After the class is full, we will not be taking students off the wait list until the class starts in the winter, based on attendance and lottery. Thus, your place on the wait list has no bearing on your chances of getting in. Students should be certain to show up to first class day or won't be allowed to register/stay in class, or remain on the wait list.

Data Analysis for Geoscientist

An introduction to data analysis and visualization for climate and space scientists and engineers. This is an upper-level undergraduate course focusing on fundamental data science, analysis, and visualization techniques, using Python with examples from space physics and climate science. No experience with Python is required but familiarity with programming is recommended.

30750	P	LEC 003	MW	5-630PM	2238 SRB	Moldwin
30751	P	LEC 004	TTH	230-4PM	2236 SRB	Landi

Solar Physics

This course will examine the structure of the Sun, from the core to the outer atmosphere. It will describe the physical processes that shape all aspects of our Sun: its structure (from the core to the outer atmosphere), its activity, and its radiative and particle output. Emphasis will be placed on 1) the solar-stellar connection, placing the Sun as a laboratory for other stars, 2) the open problems in solar (and stellar) physics, and 3) on the observational techniques and instrumentation to tackle them.

It is CRITICAL that students attend class from the beginning. Each laboratory session provides hands-on instruction and requires reserved time on a particular imaging system, making attendance for each class mandatory. If traveling during the winter break, plan ahead and allow sufficient time in order to be present at the start of the Winter Term.

First four classes will be held in 2185 LBME, the following locations will be provided by instructor.

17755	PD LAB 002	W	130-530PM	ARR				Fowlkes, Ropella Panagis

Eng Approaches to Cancer Biol							
Notes:							
graduate or senior undergraduates with a working understanding of cell and molecular biology, or consent of instructor							
Description:							
Engineering Approaches to Cancer Biology -- The course provides an introduction to cancer biology from an engineering and systems perspective. It provides a basic understanding of cancer biology including (but not limited to) cancer genetics, signal transduction, metabolism, angiogenesis, tumor microenvironment and the metastatic cascade, and discusses how new technologies and engineering approaches improve our understanding of the tumorigenesis process and our ability to diagnose or treat cancer. The course material covers three topics: (1) biological concepts and cancer biology, (2) engineering and systems approaches to the study of these concepts, and (3) engineering solutions to cancer diagnostics and treatment.

Engr Proc Mod & Risk Analysis  
Engineering Process Modeling and Risk Analysis

Engineering systems, models and simulation. Probabilistic aspects of simulations. Data collection and selection of input distributions. Design of experiments, input and output analysis and interpretation. Random number generators, variate and process generation. Monte Carlo simulation models. Activity cycle diagrams. Cyclone-EZStrobe-Stroboscope networks. In-depth examination of discrete-event simulation systems. Variance reduction techniques. Simulation and optimization. Parametric analysis. Single system output analysis and multiple system comparison.

Hands-on practical model development using Stroboscope, EZStrobe, ProbSched, Risk-Solver-Platform, Simtools, and YASAI. Animations using Proof-Animation,

Ethics for Robotics								
The expected proliferation of autonomous robots raises a number of practical questions. The need for ethics is often suggested, but what does this mean? It is unlikely that robots will rise up in a robot apocalypse. However, might a robot faithfully attempting to follow human-given instructions, without ethics or common sense, unintentionally harm individuals or even humanity? What does ethics do for human society? What ethical principles should govern the behavior of the human designers, builders, sellers, or owners of robots? What ethical principles should robots themselves apply to their own actions? How should ethical principles be translated into technological practice, and into regulations and law? This course will cover these issues and more, with readings, guest lectures, and discussions. Seminar attendance and two written reports will be required.

## Electrical Engr & Computer Sci

### Electrical Engineering And Computer Science (EECS)

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE ELECTRICAL ENGINEERING AND COMPUTER SCIENCE DEPARTMENT MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND THE FIRST WEEK OF LECTURES AND LABS/DISCUSSIONS (AS APPROPRIATE) FOR ANY EECS COURSES.

AT THE SAME TIME, THE EECS DEPARTMENT IS NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

## Entrepreneurship (ENTR)

390	Spec Topics Entr				2.00-3.00		
28004	A LEC 005	W	230-330PM	165 CHRYS	Shtein, Root		

Intro to Entrepreneurial Des

\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

\* YOU CANNOT DIRECTLY ENROLL IN THIS LECTURE. You must pick a lab first (ENTR 390.007 - 010).

====

Are you:

- \* Designing doorknobs for a Mars colony?
- \* Tired of browsing crappy university web pages?
- \* Inventing the best app ever for the Nest or the Apple Watch?
- \* Have ideas and want to prototype them before the next pitch to investors?
- \* Wondering why you aren't going to an online college instead?

Entrepreneurial Design is a cross-disciplinary course for current and aspiring designers, hackers, and makers. This gateway entrepreneurship course allows students to build foundational knowledge of entrepreneurial design with the opportunity to apply these skills in a hands-on lab (ENTR 390.008 - 010).

Learning Objectives: Students will train in patterns of thought that help them anticipate and drive innovations in technology, business, policy; train in advanced and powerful inventing / problem identification and solving methods; learn to identify and meet customer/user needs and wants (i.e.: building stuff you and others actually want to use and buy); obtain practical ?building? skills in a specific digital, physical, or combination platform (i.e.: showing how something works is more effective than just telling stories about it).

26407	P W LAB 008	F	1-4PM	1321 DC	Alexander-Adams, Shtein
-------	-------------	---	-------	---------	-------------------------

Hardware/Coding, IoT

\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

\* STUDENTS ARE AUTO-ENROLLED IN LECTURE WHEN THEY ELECT THIS LAB.

====

In this lab, you'll design, prototype, and make Internet of Things (IoT) devices to learn the basics of micro controllers in a hands-on way. You'll also collaborate with others across disciplines to develop your own hardware- and IoT-based entrepreneurial ideas.

Learning Objectives: Students will: develop a basic understanding of coding and electronics; utilize sketching to express, develop, and communicate design ideas; create functional prototypes through engagement in the design process; employ an iterative design approach, integrating concepts from the lecture to develop their final projects; apply a variety of methods for documenting and communicating the progress of their designs.

26408	P W LAB 009	T	1-4PM	1401 DC	O'Grady, Shtein
-------	-------------	---	-------	---------	-----------------

3D Printing/Prototyping

\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

\* STUDENTS ARE AUTO-ENROLLED IN LECTURE WHEN THEY ELECT THIS LAB.

====

In this lab, you'll learn how to operate and design for 3D printing machines such as the PrintrBot Play and Form 2. You'll learn CAD using Autodesk Fusion 360 and how to integrate 3D scan data into your designs. You'll also learn

CAT#	Course Title					CR	PREREQ	LAB FEE
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			

how to use various Rapid Prototyping and Manufacturing (RP&M) applications such as slicers and inspection tools.

Learning Objectives: Students will develop the fundamental skills to operate and design for the additive manufacturing process (3d printing); learn how to operate various types of 3d printers to include the PrintrBot Play, and Form 2; learn AutoDesk Fusion 360, how to operate the Nextengine 3D Laser Scanner, and how to incorporate 3d scan data into one's design; utilize various Rapid Prototyping and Manufacturing (RP&M) applications to include slicers, and inspection tools.

26409 P W LAB 010 M 12-3PM 1401 DC O'Malley, Shtein

Virtual Reality

\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

\* STUDENTS ARE AUTO-ENROLLED IN LECTURE WHEN THEY ELECT THIS LAB.

====

In this lab, you'll learn how to develop virtual reality content for the Oculus Rift and MIDEA using Unreal Engine and 3D Studio Max. You'll also be introduced to asset creation (3D modeling with 3D Studio Max) and scene assembly / functionality by bringing assets into the Unreal Engine & creating interactive experiences through Unreal's Blueprint system. At the end of the class you'll be capable of developing virtual reality experiences, simulations, and tools to address real-world problems.

Learning Objectives: Students will have an understanding of how to generate digital content for Virtual Reality platforms; be knowledgeable on versatile file formats, content pipelines, hardware platforms and industry standards; understand methods of iterative design and the creation of functional prototypes using this medium; employ what is learned in the lecture section of this course to determine what is possible, what is marketable, and what are the various distribution methods available within this platform; become familiar with documenting their design process and also pitching their ideas to others, receiving and providing quality feedback.

26413 P W LEC 011 M 6-8PM 1024 FXB Narayan

E-Commerce Entrepreneurship

\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

====

In this course, you'll learn how to start your own profitable business selling consumer products online. We'll also cover the potential pitfalls to stay away from and analyze other e-commerce businesses.

Learning Objectives: Students will be able to present a turnkey business with a functioning website, product photos/videos, sourcing plan, shipping/fulfillment plan, and advertising plan.

26595 P W LEC 012 M 4-6PM B1570 BUS Brabbs

Digital Product Design

\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

====

In this course, you'll learn the total end-to-end process of discovering a digital product need, prototyping a digitized product and getting feedback to relentlessly improve it. In doing so, you'll be a part of creating the next generation of products that disrupts the economy and reinvents the ways we live - from how we learn and exercise, to how we socialize and get around.

Learning Objectives: Students will learn how to: use design thinking to discover problems worth solving, generate and prototype solutions, and test with real users; design own product(s) by creating wireframes, interactions, and visual designs; use typography, color, shape, space - and industry-standard tools like Sketch, Invision, etc - to build designs that are attractive, simple, and functional; solicit constructive feedback, critique design work, and substantiate criticism; discuss topics in the design world, including usability, user experience design, user interface design, and design research.

26624 P LEC 013 T 4-6PM 1690 BEYSTER McGuire, Sick

TechLab MCity

\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

====

CAT#	Course Title					CR	PREREQ	LAB FEE
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			

In this course, you'll be responsible for completing an open-ended autonomous vehicle or mobility project (assigned by a company in the autonomous vehicle/mobility space), and as such gain experience in developing cutting edge technology for an early stage startup.

To apply go to <http://cfe.umich.edu/techlab-mcity/>

Learning Objectives: Students will know how to recognize ambiguity, become comfortable with it, and use project management techniques to plan for the unexpected; utilize project management tools, techniques, and skills; understand assigned company's technology and how it creates value for a customer segment; gain exposure to entrepreneurship and its role in solving big problems; align resources for effective project implementation; appreciate organizational dynamics, communication strategies and stakeholder motivations; Identify and utilize key performance metrics for project success; learn to assume responsibility for matters of great importance to assigned company; begin to make transition from student to professional engineer; engage in collaborative learning; immerse themselves in a startup that is developing cutting edge technology for the transportation industry; lead technical and strategic discussion on steps required to achieve technical milestones; discuss a Tech Lab company's work during class discussion and how it relates in the context of class.

<b>407</b>	<b>Entrepreneurship Hr</b>					<b>1.00</b>
20451	P W SEM 001	F	1230-130PM	STAMPS		Gibson, Gordon

Entrepreneurship Hour

\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

=====

In this course, you'll be exposed to disruptive, influential and respected entrepreneurs, venture capitalists and business leaders and learn about their personal experiences founding, financing and managing a startup venture.

