaboration, focusing in particular on aspects of Victorian culture that they parodied through words and music.					
Each week we will read and discuss one of the 'Savoy' operas, mostly in chronological order, combining selected historical readings with analysis of literary, theatrical, and musical elements. We will also consider the award-winning film, 'Topsy-Turvy,' and attend a live performance presented by the University of Michigan Gilbert and Sullivan Society. Throughout the semester we will reflect on the critical and creative possibilities of parody.					
This course fulfills the Poetry requirement for English majors. It is open to students across all departments. Previous experience with performance is welcome, but not required. Course requirements include regular attendance and active participation in class, weekly short response papers, a longer critical essay (written in several drafts), a creative response, and a reflection on the final writing portfolio. No mid-term, no final exam.

This four-part lecture course will challenge participants to think critically about various dimensions of leadership in a dynamic and changing health care landscape. Students will learn first-hand from Mr. Nelson's experience as a leader in a publicly held company using UnitedHealth Group as a living case study.

The Winter 2017 course begins January 16, 2017 and ends February 24, 2017. Students should anticipate a light-to-moderate workload (approximately 2 hours/week depending on the level of engagement). All sessions are facilitated online with the exception of 1 in person discussion section facilitated by Institute for Healthcare Policy and Innovation faculty. Please choose one of the 90 minute seminar sections and then you will be automatically registered for section 001.

School Of Public Policy

Public Policy (PUBPOL)

300	Persuasive Policy Wr	3.00
32627	P RW SEM 001 MW	1-230PM 1220 WEILL Chimera

This course, structured as a seminar and writing workshop, intensively develops students' persuasive writing and critical reading skills through abundant practice and feedback. Weekly writing assignments and exercises will focus on every stage of the writing process, from brainstorming and research through drafting and revision, in three vital areas of political writing: the short opinion piece, the policy memorandum, and the polemical essay. We will read and analyze a wide variety of examples from traditional print and online media, from journalistic, government, and academic sources. We will also explore ethical considerations of policy writing, considering the ways in which our rhetorical choices—tone, word choice, even syntax—construct our subjects and frame contentious issues for target audiences.

THE COURSE IS OPEN TO STUDENTS OUTSIDE THE FORD SCHOOL CONDITIONAL ON PERMISSION OF THE INSTRUCTOR AFTER SUBMISSION OF A WRITING SAMPLE. Non-Ford students should contact the instructor via email at bchimera@umich.edu to inquire.

Soc Justice & Poli Conflicts

This is a course for students interested in social justice and equality, social justice movements, anti-democratic movements and the intersections of public leadership, public policy, and the rule of law in the context of the temporal evolution of the democratic state. It will seek to provide a comparative and global understanding of how social movements have shaped understandings and discourses of human rights over time. It will address the role of civic movements and leaders in transforming social understandings and meanings of the concepts human rights (social, political, economic and environmental rights) over the last two centuries. It will explore the relations between individual action, collective processes and outcomes as these affect and are shaped by the contexts of system, institution, law and public policy. It will address how inherent and intersecting relations of power, systems and structures of dominance are related to the experience of peace, violence, oppression and social resistance. As these are often textured into the context of politics, economics and the environment. It will explore the relationship between public policy, the law, institutional structure, social norms, social conditioning, ideologies, strategic communicative interaction, group engagement and imperial behaviors in the public spheres. It will pay special attention to the consequences social movements, social actors and leaders produce for politics, the economy, the environment, justice, equality, human rights and human lives. This course will introduce students to the intellectual and technical rigors of democratic, non-violent and effective leadership in the spheres of policy, the law and society. It will explore the social and political endeavors of such leaders and movements to address the difficult questions facing our world today. In this way it will provide an overview of how such leaders negotiate, manage and resolve conflicts in organizational and intra-organizational settings. Importantly it will provide students with a theoretical understanding of how trans-generational and social trauma comes to bear on successful institutional, systemic, and programmatic intervention at the nexus of social justice work and public policy.

Comp Law & Policy

This class provides a foundational understanding of comparative law and selected foreign legal systems. The first part of the course is devoted to understanding the different families of law. We will discuss civil law, common law, socialist law, customary law, Islamic law and others. In addition, we will explore country specific examples. In the second part of the course, we discuss ways to approach comparative law, and explore how laws are compared. Both the first and second parts of the course lead into the third where we will use our knowledge to explore practical policy applications of comparative law: How can laws successfully be transplanted one from country to another? How can law be used to further development? How do different systems address religious differences? How are legal systems rebuilt after wars?

Facilitating Dialogue This is a short introductory course module in facilitating complex and difficult dialogic moments of engagement in the social, professional and institutional spheres of the public arena. Its purpose is to provide the possibility for actual engagement with tense social issues and phenomena bedeviling complex societies. It will briefly explore the historical and theoretical contexts, which give rise to sometimes painful and traumatic moments that filter in and color what may otherwise be perceived as simplistic conversations and interactions. It will introduce students?regardless of perceived color, gender, class, or ethnic identity categorization to the necessity for transcending their subject locations. In order to facilitate, mediate, and engage in trans-formative moments of learning, dialogue, leadership and communal capacity building with due regard of difference and the respect of mutuality.