This seminar series is designed to expose students to entrepreneurship through interaction with experienced entrepreneurs, business leaders, and venture capitalists as well as individuals involved in emerging business models, new venture creation, and technology commercialization. While covering a broad set of engineering disciplines, guest speakers will share their knowledge on the latest, most diverse practices on legal, financial, and other innovation issues. The lectures include leading entrepreneurs and executives, technology innovators, experts from the financial markets, and others who support the entrepreneurial infrastructure. Following these seminars, students will be able to meet the guest speakers along with other members of the entrepreneurial community.

<b>408</b>	<b>Patent Law</b>					<b>1.00</b>
23593	P RW LEC 001	T	6-8PM	1024 FXB		Fidler

Patent Law

\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

=====

In this course, you'll gain an overview of intellectual property (IP) law with a focus on patent law. You'll learn the fundamentals and leave the class able to identify patentable ideas and possible infringement issues in order to create an IP strategy.

Inventors and entrepreneurs have four concerns related to patent law:

1. protecting inventions during product development
2. determining invention patentability
3. avoiding infringement
4. leveraging a patent as a business asset

This course addresses these concerns through the application of case law and business cases to an invention of a student's choice.

<b>409</b>	<b>Intr Venture Capital</b>					<b>1.00</b>
20450	P RW LEC 001	TTH	430-630PM	3427 EECS		Fortino

Intro to Venture Capital

\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

=====

In this course, you'll work in teams to learn how to: (1) identify an innovative idea, (2) evaluate whether your idea will be successful, (3) operate and run a company to bring your idea to life, and (4) persevere and dedicate yourself to your venture in good times and bad.

Learning Objectives: Students will take a team based approach, grouped together with someone who has already identified a basic idea or innovation to work on (trait 1); The instructor will provide students a framework to evaluate the idea (trait 2). Whether simulating a venture capitalist, entrepreneur, or corporate employee, this process is the first step in determining if the idea has enough merit to further pursue as a business or investment; This framework will also help you to communicate the idea (trait 3) through providing a final presentation of your findings; Owing to the compressed timeframe of this short-course, students will get a sense of the speed at which most entrepreneurs are required to operate. This intense effort will give students a sense of the dedication (trait 4) great entrepreneurs must have.

<b>410</b>	<b>Finding Your Venture</b>					<b>2.00</b>		
27982	P W LEC 001	TH	3-5PM	1008 FXB	Hayden, Brown			

Finding Your Venture  
\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

====

In this course, you'll learn how to dramatically simplify the business creation process by radical prioritization, identifying good opportunities and learning when to walk away from a bad one, and learning that it is possible, and actually very common, to be a moderately successful non-famous entrepreneur.

It's hard to start a company, but it doesn't have to be complicated. This course dramatically improves your odds of starting a viable business by providing a framework for identifying large, attractive opportunities. Every student will leave with a viable business opportunity to pursue and a set of valuable and repeatable skills that will be an asset in any entrepreneurial setting.

<b>411</b>	<b>Entr Practicum</b>					<b>3.00</b>	<b>ADVISORY</b>	
21991	P RW LEC 001	T	4-6PM	2437 MH	Hennessy			

Entrepreneurship Practicum  
\* Students from ALL schools and colleges may take this course.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

====

In this course, you'll be immersed in the entrepreneurial process in a supportive classroom environment. You'll learn how to critically evaluate then pursue the development of your own ideas for new ventures by working closely with entrepreneurship faculty and mentors.

Learning Objectives: Students will experience entrepreneurship firsthand; Understand and experience the mindset of an entrepreneur; Develop the ability to share the story of your entrepreneurial pursuits and clearly articulate customer needs, value proposition, customer segments, and value-adding solutions; Learn to go from idea phase to action and implementation, including validation through sales; Learn the customer discovery process of gaining empathy, understanding customer needs and wants, getting feedback from customers, prototyping solutions, and testing a value proposition; Actively practice exercising the customer discovery process; Become familiar with the process of starting a business; Learn problem solving in a team-based environment.

====

In this course, you'll be immersed in the entrepreneurial process in a supportive classroom environment. You'll learn how to critically evaluate then pursue the development of your own ideas for new ventures by working closely with entrepreneurship faculty and mentors.

In this specific section you'll gain the skills you need to develop a technology company. Specifically, you'll apply the scientific method and lean startup principles to designing a business that is sustainable, scalable, and repeatable.

Learning Objectives: Students will experience entrepreneurship firsthand; Understand and experience the mindset of an entrepreneur; Develop the ability to share the story of your entrepreneurial pursuits and clearly articulate customer needs, value proposition, customer segments, and value-adding solutions; Learn to go from idea phase to action and implementation, including validation through sales; Learn the customer discovery process of gaining empathy, understanding customer needs and wants, getting feedback from customers, prototyping solutions, and testing a value proposition; Actively practice exercising the customer discovery process; Become familiar with the process of starting a business; Learn problem solving in a team-based environment.

\* Syllabi and workload information and other ENTR courses can be found at [cfe.umich.edu/courses](http://cfe.umich.edu/courses)

\* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to InnovateBlue or your home department.

====

In this course, you'll receive hands-on training, access to experience entrepreneurs, and a paid summer internship. This course is only available to students enrolled in the Entrepreneurs Leadership Program. For more information, visit <http://cfe.umich.edu/elp>

Learning Objectives: Students will receive practical, hands-on learning assignments to develop their skills in areas of individual leadership, operations, innovation, and execution with an emphasis on these four areas/objectives. 1. Understanding startups: We will learn about startups through case studies and studying other key principles 2. Industry Assessment: We will gain deeper understanding of specific industries through a variety of research and analysis approaches. 3. Opportunity Identification: Building on the foundational knowledge of startups and industries, we will work to identify opportunities for innovation. 4. Validation: After identifying innovation opportunities, we will actively test approaches, ideas, products, and services to develop those opportunities.

- \* Questions as to whether this course will count toward your degree should be directed to your home department.

=====

In this course, you'll learn a wide range of concepts and skills to have a successful innovation-focused career in small, medium, and large businesses and institutions. You'll study intellectual property, market and industry analysis, product-market fit, equity and stock options, program and project management, communications, securing investment and government funding, and more.

Learning Objectives: Students will be able to: Describe the value proposition and customer segment for either their own research, favorite product, or service. Draw a value Chain Map and an Eco System Map. Complete the Revenue Model, Value Proposition, Channels, Customer Segments of the Business Model Canvas. Complete the left hand side of the Business Model Canvas. Enter concise descriptions of the Cost Structure plus Key Partnerships, Resources, and Activities. Conduct Customer Discovery interviews. Name at least five regulatory agencies, code and/or standards, and certifications. Compare two competing business models from a given market segment and determine how technology and innovation was used by a startup to displace an established business. Define a patent in their own words. Explain two major differences between each of the following; trade secret, patent, trademark, and copyright. Generate a Gantt Chart. Generate a simple budget. Generate a 30 Second Elevator Pitch. Analyze conflicts and summarize the issue, people involved, final resolution. Learn how stock options work.

- \* Questions as to whether this course will count toward your degree should be directed to your home department.

=====

In this course, you'll learn about the various types of compensation, funding, and ownership (CFO), from 100% investor-owned to 100% employee-owned. You'll look at CFO from the perspective of an employee, founder, and investor, and learn the trade offs of ownership, stock options, and valuation to know how you and others should be fairly compensated.

Learning Objectives: Students will develop the critical thinking skills and analytical frameworks necessary to grasp the trade-offs of equity and employee ownership as it pertains to both them personally and to the business. Students should also be able to select the appropriate corporate structure for a variety of ventures, negotiate and establish basic shareholder governance, calculate capitalization tables, and estimate the value of an entrepreneurial venture. Students will also learn how to make informed tactical and strategic decisions around the efficient and effective and deployment of equity, and how to best negotiate for that equity from an employee's perspective.

=====

In this course, you'll learn intellectual property (IP) strategies for new ideas and startups, including barriers to entry for competitors and infringement risk reduction. Topics include IP procurement, technology transfer, due diligence, and preparing for and avoiding litigation. You should have your own research to apply what's learned in the class.

Learning Objectives: Students will leave this course with a solid understanding of: 1. The difference between holding IP rights and freedom to operate; 2. For the major types of IP (patents, copyrights, trademarks, and trade secrets), what rights they include, how to obtain those rights, and how to avoid unnecessarily losing those rights. 3. How to use IP to protect a competitive advantage in a target market. 4. How to identify and address risks related to IP infringement. 5. How to avoid common IP stumbling blocks for startups, including: selecting a name, securing ownership of IP from the creators; the dangers associated with past employment. 6. The basic aspects of major legal milestones for an early-stage technology venture, such as incorporation and financing. 7. How IP (and other early-stage legal decisions) align with a company's business model and strategy.

=====

Do people sometimes or often surprise, irritate, or enrage you? Looking back over the last year, can you think of a time you ?lost control? or would like a ?do over?? By building your self awareness and Emotional Intelligence, you can gain insight, self control, and produce consistently positive results for yourself and others.

Theories of leadership will be discussed and unpacked, with the intent of more fully understanding sources of leadership power and the positive and negative aspects of various leadership styles. At the interplay of these themes is the concept of the dynamic, optimized function of a high-performing team - the creation and maintenance of which lies at the heart of most business success. Characteristics of such teams, including visionary leadership, communication, and passion will be reviewed in detail. Vital interpersonal skill sets such as questioning, providing feedback, and mentoring will be defined and developed in terms of best available research and practices. Moving beyond the initial phase of theory and interpersonal awareness, the course will also require students to apply their developed understanding to various case studies, scenarios, and projects. While not focusing explicitly on business practices and entrepreneurial activities, the entire course will be grounded in this field and will rely heavily on tying in the real world experiences of students and instructor to maximize the future applicability of what is learned.

In this course, you'll be guided through the Design Thinking process 3 times in order to develop an in-depth understanding of how to create empathy with users and create solutions that work and truly resonate. You'll also learn how to clearly communicate your ideas and give constructive feedback to each other.

Learning Objectives: The course's objectives for its students will be:

- A paradigm shift- to learn about other ways of thinking and principles that can pivot their approach to viewing and reacting to the world.
- Defining creativity- to create a working definition so that the students can achieve a clearly identified goal. ID your personal creative style via discovering what you are most enthusiastic about and what types of endeavors make you excited to create.
- Discuss methods and approaches that contribute to individual, team and organizational creativity- how you can bring down barriers to creative thinking and the importance of attitude and positive affirmations.
- Develop a skill set and program of continuing study and practice that develops creative mentors, practices and environments.
- Gain confidence in your creative talent.
- Learn the importance of consumer / audience qualitative research and understanding in the design process.
- Develop a working knowledge of the design thinking process.
- Practice problem framing and solution analysis to help with organizational design.
- Learn how to apply the design thinking process to build solutions and innovations.
- Expand creative ability and increase productivity and happiness by learning about obstacle removal in creative practice.