NGOs in Policy Formation Taught by Towsley Policymaker in Residence Hardy Vieux (Legal Director at Human Rights First)							
This class will explore the role of non-governmental organizations in formulating policy. Globally, there are currently some 3.7 million NGOs in operation. Given this proliferation and the ostensible influence of NGOs, this class will delve into what makes an NGO unique from other institutions engaged in policy formulation and how that role impacts the policy-making process. We will explore the core activities of NGOs through the lens of current policy debates, such as the global refugee crisis and the war on terror. The class seeks to make students aware of the myriad questions and nuances that beset NGOs and the array of strategies and tools available to NGOs to impact policy.

Survey Design Part of successful management is knowing how employees, managers, citizens, and other stakeholders think and feel about organizations in general, about particular policies, and about new initiatives and programs. It?s also often important to know whether interventions are working: For example, if a manager has tried to change employee behavior in some way, are employees actually making the desired changes? How can managers get honest feedback about employee morale? When measuring public opinion on a complicated issue, how can you be sure that the responses you get are truly answering the questions you were trying to ask? When you are asking people to self-report about their behaviors, when can you trust their responses? In this module, students will be taught best practices for how to design and implement surveys to assess issues like employee morale, public opinion, and program success. Students will not only review and assess existing survey research, but will gain hands-on experience in designing survey

Working in Diverse Orgs

The workforce of the 21st century is increasingly diverse. Productive managers cannot afford to ignore this diversity, and can benefit greatly from it. Yet we are often nervous about discussing and embracing issues of diversity, equity, and inclusion and many otherwise strong leaders are blind to the ways their own biases might affect their teams. In this module, students will learn about potential blind spots such as unconscious bias and its effects on employee hiring and retention, how the desire to avoid negative emotions might get in the way of productive management, and the dangers of groupthink, as well as learning strategies to avoid or address these problems. The readings will draw on empirical research from social psychology and organizational behavior, as well as real-world examples of diversity issues in the workplace.

Autonomous Vehicle Data

Autonomous Vehicle Data: Privacy, Regulatory, and Business Issues

This course is one of two new interdisciplinary problem solving pilot courses offered at the Law School in winter 2017. Graduate and professional students in business, engineering, law, and public policy are eligible to take this course.

Working as a group, students will create an operational plan and supporting documents for a hypothetical client that obtains data on autonomous vehicle activities in the course of administering an autonomous vehicle network. The client might be a municipality that operates a connected vehicle infrastructure or a commercial firm that provides technological or network services and obtains activity data as a byproduct. The project deliverable will

include an analysis of opportunities and risks associated with usage of the data and various documents necessary to implement an operational plan in this space (e.g., a data privacy policy, user licenses or releases, insurance riders, or indemnification agreements). Class sessions will focus heavily on presentations or interviews with industry or academic experts. Students will also be expected to spend significant time outside of class working in teams to reach out to industry players, conduct research, draft documents, and otherwise work toward course deliverables. Although students will be broken into teams and assigned different projects, the class as a whole will work as a team to create a single deliverable.

Combat Human Trafficking in US
 Combatting Human Trafficking within Vulnerable Families in the United States

This course is one of two new interdisciplinary problem solving pilot courses offered at the Law School in winter 2017. Graduate and professional students in business, dentistry, law, medicine, nursing, pharmacy, public policy, public health, and social work are eligible to take this course.

Working as a group, students will design a multidisciplinary comprehensive plan to combat human trafficking within the child welfare system in the United States. We will focus both on the trafficking of children within the child welfare system, as well as the previous or continuing trafficking of parents within that system. In other words, this plan will explicitly address the issue of intergenerational trafficking. Students will work collaboratively across disciplines to create a coherent and trauma-informed plan to present to a hypothetical client such as a municipality, a state court administrative agency, or a foundation. Class sessions will focus heavily on presentations or interviews with experts. Students will also be expected to spend significant time outside of class working in teams to reach out to relevant stakeholders, conduct research, draft documents, and otherwise work toward the creation of the strategy. Although students will be broken into teams and assigned different projects, the class as a whole will work as a team to create a single multidisciplinary plan.

Policy & Mgmt in the Nonprofit

The nonprofit sector has emerged as one of the cornerstones of American society, and yet remains very much a work in progress. The "third sector" faces unique and evolving pressures in areas such as social enterprise, philanthropy, mission focus, performance measurement, sector blur, and more. In our class we will examine how some of these broad issues intersect with the day to day operation of nonprofit organizations. By considering sector tensions from a management perspective, ultimately we will each develop our own informed view on the appropriate role and function of the nonprofit sector within society. Future policy makers and nonprofit managers alike will enhance their ability to formulate positions on policy issues that impact the sector.

Comp Law & Policy

This class provides a foundational understanding of comparative law and selected foreign legal systems. The first part of the course is devoted to understanding the different families of law. We will discuss civil law, common law, socialist law, customary law, Islamic law and others. In addition, we will explore country specific examples. In the second part of the course, we discuss ways to approach comparative law, and explore how laws are compared. Both the first and second parts of the course lead into the third where we will use our knowledge to explore practical policy applications of comparative law: How can laws successfully be transplanted one from country to another? How can law be used to further development? How do different systems address religious differences? How are legal systems rebuilt after wars?