- Explore team building exercises and processes with the hope that there will be a resulting change in attitude--that our thoughts and actions are not in isolation. Partnership and community are critical to both creative living and design success.

26396	AR LEC 100	W	5-6PM	2104 A&AB		Rush, Lomeli, Winful, Chavasse, Thompson		

In this course sponsored by ArtsEngine, students explore the creative process through a structured sequence of exercises in four studio modules: sound, motion, visual images/objects, and verbal/symbolic language. Faculty from Art & Design (Andrew Thompson); Music, Theatre & Dance (Amy Chavasse); Architecture (Gregory Saldana); and Engineering (Jeremy Bond) introduce a variety of creative strategies for generating problem solving ideas through hands-on projects. Weekly colloquia (Stephen Rush), discussions, and readings supplement projects. Grading is based upon attendance, class participation, a journal, four mini-projects, evidence of intellectual and creative process development, and a final culminating project. This course is appropriate for UM undergraduate students at all levels and in all disciplines. It is a fast paced, information-rich educational experience, offering insights that will make creativity and innovation an integral part of life and work.

STUDENTS ELECTING LAB (102-105) WILL BE AUTO-ENROLLED IN LEC 100 & DIS 101 (meditation session, which is optional).

## Materials Science & Engineering

### Materials Science Engineering (MATSCIE)

**220 Intro Mat & Man 4.00 ENFORCED**

10831 AR LEC 100 MWF 1130-1230PM AUD CHRYS Wynarsky

Structure, properties, and processing relationships in engineering materials. This section is particularly well-suited for Aerospace and NERS students (minor added emphasis on composites and radiation effects on materials).

10832 P RW DIS 101 TH 1130-1230PM 3427 EECS Vu  
 10833 P RW DIS 102 TH 1030-1130AM 1006 DOW Watkins  
 10834 P RW DIS 103 TH 130-230PM 1010 DOW Khan  
 28044 P RW DIS 104 TH 1130-1230PM 3150 DOW Coyle  
 36114 P RW DIS 105 TH 130-230PM 1018 DOW Lu  
 24142 P RW LEC 200 TTH 330-530PM 133 CHRYS Yalisove

This section of MSE 220 is a team based and project based version of the class where the first introduction to the material is NOT lecture, but rather annotated reading. Class time will consist of active learning activities.

There will be three group projects in this class. Students will be required to purchase an electronic textbook via the Canvas site that will be live in December. The book will cost ~\$70 or ~\$55 for a rental and students will also be required to purchase a subscription to Learning Catalytics (\$12). There are no other fees for the course.

Homework is graded for effort and honesty - not accuracy. Quizzes are graded by averaging a closed book, closed notes, individual effort, with an open book, open internet, group effort. You will be rewarded for hard work and honesty on homework and exams without the angst of 100% summative assessment. Do not purchase the book at this time. More information will be available on the following website: <http://java.engin.umich.edu/220w18>

	This seminar intends to examine communalities and differences in the perspectives on environmental justice in the U.S. and Europe. The seminar will be jointly led by Dr. Paul Mohai of the University of Michigan in Ann Arbor and Dr. Willi Haas of Alpen-Adria University in Vienna. Students and faculty from the two Universities will meet via teleconferencing (skype, etc.) for two hours, once per week, on Tuesdays starting March 7 and weekly through April 25.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This problem solving course will challenge a multidisciplinary team of students to address a real-world problem in the area of sustainable food systems. Food: what we eat, how and where we produce it, where we buy it, and who has access to it has profound effects on human health, economies, and the environment. The current US food system, which delivers abundant, "cheap" and "safe" food to millions of people has embedded in it practices, policies, and outcomes that are not sustainable or desirable at a societal level. From water shortages and tainted drinking water to diet-related diseases and environmental costs, sustainability in food systems is critical to communities, nations, and our species.

This course will focus on one particular problem: how to enhance local (or regional) production, sale and consumption of fruits and vegetables within the United States, with a particular focus on Michigan and the Great Lakes region. Classes will primarily operate as discovery sessions with industry, governmental, and academic experts. The course culminates with students creating, and presenting to a team of experts and/or stakeholders, a business or operational plan proposing their solution.

CAT#	Course Title					CR	PREREQ	LAB FEE
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Meeting renewable portfolios standards and expanding renewable energy markets requires overcoming numerous technological, societal, and legal hurdles. In this course, students will briefly examine these and the myriad other challenges facing renewable energy markets and then generate solutions to address one of those challenges.

Renewable energy offers the promise of energy security and reduced greenhouse gas emissions that are critical to climate change mitigation efforts in the United States and throughout the world. Twenty-nine states and the District of Columbia impose minimum renewable energy standards on their utilities' generation portfolios; eight states have renewable energy goals. The most ambitious standard is in Hawaii, which seeks to meet 100 percent of its energy needs from renewable sources by 2045, followed by Vermont (75 percent by 2032), California (50 percent by 2030), and the District of Columbia (50 percent by 2032). In Michigan, the renewable portfolio standard will be 15 percent in 2021.

Challenges facing renewable energy markets include an antiquated electricity transmission network geared to local generation and distribution that does not readily accommodate transmission of renewable energy from states where there is abundant supply to population centers; management of the electricity grid to provide stability in the face of the intermittent nature of renewable energy at limited scale; having sufficient storage capacity for renewable energy so that electricity is available at peak periods of demand; and ensuring price competitiveness of renewable energy through a combination of monetary and fiscal policy, while avoiding regressive impacts and geographical cost disparities. Addressing these challenges will require modification to existing laws and regulations.

Classes will include discovery sessions with industry, governmental, and academic experts. At the end of the term, students will present an integrated proposal to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

	P LAB 003	W	430-630PM	1025 LSSH				

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Working as a group with guidance from the instructors, students will develop a plan to address how the lack of social capital among inner-city entrepreneurs impedes the development of viable businesses and successful entrepreneurs and prevents the development of a healthy entrepreneurial ecosystem in inner cities. We will focus on innovative, community-based solutions to this problem. Students will work collaboratively across disciplines to understand the current situation, explore current best practices, and create a plan to present to a hypothetical organization such as a state or local government, a foundation, a non-profit organization, or a public-private partnership.

Class sessions will focus heavily on interactive discussion, presentations, and interviews with experts. Students will be expected to spend significant time outside of class working in teams to interview relevant stakeholders, conduct research, draft documents and develop the plan.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This problem solving course will challenge a multidisciplinary team of students to address a real-world problem in the area of sustainable food systems. Food: what we eat, how and where we produce it, where we buy it, and who has access to it has profound effects on human health, economies, and the environment. The current US food system, which delivers abundant, "cheap" and "safe" food to millions of people has embedded in it practices, policies, and outcomes that are not sustainable or desirable at a societal level. From water shortages and tainted drinking water to diet-related diseases and environmental costs, sustainability in food systems is critical to communities, nations, and our species.

This course will focus on one particular problem: how to enhance local (or regional) production, sale and consumption of fruits and vegetables within the United States, with a particular focus on Michigan and the Great Lakes region. Classes will primarily operate as discovery sessions with industry, governmental, and academic experts. The course culminates with students creating, and presenting to a team of experts and/or stakeholders, a business or operational plan proposing their solution.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Meeting renewable portfolios standards and expanding renewable energy markets requires overcoming numerous technological, societal, and legal hurdles. In this course, students will briefly examine these and the myriad other challenges facing renewable energy markets and then generate solutions to address one of those

challenges.

Renewable energy offers the promise of energy security and reduced greenhouse gas emissions that are critical to climate change mitigation efforts in the United States and throughout the world. Twenty-nine states and the District of Columbia impose minimum renewable energy standards on their utilities' generation portfolios; eight states have renewable energy goals. The most ambitious standard is in Hawaii, which seeks to meet 100 percent of its energy needs from renewable sources by 2045, followed by Vermont (75 percent by 2032), California (50 percent by 2030), and the District of Columbia (50 percent by 2032). In Michigan, the renewable portfolio standard will be 15 percent in 2021.

Challenges facing renewable energy markets include an antiquated electricity transmission network geared to local generation and distribution that does not readily accommodate transmission of renewable energy from states where there is abundant supply to population centers; management of the electricity grid to provide stability in the face of the intermittent nature of renewable energy at limited scale; having sufficient storage capacity for renewable energy so that electricity is available at peak periods of demand; and ensuring price competitiveness of renewable energy through a combination of monetary and fiscal policy, while avoiding regressive impacts and geographical cost disparities. Addressing these challenges will require modification to existing laws and regulations.

Classes will include discovery sessions with industry, governmental, and academic experts. At the end of the term, students will present an integrated proposal to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Working as a group with guidance from the instructors, students will develop a plan to address how the lack of social capital among inner-city entrepreneurs impedes the development of viable businesses and successful entrepreneurs and prevents the development of a healthy entrepreneurial ecosystem in inner cities. We will focus on innovative, community-based solutions to this problem. Students will work collaboratively across disciplines to understand the current situation, explore current best practices, and create a plan to present to a hypothetical organization such as a state or local government, a foundation, a non-profit organization, or a public-private partnership.

Class sessions will focus heavily on interactive discussion, presentations, and interviews with experts. Students will be expected to spend significant time outside of class working in teams to interview relevant stakeholders, conduct research, draft documents and develop the plan.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

Research in Sponsorship							
This course is an elective graduate course in sport management. The main goal of this course is to provide students with both a theoretical and an applied understanding of the values and limits to sponsorship-linked marketing. The course takes an interdisciplinary approach and treats sponsorship as a contributor to an overall communications platform. Most importantly, throughout this course, students will develop and conduct a sponsorship research that

## Physical Education (PHYSED)

<b>140</b>	<b>Beginning Swim</b>					<b>1.00</b>		
13674	PD W LAB 001	MW	7-8PM	ARR	Starling			
Class will be held at CCRB in the Bell Pool. Students must register through the Kinesiology Community Programs (KCP) website ( <a href="https://kines.umich.edu/community-programs">kines.umich.edu/community-programs</a> ) or in Rm 3064 CCRB and request an override. To drop/request override, contact <a href="mailto:kebwick@umich.edu">kebwick@umich.edu</a> . Little or no swim experience? This course is for you. You'll start with entering the pool and getting comfortable. You'll progress to front crawl, back crawl, elementary backstroke, breaststroke, sidestroke, and butterfly. And you'll learn jumping in, treading, and water safety. Goal: one length of the pool. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.

<b>141</b>	<b>Begin Swim II</b>					<b>1.00</b>	<b>ADVISORY</b>	
14811	PD W LAB 001	MW	8-9PM	ARR	Starling			
Class will be held at CCRB in the Bell Pool. Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu. Beginning Swim II is for students who are already comfortable in the water and who can swim across the pool (the short way). The course works on building endurance and improving technique in freestyle, backstroke, elementary backstroke, breaststroke, sidestroke, butterfly, diving and treading water as well as water safety. Flip turns and other activities will be offered as skills advance. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.								
<b>142</b>	<b>Intermediate Swim</b>					<b>1.00</b>		
13675	PD W LAB 001	TTH	7-8PM	ARR	Starling			
Class will be held at CCRB in the Bell Pool. Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu. Pre-req: Must have ability to swim one length (long way) each of crawl, backstroke and breaststroke. Intermediate swim focuses on refining strokes while building endurance. Each of the strokes will be taken apart and put back together better than before! Other topics covered include laps, treading water, diving and water safety. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.

Surveys in the Sport Industry				
Students enrolled in more than five upper division SM courses will be disenrolled from one of the excess courses.				
Students will engage in active learning by working in small groups on case studies provided live by current professionals from across the sport industry. Case studies will examine challenges faced by organizations as they strive for success in the dynamic landscape of sport business. Students will apply knowledge and skills developed in other sport management coursework as they collaborate to solve real problems and present their proposals to industry executives, further strengthening problem-solving and analytic skills while also enhancing written and oral communication skills in the context of professional presentations.				
25787	P RW LEC 006 TH	530-830PM	2260 USB	Cho
Sport Mktg,Sponsorshp&Branding				
Students enrolled in more than five upper division SM courses will be disenrolled from one of the excess courses.				
This course involves a careful examination of marketing and sponsorship strategy in the sport industry, specifically highlighting and analyzing problems which brands, athletes, teams, leagues, and other organizations have in trying to grow their business or brand presence within or through sports.				
Emphases are on the use of established strategy and marketing frameworks learned in other courses, but on how the application, conclusion, or outcome might differ within the context of sports vs. in other industries. It is an exploratory course designed primarily for students who have already taken other business, marketing, or sport management classes. However, it also meets the general needs of students outside of a marketing or sport management concentration with an introduction into sports marketing and marketing in the sports industry. The course fulfills three SM elective credits.

# Literature, Science & the Arts

NOTE--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY STUDENT'S PLACES IN A COURSE IF THEY DO NOT ATTEND:  
 ---THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES;  
 ---THE FIRST MEETINGS OF HISTORY 396 AND 397;  
 ---EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES;  
 ---EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES;  
 ---THE FIRST TWO MEETINGS OF COURSES IN OTHER DEPARTMENTS.

AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

## Biology Department

### Biology (BIOLOGY)

--A STUDENT WHO DOES NOT ATTEND THE FIRST MEETING OF A BIOLOGY, CHEMISTRY, OR PHYSICS LABORATORY MAY BE DROPPED FROM THE COURSE FOR NON-ATTENDANCE.  
 --ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE MATCHES THE COURSES THEY ARE ATTENDING.

--FOR ADDITIONAL COURSES, PREVIOUSLY LISTED UNDER BIOLOGY, PLEASE CHECK THE LISTINGS FOR EEB (ECOLOGY AND EVOLUTIONARY BIOLOGY) AND MCDB (MOLECULAR, CELLULAR AND DEVELOPMENTAL BIOLOGY).

<b>102</b>	<b>Practical Botany</b>				<b>4.00</b>	<b>50.00</b>

This course is a research-based second-semester organic chemistry laboratory class that builds off of the skills gained in the Chem 211 lab, and the knowledge gained previously in Chem 210 and concurrently in Chem 215.

Limited seating available- apply here: [https://umich.qualtrics.com/jfe/form/SV\\_41qtfbngMhoxUyx](https://umich.qualtrics.com/jfe/form/SV_41qtfbngMhoxUyx)

## English Language Institute

### English Language Institute (ELI)

ELI courses fall into three categories:

1. English for Academic Purposes courses for graduate students;
2. Language and teacher training courses for international GSIs;
3. Teacher training courses for students planning to teach ESL in local communities or abroad.

For assistance in choosing an appropriate course, please go to the ELI Academic Advising website:  
<http://bit.ly/eliadvising> or e-mail: [eliadvisor@umich.edu](mailto:eliadvisor@umich.edu) to make an appointment to speak with an advisor.

Note: Students who are currently a declared creative-writing minor or English sub-concentrator will receive alternative enrollment instructions in an email. Creative-writing minors and English sub-concentrators are not required to submit a portfolio for review.							
To enroll in this course, non-creative writing minors and subconcentrators need to:							
1. Submit a portfolio. Portfolio requirements vary from section to section, so contact instructors directly for their specific guidelines. Portfolios are usually between 5-15 pages of original relevant work (short stories, excerpts, poems) and should be submitted directly to the instructor of each section. For priority consideration, portfolios should be submitted no later than 5pm on Tuesday, December 5, 2017. Students should receive notification of their acceptance (or not) no later than Tuesday, December 12, 2017. Students may still submit portfolios after the priority deadline until seats are full.							
2. Students are encouraged to consider a second-choice section (where available) as a potential back-up.

1. Submit a portfolio. Portfolio requirements vary from section to section, so contact instructors directly for their specific guidelines. Portfolios are usually between 5-15 pages of original relevant work (short stories, excerpts, poems) and should be submitted directly to the instructor of each section. For priority consideration, portfolios should be submitted no later than 5pm on Tuesday, December 5, 2017. Students should receive notification of their acceptance (or not) no later than Tuesday, December 12, 2017. Students may still submit portfolios after the priority deadline until seats are full.							
2. Students are encouraged to consider a second-choice section (where available) as a potential back-up.

Note: Students who are currently a declared creative-writing minor or English sub-concentrator will receive alternative enrollment instructions in an email. Creative-writing minors and English sub-concentrators are not required to submit a portfolio for review.

To enroll in this course, non-creative writing minors and subconcentrators need to:

1. Submit a portfolio. Portfolio requirements vary from section to section, so contact instructors directly for their specific guidelines. Portfolios are usually between 5-15 pages of original relevant work (short stories, excerpts, poems) and should be submitted directly to the instructor of each section. For priority consideration, portfolios should be submitted no later than 5pm on Tuesday, December 5, 2017. Students should receive notification of their acceptance (or not) no later than Tuesday, December 12, 2017. Students may still submit portfolios after the priority deadline until seats are full.

2. Students are encouraged to consider a second-choice section (where available) as a potential back-up.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This problem solving course will challenge a multidisciplinary team of students to address a real-world problem in the area of sustainable food systems. Food: what we eat, how and where we produce it, where we buy it, and who has access to it has profound effects on human health, economies, and the environment. The current US food system, which delivers abundant, "cheap" and "safe" food to millions of people has embedded in it practices, policies, and outcomes that are not sustainable or desirable at a societal level. From water shortages and tainted drinking water to diet-related diseases and environmental costs, sustainability in food systems is critical to communities, nations, and our species.

This course will focus on one particular problem: how to enhance local (or regional) production, sale and consumption of fruits and vegetables within the United States, with a particular focus on Michigan and the Great Lakes region. Classes will primarily operate as discovery sessions with industry, governmental, and academic experts. The course culminates with students creating, and presenting to a team of experts and/or stakeholders, a business or operational plan proposing their solution.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Meeting renewable portfolios standards and expanding renewable energy markets requires overcoming numerous technological, societal, and legal hurdles. In this course, students will briefly examine these and the myriad other challenges facing renewable energy markets and then generate solutions to address one of those challenges.

Renewable energy offers the promise of energy security and reduced greenhouse gas emissions that are critical to climate change mitigation efforts in the United States and throughout the world. Twenty-nine states and the District of Columbia impose minimum renewable energy standards on their utilities' generation portfolios; eight states have renewable energy goals. The most ambitious standard is in Hawaii, which seeks to meet 100 percent of its energy needs from renewable sources by 2045, followed by Vermont (75 percent by 2032), California (50 percent

by 2030), and the District of Columbia (50 percent by 2032). In Michigan, the renewable portfolio standard will be 15 percent in 2021.

Challenges facing renewable energy markets include an antiquated electricity transmission network geared to local generation and distribution that does not readily accommodate transmission of renewable energy from states where there is abundant supply to population centers; management of the electricity grid to provide stability in the face of the intermittent nature of renewable energy at limited scale; having sufficient storage capacity for renewable energy so that electricity is available at peak periods of demand; and ensuring price competitiveness of renewable energy through a combination of monetary and fiscal policy, while avoiding regressive impacts and geographical cost disparities. Addressing these challenges will require modification to existing laws and regulations.

Classes will include discovery sessions with industry, governmental, and academic experts. At the end of the term, students will present an integrated proposal to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Working as a group with guidance from the instructors, students will develop a plan to address how the lack of social capital among inner-city entrepreneurs impedes the development of viable businesses and successful entrepreneurs and prevents the development of a healthy entrepreneurial ecosystem in inner cities. We will focus on innovative, community-based solutions to this problem. Students will work collaboratively across disciplines to understand the current situation, explore current best practices, and create a plan to present to a hypothetical organization such as a state or local government, a foundation, a non-profit organization, or a public-private partnership.

Class sessions will focus heavily on interactive discussion, presentations, and interviews with experts. Students will be expected to spend significant time outside of class working in teams to interview relevant stakeholders, conduct research, draft documents and develop the plan.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

## History Department

### History (HISTORY)

--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS.

--ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION PROCESS TO MAKE SURE THAT THEIR OFFICIAL COURSE SCHEDULES MATCH THE COURSES THEY ARE ATTENDING.

--100 THRU 500 LEVEL 4 CREDIT HOUR COURSES ARE 4 CREDIT HOURS FOR UNDERGRADUATES ONLY.

--SURVEY AND INTRODUCTORY COURSES ARE FOR FRESHMEN AND SOPHOMORES.

--SURVEY COURSES REQUIRE BOTH LECTURE AND DISCUSSION SECTIONS. DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE.

## Mathematics Department

### Mathematics (MATH)

---MATH DEPARTMENT POLICY REQUIRES THAT STUDENTS ATTEND BOTH OF THE FIRST TWO CLASS MEETINGS (OR NOTIFY THE INSTRUCTOR IN ADVANCE OF THEIR ABSENCE) OR THEY MAY BE DROPPED FROM THE CLASS.  
 ---ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE OF COURSES MATCHES THE COURSES THEY ARE ATTENDING.

---MATHEMATICS DEPARTMENT POLICY LIMITS STUDENTS TO A MAXIMUM OF 4 CREDITS FOR COURSES NUMBERED BELOW 112.

------------	--------------------------	--	--	--	--	-------------	---------------------------

20947 PIR LEC 100 MTWTH 9-10AM 182 WEISER McKay  
Evening midterms for this course will take place 6-9pm on February 1, March 8, and April 5. Students should avoid scheduling classes that conflict with this time. As in previous terms, midterm exams will be written to take 1.5 hours. This semester, all students will be allowed to take as much as 50% more time should they feel they would benefit from it. The final exam will be Friday, April 20, at 7:30pm.