Social Disparities in Health

The primary purpose of this seminar course is to develop the tools needed to assess the feasibility, potential impact, unintended consequences and legal/ethical ramifications of novel public policies designed to improve population health and reduce racial, ethnic and socioeconomic disparities in health. The course will cover promising evidence-based policies for population health improvement using a social determinants of health framework and taking into account political context. Policies in multiple sectors will be explored, including civil rights, employment, education, housing, food, environment, human services and health care, including the Affordable Care Act. Financing strategies for population health improvement will also be covered, including social impact bonds/pay for success contracts. The course emphasizes content knowledge of current population health issues and

policies, along with critical thinking, policy analysis skills, research skills, written and verbal communication, and creative thinking. Learning will be enhanced through the use of policy writing assignments, mock legislative hearings, student presentations of policy analyses, and preparation of a policy proposal.

Facilitating Dialogue

This is a short introductory course module in facilitating complex and difficult dialogic moments of engagement in the social, professional and institutional spheres of the public arena. Its purpose is to provide the possibility for actual engagement with tense social issues and phenomena bedeviling complex societies. It will briefly explore the historical and theoretical contexts, which give rise to sometimes painful and traumatic moments that filter in and color what may otherwise be perceived as simplistic conversations and interactions. It will introduce students regardless of perceived color, gender, class, or ethnic identity categorization to the necessity for transcending their subject locations. In order to facilitate, mediate, and engage in trans-formative moments of learning, dialogue, leadership and communal capacity building with due regard of difference and the respect of mutuality.

NGOs in Policy Formation

Taught by Towsley Policymaker in Residence Hardy Vieux (Legal Director at Human Rights First)

This class will explore the role of non-governmental organizations in formulating policy. Globally, there are currently some 3.7 million NGOs in operation. Given this proliferation and the ostensible influence of NGOs, this class will delve into what makes an NGO unique from other institutions engaged in policy formulation and how that role impacts the policy-making process. We will explore the core activities of NGOs through the lens of current policy debates, such as the global refugee crisis and the war on terror. The class seeks to make students aware of the myriad questions and nuances that beset NGOs and the array of strategies and tools available to NGOs to impact policy.

Storytelling in Policy Writing

This new half-semester course takes its inspiration from Ta-Nehisi Coates' "The Case for Reparations." In his essay, Coates employs a mix of writing modes—the statistical and the anecdotal, as well as the journalistic and even the biblical—in order to argue for a policy idea that might be otherwise all too quickly dismissed. In our course, students will choose a policy topic they care deeply about and make a case for it. To steal a line from Luke Schaefer, students will write the paper they came to grad school to write.

25422 P RW LEC 509 T 230-4PM 1220 WEILL Moss

Courts as Policy-Makers

This course adopts the premise that judicial decisions and the legal strategies involved in those cases create a dynamic interaction between courts, legislatures, communities, legal advocacy groups, and the media. That interaction shapes how we think about equality, liberty, rights and justice, empowers or disempowers affected communities, and affects how we define and think about social justice issues. That interaction also affects the forums in which policy issues coalesce --state or federal courts or legislatures or the court of public opinion. We will look at several issues, likely reform efforts to improve public education, LGBT rights, and the Flint water crisis. Some familiarity with the court system is helpful. There will be several guest speakers, small group discussions, and two papers.

311	Eco Explorers Prep					1.00	
23262	PDR LAB 001 F		1-1AM	ARR		Trumpey	

Course Description

Traditional cooking methods in Sub-Saharan Africa are typically inefficient. Basic, hand built cook stoves can reduce firewood use by 50% improving forest health and reducing girl chores. Eco-Explorers will meet once a week during winter term in preparation for a 3 week June Design Build trip in Tanzania. Language and cultural preparation, test stove design build and design process documentation will be completed prior to the field component. The June trip will include a study tour to major wildlife park areas of Tanzania, a project site visit to a Peace Corps Volunteer and 2 weeks living with Masai families during the design / build process. Enrollment by application / permission of instructor.

Art for Social Change: Japan

Course Description

This course will explore the nature and perception of physical and mental disability in our society and the role that art can play in improving the lives of individuals. We will examine numerous issues through classroom lectures and workshops, and will gain greater understanding of work and education opportunities for people with disabilities through fieldtrips (Detroit, Ann Arbor Center for Independent Living, Work Skills Corporation). The early part of this course during the winter term in Ann Arbor will lay the groundwork for the second part of the course, a one-month trip to Japan for field studies.

Course Description							
Through intensive studio sessions, this course focuses on drawing from the live model, both clothed and unclothed. Students investigate ways the figure is used and referenced in the work of contemporary artists and explore strategies for using the figure in drawings that are creative and expressive in nature. The goals of this course include gaining a better understanding of the figure and its significant role in the history of art, improving figure drawing skills, and pursuing unique methods of personal expression through the use of the figure in drawing.