## Sweetland Center for Writing

### Gayle Morris Sweetland Center for Writing (WRITING)

**100 Transit Coll Writing** 3.00  
 19100 PD W REC 001 TTH 1-2PM 1155 NQ McDaniel  
 <P>Writing 100 is designed to help students of all levels improve their writing, but is best suited to those who have yet to fulfill the First-Year Writing Requirement. Upper-level students should have a compelling academic reason for enrolling in Writing 100.</P>

<P>Normal waitlist procedures apply for students who attend the first two classes. Students who wish to join Writing 100 after the first two class sessions must email the instructor to set up a meeting to discuss enrolling. Based on this discussion, the student and instructor will then make a determination on whether or not it is appropriate for the student to enroll.</P>

**119 Style Edit Intl Stds** 1.00

## Statistics Department

### Statistics (STATS)

---IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS.

---ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE OF COURSES MATCHES THE COURSES THEY ARE ATTENDING.

This lab is a CSP lab. CSP sections are scheduled for more hours per week than a routine section of the same course. Some of that time is devoted to workshop activities, e.g., problem solving, practice tests, review of assignments and instruction in learning skills. There is also provision for more individual instruction in the form of additional office hours, instructor conferences, appointments with a Course Assistant, etc.

	P RW LEC 001 TH		
	230-5PM	4130 USB	

Please note that if you have not met the required or advisory prerequisite for this course you may still be able to register, please email the course director for an override.

Human Neuroanatomy --- This course focuses on key structural aspects of the human brain with an emphasis on function. We will make heavy use of clinical case studies largely in small working groups to uncover how and why symptoms linked to neurological disorders exist. For these case studies, 3-dimensional visualization tools and hands-on examination and limited dissections of human brains will be used to highlight the elegant anatomical relationships of sensory, motor, emotional, and cognitive systems.

--Performance Instruction in the School of Music (Individual Studio Assignment in Music Performance): All students requesting performance instruction must apply online at [www.music.umich.edu](http://www.music.umich.edu), click on the "students" tab and then click on the "online individual studio assignment in music performance" form. Do not register until you have received an email verifying placement in a studio.

## Department Of Dance

### Dance (DANCE)

100	Intro to Dance					1.00	ADVISORY
20778	P W LAB 001	MW	9-10AM	DANCE STUDIO A	Beck		
Modern							
Taught by dance students enrolled in DANCE 482.							
21089	P W LAB 002	MW	9-10AM	DANCE STUDIO B	Foust		
Ballet							
21090	P W LAB 003	MW	9-10AM	DANCE STUDIO D	Evangelista		
Hip Hop							
21091	P W LAB 004	MW	10-1130AM	DANCE STUDIO D	Torijano		
Modern Dance with Latino Influ							
Bienvenidos! (Welcome)! Start your week on Monday (and Wednesday) at 10:10 dancing to the sounds of Latin American music such as Mambo, Merengue, Bolero, and Salsa; mixed with contemporary dance styles. Learn about the origins of these rich musical styles, broaden your knowledge and find new ways to identify with Central and South American music, poetry, literature and the visual arts.							
21092	P W LAB 005	MW	11-12PM	DANCE STUDIO A	Evangelista		
Intro to Performance							
The gaining of presence, awareness, and concentration are taught in a supportive exploration to establish individual best practices. Develop basic dance and performance skills that explore projection and the relationship between audience and performer. This class offers an introduction to the fundamentals of performance and the performer's tools onstage and off.							
21093	P W LAB 006	MW	4-5PM	DANCE STUDIO B	Schiff		
Modern							
In this class, students will begin with warm-up choreographies rooted in somatic techniques that support increased flexibility, strengthening, injury prevention, and efficient movement patterns. These will lead into standing exercises, movement that flies across the floor, and choreographed combinations that explore rhythm, spatial awareness, and musicality. Students will also explore their unique improvisational voices and choreograph their own dances for their final project. Students will attend a live dance concert and write a reflection paper as well as complete a few short assignments on dance history.							
21094	P W LAB 007	MW	5-6PM	DANCE STUDIO A	Schiff		
Brazilian Zouk							
Brazilian Zouk is a beautiful and fun partnered social dance originally based on Lambada and adapted to fit the Caribbean Zouk rhythm. Since the 1990s, it has drawn on other Brazilian social dance forms (Samba de Gafieira, Forro), concert dance traditions (Ballet, Jazz, Hip Hop) and other elements and tools it picked up as it became a global phenomenon with local communities and international festivals all over the world. It is most identifiable by its luxurious and sometimes dramatic head movements, flowing footwork, and prioritization of connection and community both on the dance floor and off. In this class, we will learn the fundamental movements of both Traditional/Rio Style Zouk and Zouk-Lambada, head movement, dance floor etiquette, development of personal style, history and Brazilian culture, as well as a fun choreographed routine introducing students to advanced movements. Students will be required to attend at least one local community event (free and open to the public) and write a reflection paper in addition to attending Dance Department classes to gain field experience. At the end of the term, students will have all the tools they need to attend a Brazilian Zouk social dance party anywhere in the world.							
21095	P W LAB 008	MW	5-6PM	DANCE STUDIO B	Hirina		
Ballet							
21096	P W LAB 009	MW	6-7PM	DANCE STUDIO A	Hirina		
Yoga							
Yoga class is a sequence of asanas (postures) performed in a flow. Though we will be moving through postures, there will also be time for detailed alignment instructions. This information will be helpful in your future yoga practice at yoga studios. This class offers both a sense of physical challenge, but also restorative effect allowing the body to open and soften while the mind gets a chance to escape the stress of school requirements. The yoga space offers you the chance to focus on yourself for 50 minutes, tuning into your emotional, physical, and mental states, while learning tools to find relief from daily stressors. Though the main portion of the class is a physical experience, it is also a practice that unites one's body, mind and spirit by quieting the mind and creating a sense of peace through physical movement. The class will always end with a short meditation. Due to its experiential form, regular attendance is required.							
21097	P W LAB 010	TTH	9-10AM	DANCE STUDIO A	Bascom		
Jazz							
21098	P W LAB 011	TTH	9-10AM	DANCE STUDIO B	Reehorst		
Modern							
21282	P W LAB 012	TTH	4-5PM	DANCE STUDIO A	Foust		
Hip Hop							
21315	P W LAB 013	F	12-2PM	DANCE STUDIO B	Reehorst		
Intermediate Ballet							
This course is designed for non-major students who have a basic understanding of ballet technique. Students enrolling in this course will have completed Intro to Ballet or have previous ballet experience outside of the University.							
22051	P W LAB 014	F	10-12PM	DANCE STUDIO A	Bascom

Intro to Pilates

Pilates is a physical training practice created by Joseph Pilates in the 1920s that is designed to develop balanced strength and flexibility while maintaining a focus on postural alignment and body awareness. This course will be an introduction to the exercises of the Pilates Method and will also involve elements of basic anatomy and kinesiology. Designed specifically for students, course content will include exercises that will serve the studying-body with a special focus on strengthening spinal extensors and lengthening the body's back-line. Great for student-athletes and artists looking for a course to balance a training regimen, this course will help students identify personal practice methods to take with them beyond the semester. Most importantly, this class is a practice, a tune into one's own body and develop greater kinesthetic awareness within the Pilates method.

Modern

Bienvenidos! (Welcome)! Start your weekend on Friday afternoon at 2:10 pm, dancing to the sounds of Latin American music such as Mambo, Merengue, Bolero, and Salsa, mixed with contemporary dance styles. Learn about the origins of these rich musical styles. Broaden your knowledge and find new ways to identify with South American and Central American music, poetry, literature and the visual arts. In this lab class, we will learn the choreography from different Latin American choreographers such as Mario Vircha, Elena Gutierrez and special guest artist, Ankita Mohapatra, a specialist in Bollywood, Odissi and Bhangra) Indian? style.

We will accumulate the various movement materials from the classes into a performance that will take place in our last class Friday, April 13th. It will consist of the dance styles, sections of the choreography that you learned from our guests, my own choreography, and lyrics in Spanish of different songs that you have memorized to be integrated into the choreography. Our journey embraces the cultural and artistic greatness of Latin America?their composers, visual artists, choreographers and literary figures. And of course, we'll have to enjoy some of the regional foods such as Costa Rican Coffee, Gallo pinto (rice and beans), etc.

About Ankita:

Ankita Mohapatra is classically trained in Odissi, among the oldest of India's 9 official forms of classical dance. She has also competed, choreographed, and performed in Bollywood and Bhangra styles throughout her career in India, Canada, and throughout the United States. Notable distinctions include 1st prize in both Subrina Biswal Competition and Indian American Festival (IAF) competition (in both Senior Bollywood category and Senior Classical category).

Arts Leadership Forum					
This course is designed to provide access to the greatest leaders from the fields of performing arts, arts administration, arts leadership and philanthropy. Students will have the opportunity for multi-faceted in-depth engagement and reflection. The premise of the class is to ignite learning through inspiration from and role modeling by successful leaders and direct mentorship. Students will meet with the visitor for a facilitated interactive experience and conversation, engage each speaker in a facilitated Q and A and process the materials in an interactive group discussion. Students will also write response pieces to each speaker, providing their own perspectives and takeaways from the absorbed material. Finally, as the final project, students will present a mini-lecture, engage in a peer Q and A and provide critical feedback. The response papers will be submitted after each visit. Each visitor may also assign a reading for the preparatory discussion, and possibly, for the visit itself.

Arts Entrepreneurship Essentials is a comprehensive journey that begins with developing one's mindset of conceiving, vetting and formulating an idea and then implementing them into successful, sustainable creative ventures. Students will have the opportunity to explore entrepreneurship through the prism of their own arts or life focus and specialization. Required texts, coupled with class lectures, collaborative projects and engaged discussions are designed to help develop the core skillsets necessary to awaken and develop young creative entrepreneurs. As a practicing arts and social entrepreneur having founded several successful, ongoing creative initiatives and organizations, Professor Dworkin will introduce a unique and practical course informed by his own life experiences, including building a thriving non-profit with a 5 million dollar annual budget and a 20-year track record. As an overall philosophy, this course demystifies entrepreneurship and illustrates how an authentic passion and commitment to creativity and learning serve as key pillars for a successful, fulfilling life. The final Capstone Project will tie together the material covered in all modules, showcasing each student's ability to formulate and make the case for a creative venture.

This composition workshop-style course is a generative laboratory to make rigorous, experimental works that open reflection on socio-political issues. Our seminar involves: a study of other artists' work and ways they engage with wide-ranging political matter through performance, animation, sculpture and other media; an embodied exploration of compositional elements at different sites in the Residential College and U-M's campus; and creative assignments that employ various methods to interrogate sociopolitical material of your own choosing. We'll be examining the immediate, present, and personal relationship of the body to performance in a very expansive way, studying William Kentridge's stop-gap animation, Diego Rivera's Detroit Industry murals, and Maya Lin's Vietnam Memorial, for example, alongside more traditional understandings of performance in theater, dance and film. Questioning assumptions of performance, genre, audience and politics will form an important part of our work in

CAT#	Course Title	CR	PREREQ	LAB FEE

	TIME	LOCATION		

this interdisciplinary class, as will a detailed examination of compositional elements common to multiple art forms. We will gain practice and experience with different approaches to making performance and different ways to deploy compositional tools, depending on your objectives. No previous experience in performance or socio-political action necessary, and all bodies, abilities, and backgrounds are actively welcome on this journey; experimentation, adaptation and play with formats and tools that may be new to you will be encouraged. The course will culminate in a public showing of original student work.

Beginning Guitar

Guitar 111 is a course is for beginners - those who have never played guitar. If you do not own a guitar one will be provided for you to use during the semester. Students with more than a year of playing experience should not register for the course.

The purpose of GUITAR 111 is to help students develop their guitar skills, with a primary focus on using the guitar as an accompaniment instrument. Right Hand skills covered will include finger picking, flat picking, and a variety of strumming patterns. Left Hand skills will include open chords, barre chords, melody chords, and basic scale patterns. Introduction to reading of standard music notation, guitar tablature, and chord symbols will be covered. Other topics that will be presented include improvisation, playing by ear, and using the capo for transposition.

Fund Rhythm B

This is a companion course to "Fundamentals of Rhythm A: the grid," but does not require this course as a prerequisite. "Fundamentals of Rhythm A" explored rhythms on human made grid systems such as even pulses, quantized subdivisions, metric cycles and song forms. This course will look at rhythms that more generally fall "off the grid" or "in the cracks." This includes rhythms of speech, gesture, and rhythms of the natural world. In musical applications, we will look at the some of the varieties of experience that fall into the category of "feel," including groove, flow, pocket and swing. As in the first semester course, students will not bring instruments to class. All work will be done with singing and clapping in order to developing, hearing, memory, and internalization

Music and Mobility						
Music and Mobility: Global Diasporas Making Sense and Sound seeks to challenge the boundaries of the modern nation-state to chart a musical map of the world that reflects the movements of human beings across the globe. Much of the contemporary world is constituted of diasporic societies. Global trade, slavery, imperialism, colonialism, wars, and the search for better lives have forcibly moved people as well as driven others to move voluntarily. We wish to understand how migrants, both old and recent diasporic peoples, have engaged creatively, through music, with their surroundings to make new selves and new lives; wherever they have found themselves. Outstanding examples will be chosen from the African, Arab, Asian, Jewish, and European, diasporas worldwide. This course aims to further our understanding of the ways in which human beings survive and evolve by creating and consuming new musical and aesthetic worlds for themselves ? how they make sense and create place through sound.						
Course assignments will be: three discussion and response papers based on the readings, and a final exploration, paper, or performance. This final project may consider a people and a music that personally relevant for you, or examine another diasporic society and its music that you find particularly engaging.

	23627 A LEC 001	TTH	4-5PM	G127 AH	Knuth, Eaton		

Engaging Performance

This course connects undergraduate students directly to the touring, world-class artists who perform music, theater, and dance on the U-M campus. Students will attend live performances, talk with the artists and the arts administrators who help get them here, and explore how the performing arts are an integral part of our lives and the world at large. Class will include lectures (including some by guests and visiting artists), weekly discussion sections, required attendance at evening performances, interactive classroom activities, weekly readings, reaction papers about the performances, and group presentations and/or performances from students in class.

Students will attend live performances of:

Urban Bush Women?s Hair & Other Stories

Underground Railroad Game, a daring new theatre work about race in the United States.

singer-songwriter Gabriel Kahane?s new song cycle Book of Travelers

an opera in concert production of the Gershwins' Porgy and Bess

Company Wang Ramirez?s Borderline, a contemporary dance work fusing cultures and styles

CAT#	Course Title	CR	PREREQ	LAB FEE	
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR

a concert at the Michigan Theater capturing the blues tradition in the Piedmont region of the United States  
the dance-theatre work of Nederlands Dans Theater  
legendary jazz pianist Chick Corea with the Lincoln Center Orchestra

These performances constitute the course's primary textbook, and the full package of tickets is available to students enrolled in the course for the dramatically reduced rate of \$120. Engaging Performance is made possible through a grant from the Andrew W. Mellon Foundation and a partnership between the University of Michigan and the University Musical Society (UMS)

#### Wellness for Performing Artist

This class is designed to introduce students in the performing arts to wellness topics and somatic practices with the aims of preventing injury, developing kinesthetic awareness and exploring the role of the expressive body as an integral component of performance. Active participation through movement and in-class performance are required. Topics that will be addressed include performance anxiety, stress management, nutritional health, Yoga, Alexander Technique, Feldenkrais, and Laban Movement Analysis.

Media Technology Careers							
This course explores how today's leading technology companies bring products to market and how artists, musicians, composers, engineers, business and computer science students might contribute and become part of these companies. Topics include best practices to department functions. Online resources offer insights into real, working companies. Instructor will visit campus to meet with students.

25819	P W LEC 003	TTH	430-6PM	378 SM	Edwards		
Entrepren. thru Technology							
The course will provide a basic introduction to audio and video recording, notation software, and website design, with a goal of developing online an online presence to facilitate entrepreneurship for artists.							
27613	P W LEC 007	MW	2-330PM	376 SM	Granzow		
Digital Fab. for Acoustics							
This course explores digital fabrication applied to acoustics and instrument design. Students learn 3D printing and laser cutting, conduct sound-based experiments with materials, and design custom musical objects. Acoustic principles are applied in computer-aided design and verified through simulation and making. Readings in musical acoustics, contemporary organology and critical making support class discussion and critique.							
31692	P LEC 008	TTH	230-4PM	506 BMT	Burns		
Electronic Mus&Social Justice							
This course investigates artistic responses to and interventions in struggles for social justice made by electronic musicians from the 1970s to the present day. Students learn specific artistic and technological techniques which inform music concerned with representation, protest, and activism, and develop critical perspectives on this repertoire.

### Music of the Beatles

How does music affect our perception of political film? How does music manipulate our feelings for or against the subject matter? In this course we will survey some of the major films in this genre, beginning with Battle of the Somme (1916), and ending with Songs of War (2012) as well as more recent political films. In addition to readings on the political/historical topic, we will learn basic terminology and analytical techniques for film music.

of the course focuses on acquiring mastery over the basic musical materials of this idiom through singing, improvisation, and transcription exercises. The second half of the course builds on these skills to theorize about and analyze aspects of North Indian classical pitch (i.e. raga) and rhythmic (i.e. tala) structure, form, performance practice, and their connection to other musical idioms, including the classical music of South India, and the classical and popular musical traditions of the West.

Stories of successful business ventures from PharmD and PhD graduates of the College of Pharmacy abound! This new short course will engage graduate and professional students in team-based learning to understand the basics of starting or operating a successful new business in any pharmacy discipline, including ventures based on new drugs, new delivery systems, community pharmacy, and/or pharmacy healthcare. Topics will include business fundamentals, intellectual property, marketing, regulatory issues, and more.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This problem solving course will challenge a multidisciplinary team of students to address a real-world problem in the area of sustainable food systems. Food: what we eat, how and where we produce it, where we buy it, and who has access to it has profound effects on human health, economies, and the environment. The current US food system, which delivers abundant, "cheap" and "safe" food to millions of people has embedded in it practices, policies, and outcomes that are not sustainable or desirable at a societal level. From water shortages and tainted drinking water to diet-related diseases and environmental costs, sustainability in food systems is critical to communities, nations, and our species.

This course will focus on one particular problem: how to enhance local (or regional) production, sale and consumption of fruits and vegetables within the United States, with a particular focus on Michigan and the Great Lakes region. Classes will primarily operate as discovery sessions with industry, governmental, and academic experts. The course culminates with students creating, and presenting to a team of experts and/or stakeholders, a business or operational plan proposing their solution.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Meeting renewable portfolios standards and expanding renewable energy markets requires overcoming numerous technological, societal, and legal hurdles. In this course, students will briefly examine these and the myriad other challenges facing renewable energy markets and then generate solutions to address one of those challenges.

Renewable energy offers the promise of energy security and reduced greenhouse gas emissions that are critical to climate change mitigation efforts in the United States and throughout the world. Twenty-nine states and the District of Columbia impose minimum renewable energy standards on their utilities' generation portfolios; eight states have renewable energy goals. The most ambitious standard is in Hawaii, which seeks to meet 100 percent of its energy needs from renewable sources by 2045, followed by Vermont (75 percent by 2032), California (50 percent by 2030), and the District of Columbia (50 percent by 2032). In Michigan, the renewable portfolio standard will be 15 percent in 2021.

Challenges facing renewable energy markets include an antiquated electricity transmission network geared to local generation and distribution that does not readily accommodate transmission of renewable energy from states where there is abundant supply to population centers; management of the electricity grid to provide stability in the face of the intermittent nature of renewable energy at limited scale; having sufficient storage capacity for renewable energy so that electricity is available at peak periods of demand; and ensuring price competitiveness of renewable energy through a combination of monetary and fiscal policy, while avoiding regressive impacts and geographical cost disparities. Addressing these challenges will require modification to existing laws and regulations.

Classes will include discovery sessions with industry, governmental, and academic experts. At the end of the term, students will present an integrated proposal to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Working as a group with guidance from the instructors, students will develop a plan to address how the lack of social capital among inner-city entrepreneurs impedes the development of viable businesses and successful entrepreneurs and prevents the development of a healthy entrepreneurial ecosystem in inner cities. We will focus on innovative, community-based solutions to this problem. Students will work collaboratively across disciplines to understand the current situation, explore current best practices, and create a plan to present to a hypothetical organization such as a state or local government, a foundation, a non-profit organization, or a

public-private partnership.

Class sessions will focus heavily on interactive discussion, presentations, and interviews with experts. Students will be expected to spend significant time outside of class working in teams to interview relevant stakeholders, conduct research, draft documents and develop the plan.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

<p>This course, structured as a seminar and writing workshop, intensively develops students' persuasive writing and critical reading skills through abundant practice and feedback. Weekly writing assignments and exercises will focus on every stage of the writing process, from brainstorming and research through drafting and revision, in three vital areas of political writing: the short opinion piece, the policy memorandum, and the polemical essay. We will read and analyze a wide variety of examples from traditional print and online media, from journalistic, government, and academic sources. We will also explore ethical considerations of policy writing, considering the ways in which our rhetorical choices?tone, word choice, even syntax?construct our subjects and frame contentious issues for target audiences.</p>

NGOs in Policy Formation

Taught by Towsley Policymaker in Residence Hardy Vieux (Legal Director at Human Rights First)

This class will explore the role of non-governmental organizations in formulating policy. Globally, there are currently some 3.7 million NGOs in operation. Given this proliferation and the ostensible influence of NGOs, this class will delve into what makes an NGO unique from other institutions engaged in policy formulation and how that role impacts the policy-making process. We will explore the core activities of NGOs through the lens of current policy debates, such as the global refugee crisis and the war on terror. The class seeks to make students aware of the myriad questions and nuances that beset NGOs and the array of strategies and tools available to NGOs to impact policy.

Soc Justice & Poli Conflicts

Fulfills the BA in Public Policy Values & Ethics requirement.

This is a course for students interested in social justice and equality, social justice movements, anti-democratic movements and the intersections of public leadership, public policy, and the rule of law in the context of the temporal evolution of the democratic state. It will seek to provide a comparative and global understanding of how social movements have shaped understandings and discourses of human rights over time. It will address the role of civic movements and leaders in transforming social understandings and meanings of the concepts human rights (social, political, economic and environmental rights) over the last two centuries. It will explore the relations between individual action, collective processes and outcomes as these affect and are shaped by the contexts of system, institution, law and public policy. It will address how inherent and intersecting relations of power, systems and structures of dominance are related to the experience of peace, violence, oppression and social resistance. As these are often textured into the context of politics, economics and the environment. It will explore the relationship between public policy, the law, institutional structure, social norms, social conditioning, ideologies, strategic communicative interaction, group engagement and imperial behaviors in the public spheres. It will pay special attention to the consequences social movements, social actors and leaders produce for politics, the economy, the environment, justice, equality, human rights and human lives. This course will introduce students to the intellectual and technical rigors of democratic, non-violent and effective leadership in the spheres of policy, the law and society. It will explore the social and political endeavors of such leaders and movements to address the difficult questions facing our world today. In this way it will provide

CAT#	Course Title	CR	PREREQ	LAB FEE	
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR

an overview of how such leaders negotiate, manage and resolve conflicts in organizational and intra-organizational settings. Importantly it will provide students with a theoretical understanding of how trans-generational and social trauma comes to bear on successful institutional, systemic, and programmatic intervention at the nexus of social justice work and public policy.

27990 P RW SEM 302 TTH 1-230PM 1210 WEILL Kabo  
Comparative Law & Policy  
Fulfills the BA in Public Policy Values & Ethics requirement.

This class provides a foundational understanding of comparative law and selected foreign legal systems. The first part of the course is devoted to understanding the different families of law. We will discuss civil law, common law, socialist law, customary law, Islamic law and others. In addition, we will explore country specific examples. In the second part of the course, we discuss ways to approach comparative law, and explore how laws are compared. Both the first and second parts of the course lead into the third where we will use our knowledge to explore practical policy applications of comparative law: How can laws successfully be transplanted one from country to another? How can law be used to further development? How do different systems address religious differences? How are legal systems rebuilt after wars?

24378 P RW SEM 305 MW 1-230PM 1230 WEILL Silva  
Inequity in Work

More than 50 years after the passage of the Civil Rights Act, significant gender and ethno-racial inequality in the labor market remains. Why? This course relies on a multidisciplinary literature from sociology, economics, psychology, moral philosophy, and socio-legal studies to examine ethno-racial and gender inequality in the labor market. We will first review and evaluate major explanations of inequality in the labor market, including employer discrimination, human capital differences, sexual harassment, occupational sex segregation, mass incarceration, inflexible workplaces, and segregated social networks. Then, we will discuss public policies and organizational efforts that seek to directly or indirectly ameliorate ethno-racial and/or gender inequality, such as paid family leave, "ban the box," unconscious bias and sexual harassment trainings, and increases to the minimum wage. We will discuss the motivation for these remedies, their effectiveness, and the ethical questions they raise.

31967 P RW SEM 306 MW 230-4PM 1230 WEILL Lin  
Immigration Policy  
Fulfills the BA in Public Policy Values & Ethics requirement.

Immigration is a phenomenon that touches upon every aspect of American society, from economic growth to neighborhood institutions to national culture. This seminar provides an overview of the effects of immigration on the United States and of the United States on immigrants, with particular emphasis on policies that govern the flow of immigration and that seek to regulate its impact. Topics include immigration law and its development; attitudes toward immigration and immigrants; unauthorized migration; return migration and transnational communities; labor market issues; economic mobility and economic and social niches; political inclusion, organization and co-optation; Americanization and assimilation; generational change; language controversies; ethnic and pan-ethnic identities; and the commercialization of immigrant cultures.

25798 P RW SEM 503 TH 6-9PM 1210 WEILL Henry  
Facilitating Dialogue  
Please note the first meeting day is Thursday January 11th.

This is a short introductory course module in facilitating complex and difficult dialogic moments of engagement in the social, professional and institutional spheres of the public arena. Its purpose is to provide the possibility for actual engagement with tense social issues and phenomena bedeviling complex societies. It will briefly explore the historical and theoretical contexts, which give rise to sometimes painful and traumatic moments that filter in and color what may otherwise be perceived as simplistic conversations and interactions. It will introduce students regardless of perceived color, gender, class, or ethnic identity categorization to the necessity for transcending their subject locations. In order to facilitate, mediate, and engage in trans-formative moments of learning, dialogue, leadership and communal capacity building with due regard of difference and the respect of mutuality.

31968 P RW SEM 507 TTH 10-1130AM 1220 WEILL Hausman  
Great Depression to Great Recession

Since the 2008 financial crisis, developed countries have suffered high unemployment and slow growth. What are options for policymakers in this environment? This course will analyze central issues in macroeconomic policymaking through the lens of history. Students will apply analytical tools to understand the consequences of monetary, fiscal and financial market policy in the Great Depression, in Japan after 1990, and in the current Great Recession.

Philanthropic Foundations  
PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only.

Private philanthropic foundations in the U.S. are fundamentally private organizations that operate within the public arena, and have long played central roles in advancing social change and shaping public priorities, yet exist as autonomous institutions that are unconstrained by democratic accountability mechanisms. While this autonomy allows foundations to achieve effective outcomes by taking risks, innovating with new programs, and moving with more agility than the bureaucratically constrained state, it may also result in amplifying elite voices outside of democratic processes, leading to normative concerns about power and control by the wealthy within the public realm. The core framework of the course will engage with these questions by utilizing an experiential approach, wherein students will participate in a hands-on process of making actual grants to nonprofit organizations. The Once Upon A Time Foundation has provided a grant of \$50,000 that the class will allocate as a course-long project, directly applying the concepts discussed during class through a practical lens. Students will determine the mission and objective of the funding based on students' values; the organization(s) to which funding

will be allocated; the number of and size of the gift(s) that will be made; how the gift(s) will be awarded; and how the impact of the gift(s) will be evaluated and assessed.

19903 PDR SEM 002 TTH 830-10AM 1220 WEILL Dominguez  
Global Financial Markets

PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only.

Global financial markets provide both opportunities and risks for macroeconomic policymakers. In this course we will explore the role of financial markets in economic development, the causes and consequences of financial crises, whether and how policies and institutions can be used to stabilize markets and help countries recover from crises, and what lessons we can learn from recent experiences which might help prevent future crises. The final paper will be an assessment of the causes and consequences of a financial crisis in a (student-selected) specific country.

31969 PDR SEM 003 MW 1130-1PM 1220 WEILL Mills  
Energy & Environ Policy

PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only.

The course aims to actively engage students in environmental policy research, broadly defined to include not just conventional issues such as air and water pollution, but also—and especially—ever-evolving energy and climate policy. In this hands-on course, students will gain a deeper understanding of contemporary environmental policy research, as well as develop personal expertise with a specific aspect of this policy arena. They will also acquire research skills applicable to both public policy and the social sciences, and hone their written and verbal communication abilities.

The course begins by introducing students to policy research techniques, with readings and class discussion largely drawing from the specific environmental policy interests of the students in the class. Students will then spend the remainder of the term researching a topic of their choosing on energy or environmental policy. These may include the student's own environmental policy passion, or a topic that complements ongoing research in the Center for Local, State, and Urban Policy (CLOSUP) Energy and Environmental Policy Initiative, including the National Surveys on Energy and the Environment. Suitable research projects may address some aspect of the allocation of regulatory authority between national, state, and local government; the inclusion or omission of particular policy levers within the overall regulatory framework; or constituencies of support or opposition for a particular policy option.

Survey Design  
This is a core course restricted to only Ford School students

Part of successful management is knowing how employees, managers, citizens, and other stakeholders think and feel about organizations in general, about particular policies, and about new initiatives and programs. It's also often important to know whether interventions are working: For example, if a manager has tried to change employee behavior in some way, are employees actually making the desired changes? How can managers get honest feedback about employee morale? When measuring public opinion on a complicated issue, how can you be sure that the responses you get are truly answering the questions you were trying to ask? When you are asking people to self-report about their behaviors, when can you trust their responses? In this module, students will be taught best practices for how to design and implement surveys to assess issues like employee morale, public opinion, and program success. Students

Working in Diverse Orgs  
This is a core course restricted to only Ford School students

The workforce of the 21st century is increasingly diverse. Productive managers cannot afford to ignore this diversity, and can benefit greatly from it. Yet we are often nervous about discussing and embracing issues of diversity, equity, and inclusion and many otherwise strong leaders are blind to the ways their own biases might affect their teams. In this module, students will learn about potential blind spots such as unconscious bias and its effects on employee hiring and retention, how the desire to avoid negative emotions might get in the way of productive management, and the dangers of groupthink, as well as learning strategies to avoid or address these problems. The readings will draw on empirical research from social psychology and organizational behavior, as well as real-world examples of diversity issues in the workplace.

31974 P RW LEC 204 T 530-730PM 1220 WEILL Hajra

Policy & Mgmt in the Nonprofit  
This is a core course restricted to only Ford School students

The nonprofit sector has emerged as one of the cornerstones of American society, and yet remains very much a work in progress. The "third sector" faces unique and evolving pressures in areas such as social enterprise, philanthropy, mission focus, performance measurement, sector blur, and more. In our class we will examine how some of these broad issues intersect with the day to day operation of nonprofit organizations. By considering sector tensions from a management perspective, ultimately we will each develop our own informed view on the appropriate role and function of the nonprofit sector within society. Future policy makers and nonprofit managers alike will enhance their ability to formulate positions on policy issues that impact the sector.

Leadership in Diversity at Uni  
This is a core course restricted to only Ford School students

The focus of this graduate seminar in public management is leadership and policy issues related to diversity and inclusion efforts in higher education, with a particular focus on public universities in the United States. A number of current issues related to strategic and policy approaches to diversity in higher education will be explored through the lens of leadership. The course will cover leadership models, the role of vision and mission in organizations, and leadership skills such as strategic planning, change management, organizational culture, values conflict, stakeholder management and resource allocation. Policy topics will include: affirmative action in student recruiting/financial aid and in faculty hiring; law and institutional policy regarding speech and expression; bias reporting systems; and polemics regarding campus statues and named buildings/schools. Students will perform case study analyses of a number of current controversies on campuses and in legislatures. In addition, students will assist the leadership of the University of Michigan by analyzing current campus policies and making recommendations.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This problem solving course will challenge a multidisciplinary team of students to address a real-world problem in the area of sustainable food systems. Food: what we eat, how and where we produce it, where we buy it, and who has access to it has profound effects on human health, economies, and the environment. The current US food system, which delivers abundant, "cheap" and "safe" food to millions of people has embedded in it practices, policies, and outcomes that are not sustainable or desirable at a societal level. From water shortages and tainted drinking water to diet-related diseases and environmental costs, sustainability in food systems is critical to communities, nations, and our species.

This course will focus on one particular problem: how to enhance local (or regional) production, sale and consumption of fruits and vegetables within the United States, with a particular focus on Michigan and the Great Lakes region. Classes will primarily operate as discovery sessions with industry, governmental, and academic experts. The course culminates with students creating, and presenting to a team of experts and/or stakeholders, a business or operational plan proposing their solution.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Meeting renewable portfolios standards and expanding renewable energy markets requires overcoming numerous technological, societal, and legal hurdles. In this course, students will briefly examine these and the myriad other challenges facing renewable energy markets and then generate solutions to address one of those challenges.

Renewable energy offers the promise of energy security and reduced greenhouse gas emissions that are critical to climate change mitigation efforts in the United States and throughout the world. Twenty-nine states and the District of Columbia impose minimum renewable energy standards on their utilities' generation portfolios; eight states have renewable energy goals. The most ambitious standard is in Hawaii, which seeks to meet 100 percent of its energy needs from renewable sources by 2045, followed by Vermont (75 percent by 2032), California (50 percent by 2030), and the District of Columbia (50 percent by 2032). In Michigan, the renewable portfolio standard will be 15 percent in 2021.

Challenges facing renewable energy markets include an antiquated electricity transmission network geared to local generation and distribution that does not readily accommodate transmission of renewable energy from states where there is abundant supply to population centers; management of the electricity grid to provide stability in the face of the intermittent nature of renewable energy at limited scale; having sufficient storage capacity for renewable energy so that electricity is available at peak periods of demand; and ensuring price competitiveness of renewable energy through a combination of monetary and fiscal policy, while avoiding regressive impacts and geographical cost disparities. Addressing these challenges will require modification to existing laws and regulations.

Classes will include discovery sessions with industry, governmental, and academic experts. At the end of the term, students will present an integrated proposal to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Working as a group with guidance from the instructors, students will develop a plan to address how the lack of social capital among inner-city entrepreneurs impedes the development of viable businesses and successful entrepreneurs and prevents the development of a healthy entrepreneurial ecosystem in inner cities. We will focus on innovative, community-based solutions to this problem. Students will work collaboratively across disciplines to understand the current situation, explore current best practices, and create a plan to present to a hypothetical organization such as a state or local government, a foundation, a non-profit organization, or a public-private partnership.

Class sessions will focus heavily on interactive discussion, presentations, and interviews with experts. Students will be expected to spend significant time outside of class working in teams to interview relevant stakeholders, conduct research, draft documents and develop the plan.

NGOs in Policy Formation

Taught by Towsley Policymaker in Residence Hardy Vieux (Legal Director at Human Rights First)

This class will explore the role of non-governmental organizations in formulating policy. Globally, there are currently some 3.7 million NGOs in operation. Given this proliferation and the ostensible influence of NGOs, this class will delve into what makes an NGO unique from other institutions engaged in policy formulation and how that role impacts the policy-making process. We will explore the core activities of NGOs through the lens of current policy debates, such as the global refugee crisis and the war on terror. The class seeks to make students aware of the myriad questions and nuances that beset NGOs and the array of strategies and tools available to NGOs to impact policy.

28534 P RW LEC 301 TTH 10-1130AM 1230 WEILL Silva

Gender, Race, & Emp Pol

More than 50 years after the passage of the Civil Rights Act, significant gender and ethno-racial inequality in the labor market remains. Why? This course relies on a multidisciplinary literature from sociology, economics, psychology, and socio-legal studies to examine ethno-racial and gender inequality in the labor market. We will first review and evaluate major explanations of inequality in the labor market, including employer discrimination, human capital differences, sexual harassment, occupational sex segregation, mass incarceration, inflexible workplaces, and segregated social networks. Then, we will discuss public policies and organizational efforts that seek to directly or indirectly ameliorate ethno-racial and/or gender inequality, such as paid family leave, "ban the box," unconscious bias and sexual harassment trainings, and increases to the minimum wage.

31988 P RW LEC 302 TTH 1-230PM 1210 WEILL Kabo

Comparative Law & Policy

This class provides a foundational understanding of comparative law and selected foreign legal systems. The first part of the course is devoted to understanding the different families of law. We will discuss civil law, common law, socialist law, customary law, Islamic law and others. In addition, we will explore country specific examples. In the second part of the course, we discuss ways to approach comparative law, and explore how laws are compared. Both the first and second parts of the course lead into the third where we will use our knowledge to explore practical policy applications of comparative law: How can laws successfully be transplanted one from country to another? How can law be used to further development? How do different systems address religious differences? How are legal systems rebuilt after wars?

Facilitating Dialogue

Please note that the first meeting day is Thursday January 11th.

This is a short introductory course module in facilitating complex and difficult dialogic moments of engagement in the social, professional and institutional spheres of the public arena. Its purpose is to provide the possibility for actual engagement with tense social issues and phenomena bedeviling complex societies. It will briefly explore the historical and theoretical contexts, which give rise to sometimes painful and traumatic moments that filter in and color what may otherwise be perceived as simplistic conversations and interactions. It will introduce students regardless of perceived color, gender, class, or ethnic identity categorization to the necessity for transcending their subject locations. In order to facilitate, mediate, and engage in trans-formative moments of learning,

Storytelling in Policy Writing					
This new half-semester course takes its inspiration from Ta-Nehisi Coates' "The Case for Reparations." In his essay, Coates employs a mix of writing modes?the statistical and the anecdotal, as well as the journalistic and even the biblical?in order to argue for a policy idea that might be otherwise all too quickly dismissed. In our course, students will choose a policy topic they care deeply about and make a case for it. To steal a line from Luke Schaefer, students will write the paper they came to grad school to write.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). This problem solving course will challenge a multidisciplinary team of students to address a real-world problem in the area of sustainable food systems. Food: what we eat, how and where we produce it, where							

we buy it, and who has access to it has profound effects on human health, economies, and the environment. The current US food system, which delivers abundant, "cheap" and "safe" food to millions of people has embedded in it practices, policies, and outcomes that are not sustainable or desirable at a societal level. From water shortages and tainted drinking water to diet-related diseases and environmental costs, sustainability in food systems is critical to communities, nations, and our species.

This course will focus on one particular problem: how to enhance local (or regional) production, sale and consumption of fruits and vegetables within the United States, with a particular focus on Michigan and the Great Lakes region. Classes will primarily operate as discovery sessions with industry, governmental, and academic experts. The course culminates with students creating, and presenting to a team of experts and/or stakeholders, a business or operational plan proposing their solution.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Meeting renewable portfolios standards and expanding renewable energy markets requires overcoming numerous technological, societal, and legal hurdles. In this course, students will briefly examine these and the myriad other challenges facing renewable energy markets and then generate solutions to address one of those challenges.

Renewable energy offers the promise of energy security and reduced greenhouse gas emissions that are critical to climate change mitigation efforts in the United States and throughout the world. Twenty-nine states and the District of Columbia impose minimum renewable energy standards on their utilities' generation portfolios; eight states have renewable energy goals. The most ambitious standard is in Hawaii, which seeks to meet 100 percent of its energy needs from renewable sources by 2045, followed by Vermont (75 percent by 2032), California (50 percent by 2030), and the District of Columbia (50 percent by 2032). In Michigan, the renewable portfolio standard will be 15 percent in 2021.

Challenges facing renewable energy markets include an antiquated electricity transmission network geared to local generation and distribution that does not readily accommodate transmission of renewable energy from states where there is abundant supply to population centers; management of the electricity grid to provide stability in the face of the intermittent nature of renewable energy at limited scale; having sufficient storage capacity for renewable energy so that electricity is available at peak periods of demand; and ensuring price competitiveness of renewable energy through a combination of monetary and fiscal policy, while avoiding regressive impacts and geographical cost disparities. Addressing these challenges will require modification to existing laws and regulations.

Classes will include discovery sessions with industry, governmental, and academic experts. At the end of the term, students will present an integrated proposal to an expert review panel.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Working as a group with guidance from the instructors, students will develop a plan to address how the lack of social capital among inner-city entrepreneurs impedes the development of viable businesses and successful entrepreneurs and prevents the development of a healthy entrepreneurial ecosystem in inner cities. We will focus on innovative, community-based solutions to this problem. Students will work collaboratively across disciplines to understand the current situation, explore current best practices, and create a plan to present to a hypothetical organization such as a state or local government, a foundation, a non-profit organization, or a public-private partnership.

Class sessions will focus heavily on interactive discussion, presentations, and interviews with experts. Students will be expected to spend significant time outside of class working in teams to interview relevant stakeholders, conduct research, draft documents and develop the plan.

This is a prof pick class and is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Students may apply for the course by submitting the required application materials to the PSI registration site (<https://problemsolving.law.umich.edu/>) between October 23, 2017, and November 3, 2017.

<b>311</b>	<b>Eco Explorers Prep</b>					<b>1.00</b>	
22674	PDR LAB 001 F		1-1AM	ARR	Trumpey		

#### Course Description

Traditional cooking methods in Sub-Saharan Africa are typically inefficient. Basic, hand built cook stoves can reduce firewood use by 50% improving forest health and reducing girl chores. Eco-Explorers will meet once a week during winter term in preparation for a 3 week June Design Build trip in Tanzania. Language and cultural preparation, test stove design build and design process documentation will be completed prior to the field component. The June trip will include a study tour to major wildlife park areas of Tanzania, a project site visit to a Peace Corps Volunteer and 2 weeks living with Masai families during the design / build process. Enrollment by application / permission of instructor.

Art for Social Change: Japan

#### Course Description

This course will explore the nature and perception of physical and mental disability in our society and the role that art can play in improving the lives of individuals. We will examine numerous issues through classroom lectures and workshops, and will gain greater understanding of work and education opportunities for people with disabilities through fieldtrips (Detroit, Ann Arbor Center for Independent Living, Work Skills Corporation). The early part of this course during the winter term in Ann Arbor will lay the groundwork for the second part of the course, a one-month trip to Japan for field studies.

Course Description							
Through intensive studio sessions, this course focuses on drawing from the live model, both clothed and unclothed. Students investigate ways the figure is used and referenced in the work of contemporary artists and explore strategies for using the figure in drawings that are creative and expressive in nature. The goals of this course include gaining a better understanding of the figure and its significant role in the history of art, improving figure drawing skills, and pursuing unique methods of personal expression through the use of the figure in drawing.
